HEALTH

Abricotab C

Item: 2188

Type/size: 60 chewable tablets

Abricotab C helps:

- supplement the diet of adults and children 3 years and older with useful nutrients;
- support the health of the heart and blood vessels;
- improve digestion;
- strengthen immunity.

Ingredients:

- | | |
|--|--------|
| • Apricot (<i>Prunus armeniaca</i>) fruit lyophilized powder | 880 mg |
| • Vitamin C (L-Ascorbic acid) | 100 mg |
| • Other ingredients | |

Abricotab C combines the beneficial properties of apricots and vitamin C to address the problems of an unbalanced diet, including nutrient-poor fruits and vegetables in one's diet. The product helps to normalize digestion and metabolism, and also provides the body with the nutrients it needs. The chewable tablets have a pleasant taste and do not need to be washed down, which makes them very easy to take.

Active ingredients:

Freeze-dried apricot powder.

The lyophilization method (vacuum drying of a pre-frozen product) preserves the maximum amount of nutrients, unlike traditional drying and canning.

Apricots.

They are a rich source of the phytonutrients needed to maintain one's health. They contain vitamins (beta-carotene, vitamins B and C, flavonoids, and niacin), as well as lutein, zeaxanthin, minerals (potassium, magnesium, iron, copper, calcium, phosphorus, iodine), and fiber.

In terms of potassium content, apricots occupy one of the top spots among plant products. Apricots have a positive effect on metabolism and digestion. They improve gallbladder and intestinal functions, and have a tonic effect.

Abricotab C is made using only the Shalah variety of apricot, grown in an ecologically clean environment in the Ararat Valley of Armenia.

Vitamin C.

The value of this vitamin to the body is enormous. It is both the most powerful antioxidant, protecting cells from premature ageing, and an important participant in collagen synthesis, which speeds up tissue healing, and maintains vascular elasticity. Vitamin C also improves the absorption of iron, and selenium and boosts the body's defences.

ActiVin helps:

- slow down ageing;
- improve the tone of the body;
- improve circulatory system functions;
- improve memory;
- improve endurance and speed up the healing processes.

Ingredients:

Vitamin C (Calcium ascorbate) 60 mg; Vitamin E (Tocopheryl acetate) 10 mg; Zinc (L-Methionine) 15 mg; Selenium (L-Selenomethionine) 35 mcg; Copper (Citrate) 40 mcg; Manganese (Aspartate) 250 mcg; Chromium (Picolinate) 100 mcg; Molybdenum (Sodium molybdate) 25 mcg; Inulin (from Chicory root) 200 mg; ActiVin (Grape seed extract) 150 mg; Muira Puama (Liriosma ovata) root 50 mg; Eleuthero (Eleutherococcus senticosus) root 25 mg; Dunaliella (Dunaliella salina) whole plant 15 mg; Royal Jelly (Bees milk) 10 mg; Milk Thistle (Silybum marianum) extract 5 mg; Ginkgo (Ginkgo biloba) extract 5 mg; Green Tea (Camellia sinensis) extract 5 mg; other ingredients.

Among the vast number of chemical reactions that take place in our body there are those that produce free radicals. Free radicals accelerate the ageing process and contribute to the development of a variety of diseases. The formation of free radicals is intensified by negative environmental factors such as air pollution, cigarette smoke, chemical compounds absorbed by the body, etc. In addition, as people age, the antioxidant system of the body can no longer cope adequately and free radicals produce even more adverse effects. In this case you can boost your body's protective functions by taking bioactive supplements containing antioxidants.

The biologically active complex **ActiVin** includes a number of natural antioxidants that bind free radicals, thereby slowing down the ageing process and increasing your body's energy levels, as well as, improving endurance, and stabilizing the life support systems of the body.

Main Components

ActiVin (a grape seed extract) has a record-high content of natural antioxidants, which bind free radicals and suppress oxidative reactions. Grape seed extract also acts as a cardio-protector by strengthening the blood vessel walls, improving circulation, and enhancing the overall tone of the body. It is 15 times more ef-

fective than vitamin E, which helps correct age-related issues. The active ingredients of the extract revitalize the brain by saturating brain cells with oxygen.

Inulin – polysaccharide is composed of fructose. Supports healthy gut bacteria for increased stamina and work productivity.* Inulin activates healthy gut bacteria, supporting the body's absorption of certain nutrients, (i.e. calcium, magnesium).

Royal jelly is a highly nutritious product that greatly affects various factors throughout the metabolic processes. In the middle ages it was given the name Royal Jelly as it was extremely difficult to extract and store, and only very affluent people could afford to use it. Royal Jelly is a biologically-active stimulator and a means of strengthening the body as a whole.

Vitamins C and E protect cells from free radicals, and activate the immune system. Excellent source of antioxidant vitamins C and E.

Extracts of Ginkgo Biloba leaves, green tea, and thistle seeds boast an extremely high content of vitamins and flavonoids (natural antioxidants), which have a very positive effect on blood vessels. Flavonoids strengthen capillary walls, activate the oxidation processes in the tissues, and intensify the effects of ascorbic acid.

AquaOx:

- is a general health improving remedy;
- prevents the progress of atherosclerosis;
- provides active working capacity.

Ingredients:

- Pomegranate (*Punica granatum*) fruit extract 200 mg
- Acai (*Euterpe oleracea*) fruit extract 200 mg
- Cocoa (*Theobroma cacao* L.) bean extract 40 mg
- Rosemary (*Rosmarinus officinalis*) leaf extract 20 mg.
- Other ingredients

AquaOx is a complex of the most powerful plant antioxidants that supports the central nervous system and the cardiovascular system to optimize its performance, enhance blood circulation and vessel permeability, and protect the body's cells from the aging process.

Main Components

Pomegranate extract with ellagic acid, proanthocyanidins, and a complex of other substances, it is considered to be a powerful antioxidant. Antioxidants help prevent cell damage, which can lead to brain, heart, liver, and kidney disorders. The latest scientific research has shown that pomegranate extract is able to slow down plaque buildup inside the arteries (atherosclerosis). Drinking a glass of pomegranate juice every day prevents the formation of rosclerotic plaque in the blood vessels over time. In fact, pomegranate has more antioxidant activity than cranberries, blackberries or green tea.

Açai Berry is also leader in the area of antioxidants, omega-3, -6, and -9, fatty acids, vitamins, minerals,

and amino acids. This is a rare example of such high amount of healthy substances in one berry. Açai produces a general tonic effect, enhances blood circulation, activates brain function, and helps to support normal cholesterol levels.

Cocoa bean extract is a source of polyphenols and flavonoids, which resist the negative influences of free radicals on body cells. Polyphenols are responsible for the taste and colour of cocoa beans, as well as a host of health benefits, including antioxidant, antibacterial and anti-inflammatory properties. It has been scientifically proven that cocoa polyphenol is quickly and fully absorbed by the body. Cocoa is beneficial for the brain as it stimulates blood flow to the areas responsible for quick reactions and memory.

Rosemary extract is also an active antioxidant due to the presence of phenolic acids. Carnosine acid and its derivatives show strong antioxidant, stabilizing, and toning effects of rosemary extract.

Assimilator

Item: 91118

Type/size: 90 vegetable capsules

Assimilator helps:

- to improve digestion and to absorb food;
- to reduce bloating and heaviness in the stomach;
- to supply nutrients to the cells;
- to improve the immune functions of the body.

Ingredients:

- Vitamin A 344 mcg, Vitamin D3 5 mcg, Protease 30 000 HUT, Amylase 8 000 DU, Lactase 400 LACU, Cellulase 200 CU, Maltase 150 DP, Lipase 50 LU, Papain (from papaya) 600 000 PU, Bromelain (from pineapple) 300 000 PU.
- Other ingredients

If the amount of energy needed to break down nutrients increases, or if the amount of digestive enzymes produced by the body is insufficient, it may be necessary to obtain such enzymes through supplementation. These can come in the form of medications or bioactive food supplements such as **Assimilator** – a product designed to improve digestion. It includes the basic enzymes that break down complex food substances in the gastrointestinal tract into simpler elements, which can then be absorbed through intestinal walls into the blood stream.

Main Components

Enzymes that Break Down Carbohydrates:

Amylase is the basic enzyme found in saliva that begins the process of digesting carbohydrates (bread, cereals, and potatoes) in the mouth.

Cellulase is an enzyme that is not generated by the human digestive system but is needed to break down vegetable fibers (cellulose). The enzyme actively breaks down cellulose (fiber) to produce glucose. Cellulose increases the nutritional value of grains, fruits, and vegetables.

Lactase is an enzyme that breaks down lactose (milk sugar) into glucose. It also improves digestion of dairy products.

Enzymes that Break Down Proteins:

Protease, papain, and bromelain help break proteins down into amino acids, actively functioning both in the acidic and alkaline parts of the GI tract.

Enzyme that Break Down Fats:

Lipase breaks down animal fats into easily digestible fatty acids and helps in the absorption of vitamins A and D.

Vitamin A is an antioxidant that improves immunity against infections and plays an important role in cellular immunity. It takes part in the metabolism of fats and protecting the mucosa membranes of the GI tract.

Vitamin D regulates the phosphorous-potassium metabolism and increases the permeability of the intestinal walls so nutrients can be better absorbed in the gastrointestinal tract.

B-Luron

Item: 918140

Type/size: 2 x 500 ml

B-Luron helps:

- stimulates the production of synovial fluid in cartilage;
- prevents damage, abrasion and destruction of joints and cartilage;
- retains its effects even after the end of the course.

Ingredients:

- | | |
|--|--------|
| • Chondroitin Sulfate | 300 mg |
| • Hyaluronic Acid | 150 mg |
| • Vitamin E (as DL-alpha tocopheryl acetate) | 15 mg |
| • Other ingredients | |

B-Luron is an exciting new innovative orthomolecular product that combines Hyaluronic Acid, Vitamin E, and Chondroitin to promote the regeneration of connective tissue while dramatically enhancing natural skin tone. The active ingredients of B-Luron are the building blocks for the creation of synovial fluid, which protects the joints from friction that can then lead to damage of the cartilaginous tissue.

Main Components

Hyaluronic acid and chondroitin complex. Researchers have discovered that when they combined hyaluronic acid and chondroitin sulfate, it created a unique, powerful complex, which dramatically improved joint functions in test subjects. The supplementation of both substances, rather than individually, provides joints and cartilage with the major components to promote a healthy motor system and maintain healthy, flexible joints and mobility.

Hyaluronic acid is found in many tissues of the body. It tightens the skin and the connective tissue, keeps

the cartilage elastic, and lubricates joints. Hyaluronic acid is the major component of synovial fluid, the "joint grease". Additionally, hyaluronic acid supplements can help increase skin moisture and reduce the appearance of fine lines and wrinkles.

Chondroitin is an active ingredient and a vital part of cartilage. Chondroitin sulfate can be found in cartilage, which is a cushion that surrounds the joints in our body. Chondroitin sulfates act like "liquid magnets". They help attract fluid into the connective tissue. This ensures the elasticity and cushioning ability of the articular cartilage. Chondroitin is found naturally in your body. It's a vital part of cartilage, giving it elasticity by helping it retain water.

Vitamin E is a powerful antioxidant that slows down oxidation processes and protects other fat-soluble vitamins from damage caused by oxygen. It also helps to improve the absorption of these vitamins. It improves the process of cellular respiration, thus increasing overall endurance.

BP Phyto Control

Item: 91859

Type/size: 90 capsules

BP Phyto Control helps:

- support vascular tone and blood pressure;
- protect crown vessels from oxidative stress;
- increase the strength and flexibility of the vascular walls.

Ingredients:

- Hawthorn (*Crataegus pinnatifida*) berry extract 200 mg
- Motherwort (*Leonurus cardiaca*) leaf extract 130 mg
- Hibiscus (*Rosa sinensis*) flower extract 100 mg
- Coffee (*Coffea arabica*) green seed extract 70 mg
- Skullcap (*Scutellaria baicalensis*) root extract 30 mg
- Other ingredients

BP Phyto Control is a dietary supplement consisting of a complex of biologically active plant ingredients. The ingredients of BP Phyto Control gently regulate the cardiovascular system and help normalize blood pressure.

Main Components

Hawthorn berry extract is often called “the heart herb” for its various cardioprotective properties. Prized for its ability to support and strengthen the heart, the hawthorn berry has been used for centuries as a natural remedy for all kinds of serious heart concerns. It improves blood circulation in the heart muscle and brain, as well as helps dilate the blood vessels. It increases the elasticity and strength of blood vessel walls. Hawthorn berry extract enhances the antioxidant activity of vitamins A, C, and E, improves circulation, strengthens capillaries, reduces inflammation, boosts the immune system, protects against atherosclerosis, provides antioxidant support for the brain and nerve tissue, and improves connective tissue health.

Green coffee bean contains valuable chlorogenic acids that are missing from roasted coffee. Green coffee dilates the blood vessels and improves blood flow. The green coffee bean is rich in chlorogenic acids — compounds with potent antioxidant and anti-inflammatory effects that may provide many health benefits.

Motherwort leaf gently relieves stress and reduces vasoconstriction. Motherwort contains many phytochemicals with antioxidant properties, including flavonoids, sterols, triterpenes, and tannins.

Skullcap root regulates the heart's contraction rate. A member of the mint family, skullcap is rich in nutrients, including antioxidants known as flavones which reduce the effects of oxidative stress on various tissues in the body.

Hibiscus flower contains beneficial antioxidants and has been found to lower blood pressure. Hibiscus flower is a source of organic acids (citric, malic, ascorbic), hibiscus acid, anthocyanins, flavonoids, and phytoosterols, which have a tonic effect on blood vessels.

Calci-Prime

Item: 2195

Type/size: 120 vegetable capsules

Calci-Prime helps:

- Strengthen bones and teeth
- Support joint health and muscle function
- Maintain blood vessel elasticity

Ingredients contents of 1 capsule:

• Calcium (from Aquamin™ TG)	137,5 mg
• Magnesium (from Aquamin™ TG and magnesium citrate)	40 mg
• Silicon (from extract of field horsetail herb)	2 mg
• Vitamin K2 MenaQ7® (menaquinone-7)	18,8 mcg
• Zinc (citrate)	1,34 mg
• Manganese (gluconate)	0,25 mg
• Boron (sodium borate)	0,2 mg
• Vitamin D3 (cholecalciferol)	1,25 mcg (50 IU)

Adults need about 1000 mg of calcium daily for metabolic processes, as well as heart, muscle, and nervous system function. To achieve this, a stable blood calcium level is necessary. Bone tissue acts as a storage site for calcium in the body, with 98-99% of the mineral found in bones and teeth. When dietary calcium is insufficient, the body draws from these reserves, reducing bone and tooth mineral density and increasing the risk of damage. It's crucial to consistently replenish calcium (between 8.6 to 10.3 mg/dL).

Calci-Prime provides natural calcium along with synergistic vitamins and minerals that enhance absorption in the digestive tract and incorporation into bone tissue and metabolic processes.

It contains advanced, well-researched forms of minerals and vitamins, with calcium and magnesium sourced from Aquamin™, a powder derived from marine coral seaweed called lithothamnium.

Main Components

Calcium is the primary element that contributes to the strength and hardness of teeth and bones. It is necessary for normal heart and skeletal muscle contractions, blood clotting, and enzyme formation.

Magnesium plays a key role in bone tissue growth and mineralization, acting as a structural element and calcium synergist, ensuring proper calcium absorption. Calcium controls nerve and muscle contractions, while magnesium relaxes them. The product contains organic magnesium citrate and inorganic magnesium from Aquamin™.

Zinc is essential for collagen synthesis, which contributes to bone flexibility. Collagen comprises up to 95% of bone's organic part.

Manganese is involved in collagen synthesis, like zinc. Manganese deficiency leads to reduced calcium content in bone tissue.

Silicon is involved in collagen synthesis and is important for cartilage and vessel wall elasticity, as well as bone flexibility. Silicon and boron improve calcium and magnesium absorption.

Vitamins D3 and K2 enhance calcium absorption and integration during early bone tissue formation, ensuring calcium and magnesium interaction. Vitamin K2 is supplied through the patented compound MenaQ7.

Cascara Sagrada

Item: 1405

Type/size: 100 tablets

Cascara Sagrada helps:

- ensure regular bowel movements;
- reduce inflammation and intestinal pains;
- purge the body of toxins;
- normalize the functions of the digestive system.

Ingredients:

- Cascara Sagrada (Rhamnus purshiana) bark powder 487,5 mg
- Other ingredients

Cascara Sagrada is a natural product based on Buckthorn Pursha. It works as a laxative and regulates the muscle tone of the intestine, primarily the colon, stimulating peristalsis and secretion throughout the entire digestive system.

Main Components

Buckthorn Pursha has long been known in Central and North America. Its bark was boiled and used as a laxative and an anti-inflammatory agent.

Buckthorn Pursha gently cleanses the intestines and helps deal with acute and chronic atonic and spastic constipation. It can be used to treat haemorrhoids and fissures in the rectum as it softens the stool and helps to heal the lining rather than irritate it.

The laxative effect of Buckthorn Pursha manifests about 8-10 hours after you take it, so it's best to take it before you go to sleep. The long latent period is explained by the fact that the ingredients contained in Pursha remain inactive immediately after a meal. It's only when they reach the large intestine that they

break down into emodin and acid, which increase the tone of the peristalsis of the large intestine, helping to move the stool along. They also slow down the process of liquid absorption in the large intestine which increases the amount of solid waste while simultaneously liquefying it, which adds to the laxative effect.

The tannins found in buckthorn also reduce inflammation in the mucous membranes and kill off bacteria. When they come into contact with the mucous membranes of the intestines, they anesthetize them and create a protective layer that prevents the spread of inflammation.

Essential oils disinfect, anesthetize, and tone up the intestine. They neutralize a large number of microbes and bacteria, preventing fermentation and putrefaction in the intestine. Polyphenols found in essential oils also remove bile, increasing the secretion and antitoxic function of the liver, normalizing bile production and increasing the amount of cholesterol and toxins that get purged with bile.

Chewable Papaya

Item: 2196

Type/size: 90 chewable tablets

Chewable Papaya is formulated to:

- Facilitate better digestion and assimilation of protein-dense foods, lightening the load on your digestive system.
- Help lessen discomfort after eating.
- Nurture the health of your gastrointestinal tract.
- Foster immune system wellness.

Ingredients:

• Papaya fruit extract (<i>Carica papaya</i>)	75 mg
• Bromelain	20 mg
• Long turmeric rhizome extract (<i>Curcuma longa</i>)	3,3 mg
• Vitamin B2 (riboflavin)	0,15 mg
• Other ingredients	

Proteins are vital "building blocks" for our organs and tissues. But our bodies can't absorb large protein molecules directly; they need to be broken down into smaller bits known as amino acids. Special enzymes, made by our stomach, intestines, pancreas, and liver, handle this breakdown job. The health and teamwork of these organs dictate how well we digest protein.

Additionally, how we cook our food, where our protein comes from, and how much protein we eat can all affect how well our body processes it. For example, it's easier for our bodies to digest boiled food than fried food, and we absorb protein from fish better than from fatty meat.

Sometimes, we might consume too much protein or our bodies might not make enough of these enzymes. In such cases, additional enzyme supplements can help lighten the load on our digestive system.

Chewable Papaya is a product that uses plant enzymes and tropical plant extracts. It's specifically designed to help your body digest and absorb food that's high in protein.

Main Components

Bromelain is an enzyme found in the core and stems of pineapples. Just like pepsin, a key enzyme in our stomach juice, bromelain helps break down proteins into small bits called peptides and then into amino acids, making them easier for our bodies to absorb. Bromelain aids digestion, and unlike many enzymes, it stays active across a range of pH levels, from acidic to weakly alkaline, making it great for enhancing protein digestion. Proteins that are well-absorbed provide the raw materials for new cells, which can aid in the healing of the gastrointestinal lining.

Papaya fruit extract, specifically the juicy flesh, is packed with vitamins, minerals, and plant enzymes. Papain, one of these enzymes, is particularly valuable. Much like bromelain, papain helps break down proteins and remains active in a wide range of pH levels.

Vitamin B2, also known as riboflavin, supports tissue regeneration and healing, contributing to the health of the gastrointestinal lining.

Turmeric extract stimulates the production of bile in the liver, which aids digestion and helps our bodies better absorb food, particularly fats.

Chlorella Tablets

Item: 2129

Type/size: 180 tablets

Chlorella Tablets help:

- detoxify the body;
- strengthen the immune system;
- protect against environmental damage;
- improve digestion;
- increase blood hemoglobin levels.

Ingredients:

Chlorella	500 mg
-----------	--------

Chlorella is a unique antioxidant especially beneficial to those who work in industries with inherent health risks, urban dwellers, and those with harmful addictions. It is derived from cultivated algae and has a very high absorption rate (80-90%).

Main Components

A unicellular algae containing simple plant protein, chlorophyll, B vitamins, vitamin D, beta-carotene, and minerals. Chlorella protein is as nutritious as that found in meat and whole grains. Chlorella's impressive nutritional profile has led some to call it a "superfood." Chlorella contains many nutrients, including beta-carotene, vitamins B12, B9, C, and E, as well as amino acids and minerals.

Because of its fibrous cell walls, chlorella helps flush heavy metals and toxins from the body. Heavy metals

such as lead and mercury bind to chlorella in the digestive tract and are then swept from the body during elimination.

No plant on earth contains as much chlorophyll as chlorella (5-10 times more than is found in spirulina or alfalfa). Chlorophyll oxygenates the blood and increases the amount of hemoglobin in red blood cells, forestalling the development of anemia.

Thanks to the unique structure of its cell walls, it supports the rapid in rapid reproduction of good bacteria in the gut. It strengthens immunity and reduces susceptibility to infections. It triggers the production of white blood cells, helping the body reject virus-infected cells and maintain optimal health.

CircuPhyt

Item: 91823

Type/size: 60 capsules

CircuPhyt helps:

- improves venous and arterial blood circulation;
- normalizes viscosity of blood and stimulates lymph flow;
- restores microcirculation;
- strengthens immunity and has antioxidative and fortifying effects.

Ingredients:

• Diosmin (from Hesperidin)	250 mg
• Gotu kola (Centella asiatica) whole plant extract	100 mg
• Horse Chestnut (Aesculus hippocastanum) seed extract	100 mg
• Blueberry (Vaccinium corymbosum) fruit extract	100 mg
• Hawthorn (Crataegus pinnatifida) berry extract	60 mg
• Ginkgo (Ginkgo biloba) leaf extract	40 mg
• Other ingredients	

CircuPhyt is a combined vegetable complex designed to support your blood vessels and to provide your body with antioxidant protection.

Main Components

Diosmin is a bioflavonoid derived from citrus peel. Diosmin is considered to be a vascular protective agent used to increase vascular tone. Thanks to this antioxidant property, typical of flavonoids, diosmin helps to fight against free radicals, preventing and decreasing oxidative stress. Diosmin improves lymphatic drainage by increasing the frequency and intensity of lymphatic contractions and the total number of functional lymphatic capillaries.

The effects of **Gotu kola** on the body are complex. This plant improves brain activity and nervous system function, heals varicose veins, and strengthens connective tissue, and its antioxidants protect cells and improve metabolic processes. Gotu kola may have major implications in the treatment of a condition called chronic venous insufficiency. The acids found in gotu kola may help to improve blood circulation and help to reduce swelling.

Horse chestnut seed is a popular dietary supplement commonly used to improve vein health and reduce in-

flammation. The main active ingredient in horse chestnut extract is aescin, which has been studied for its many health benefits. Horse chestnut seeds contain up to 60% starch, escin glycoside, protein, fatty oils, catechins, bitter, tannic, protein substances, and arginine.

Hawthorn extract is obtained from the leaves of Hawthorn tree, and it is rich in numerous nutrients, minerals, and healthy natural compounds. Hawthorn berry helps to improve cardiovascular health, chest pain (angina), blood pressure, and high cholesterol. In addition, its antioxidant activity makes it a great choice to support overall wellness and quality of life.

Ginkgo biloba contains high levels of flavonoids and terpenoids, antioxidants that provide protection against oxidative cell damage from harmful free radicals. It may also increase blood flow and play a role in the functioning of neurotransmitters in the brain.

A rich source of nutrients and antioxidants, **blueberry extract** contains beneficial plant compounds, including the flavonol quercetin, and anthocyanins, a class of compounds purported to reduce inflammation and protect against heart problems.

Coenzyme Q10

Item: 2177

Type/size: 60 vegetable capsules

Coenzyme Q10 will be indispensable if you're experiencing:

- chronic fatigue syndrome;
- physical and emotional exhaustion;
- arrhythmia, or hypertension;
- plaque buildup;
- metabolic disorders;
- or if you need to rehabilitate after a disease.

Ingredients:

- Coenzyme Q10 (Kaneka Q10®) 100 mg
- Other ingredients

Coenzyme Q10 is a vitamin-like compound that plays a role in the functioning of neurotransmitters in the brain. It participates in the formation of adenosine triphosphate (ATP), a universal source of energy in the body. With age, the body's production of coenzyme Q10 slows down, making supplementation necessary.

Coenzyme Q10 increases the body's energy potential and improves its antioxidant protection. The product uses an active form of coenzyme developed by the Japanese corporation Kaneka. The addition of MCTs (medium-chain triglycerides, a type of fat) from coconut oil and soluble inulin (a type of prebiotic) from chicory root increase the bioavailability and absorption of the product.

Main Components

The heart, liver, kidneys, and pancreas have the highest energy requirements and therefore they have the greatest need for Coenzyme Q10.

With age, the body gradually loses its ability to absorb a sufficient amount of Coenzyme Q10 from food alone and its synthesis in the body decreases. This is one of the causes of many age-related diseases.

Coenzyme Q10 is also important for the cardiovascular system, increasing the contractility of the myocardium (the heart muscle), improving blood flow, increasing physical endurance, slowing down the aging process, and protecting mitochondria from oxidation.

Coenzyme also stimulates the renewal of skin cells and helps maintain skin elasticity.

Studies have shown that Coenzyme Q10 is vital for various immune system functions. It enhances the activity of macrophages (specialized cells that detect and destroy bacteria) and increases the amount of antibodies in the body.

Coenzyme Q10 supplementation is included in many weight loss programs because it stimulates. In other words, excess body fat is broken down and used by the body as a source of nutrients and energy.

It should be noted that the Coenzyme Q10 does not start working instantly. Results begin to appear when optimal levels in the body are achieved – typically 2-4 weeks after starting supplementation.

Colostrum Plus

Item: 2171

Type/size: 120 vegetable capsules

Colostrum Plus helps:

- to strengthen immunity;
- to increase the body's resistance to various pathogens;
- to speed up regeneration processes;
- to protect and restore the mucous membranes of the digestive tract.

Ingredients:

- | | |
|---------------------------------------|--------|
| • Cow's colostrum | 250 mg |
| • Beta-glucans (beta-1,3/1,6-glucans) | 50 mg |
| • Other ingredients | |

Colostrum Plus is formulated to help strengthen and support immune health by combining the beneficial properties of colostrum and beta-glucans.* Colostrum is the very first nutrition of all mammals, including human beings. This substance protects newborns in their first days of life.

Bovine colostrum is also beneficial for the adult human body, as immunoglobulin G (IgG) is predominant and provides systemic immunity.

Colostrum is derived from cow's milk collected in the first few hours after calving, and is a source of valuable biologically-active substances - immunoglobulins, lymphocytes, lactoferrin, interleukins, and growth factors. It is rich in minerals, vitamins, enzymes, and contains Proline Rich Polypeptides, which are also called transfer factors. The unique composition provides the protective, regulatory and functional properties of colostrum.*

Main Components

Immunoglobulins, lactoferrin, and lysozyme protect the body from bacteria, viruses, fungi, and their waste products. Bovine colostrum contains 3 main classes of immune system proteins – immunoglobulins IgG, IgM, and IgA. At the same time, IgG immunoglobulin in colostrum is 70-80 times higher than that found in of normal cow's milk.

Transfer factors, or proline-rich polypeptides, are responsible for the important regulatory function of colostrum. They contain three substances that can both stimulate immunity and suppress the body's overactive immune response, thus preventing autoimmune reactions. The third substance is antigens that recognize various viruses and microbes. They transmit information to the body's cells, forming an immune immune memory, which can help to fight pathogens more quickly in the pathogens more quickly in the future.

The functional properties of colostrum provide various growth factors responsible for physical and mental ageing, promoting wound healing, tissue regeneration and controlling blood carbohydrate levels and fat metabolism.

Beta-glucans are naturally-occurring polysaccharides that help trigger the activation of immune system cells (macrophages, T-lymphocytes, NK cells or killer cells) and contribute to the body's defense mechanisms against pathogens. Beta-glucans may help to quickly recognize and destroy pathogenic microorganisms. They also support the body's resistance to various infections.

Coral Alfalfa

Item: 2102

Type/size: 120 capsules

Coral Alfalfa helps to prevent:

- vitamin deficiency;
- fatigue and irritability;
- a buildup of plaque;
- gout;
- insufficient lactation.

Ingredients:

- | | |
|--|--------|
| • Alfalfa (Medicago sativa) juice powder | 250 mg |
| • Alfalfa (Medicago sativa) leaf powder | 150 mg |
| • Other ingredients | |

Coral Alfalfa is a broad-spectrum preventive supplement. In addition to the alfalfa leaves, the new product contains the concentrated juice of the leaves, which significantly enhances its beneficial effects.

The Royal Herb occupies a special niche among medicinal herbs thanks to its herbs due to its wide range of benefits. These range from increased vitality to improved digestion and kidney function to detoxification and the treatment of to the treatment of stomach ulcers.

Main Components

The biologist Frank Bovuer discovered that green alfalfa contains eight essential amino acids, none of which are produced by the human body, and called it "the great healer". Since then, alfalfa has been shown to be a rich source of vitamins A, K, B1, B2, B6, E, D2 and D3; and minerals, especially calcium, phosphates and fluorine, saponins, isoflavones and many other biologically active components. Large amounts of vitamin K make alfalfa particularly effective in at stopping bleeding, which is why it is often used to treat used to treat all types of haemorrhage.

Alfalfa is one of the few plants that contain flourine, a substance which helps keep the teeth healthy.

This versatile herb helps treat various conditions of the stomach, such as bloating, ulcers, lack of appetite, and a number of others as it contains the anti-ulcer vitamin U. It helps regenerate damaged mucous membrane and normalizes the acidity in the stomach. As a derivative of methionine, vitamin U normalizes lipid metabolism, binds cholesterol, and blocks its absorption - thereby preventing the development of plaque buildup, reducing the amount of neutral fat in the liver, and improving cerebral circulation. Vitamin U is also able to neutralise a number of toxins and poisons, and has a marked detoxifying effect. Finally, it helps with depression.

Alfalfa also contains huge amounts of chlorophyll, which helps heal wounds, reduces the risk of bacterial infections, and prevents anemia.

It's especially beneficial for menopausal women and nursing mothers as it increases lactation and relieves anxiety.

The high fiber content makes it useful as a mild laxative. It is also a natural analgesic and diuretic.

Coral Artichoke

Item: 91640

Type/size: 90 capsules

Coral Artichoke has beneficial effects on the liver and general health:

- it stimulates bile production and excretion;
- reduces fat and lipid drainage in the liver;
- removes toxins from the body;
- produces a soft diuretic effect;
- normalizes metabolism;
- improves skin condition.

Ingredients:

• Artichoke (<i>Cynara scolymus</i>) herb extract	300 mg
• Milk Thistle (<i>Silybum marianum</i>) seed extract	40 mg
• Dandelion (<i>Taraxacum officinale</i>) root extract	20 mg
• Betaine HCl	50 mg
• Other ingredients	

The effect of the liver on the body is truly all-encompassing. There is not a single digestive, metabolic, or blood circulatory process that does not involve the liver. However, its first and foremost function is detoxification. Even a healthy liver will sometimes have a minor failure, having been exhausted by the excessive flow of toxins through it. The result of such minor failures can be various medical conditions, including such serious ones as hepatitis, fat steatosis, and cirrhosis.

Coral Artichoke is the ideal liver aid. It contains popular natural liver products (artichoke and safflower) and a range of active ingredients (dandelion, betaine and crushed coral).

Main Components

Artichoke is a valuable dietary product that has a pleasant nutty flavour. It's the favourite vegetable of Italian gourmets that use it extensively to make various sauces or home-made delicacies. However, artichoke's main selling point is its role in liver protection. The active ingredients it contains such as caffeic acid, silymarin, flavonoids, have a cleansing and choleric effect. They reduce the level of cholinesterase which reduces the liver's lipid output, resulting in a revitalising effect. In addition, artichoke speeds up the discharge of excessive liquid and various nitrogen compounds from the liver. Providing the body with various nutrients such as protein, vitamins A, C, B1 and B2, carotene, and a host of minerals. Artichoke keeps the skin in mint condition.

Milk thistle has long been recommended to people with various liver disorders as an effective means of dealing with the symptoms. Specialists recommend milk thistle extract as a preventive treatment for regions with ecological problems. The plant stimulates the formation of bile, the secretion and motor functions of the digestive tract, and improves the protective properties of the liver in the event of infections and poisoning; including chlorine, radiation, medication poisoning, and poisoning with such dangerous mushrooms as agaric fly and pale toadstool.

Dandelion is very popular in Europe. The bitter substances contained in it whet the appetite and improve digestion. They have choleric, diuretic, and laxative effects. Dandelion extract is one of the most valuable tonics available. It is of great benefit to people suffering from increased acidity, as it normalises the PH balance in the body.

Betaine is a compound that is biologically involved in the detoxification process of the body. It helps support normal lipid metabolism in the liver, supports healthy triglyceride levels, and may have a beneficial effect on the digestive system.*

Coral Black Walnut

Item: 91643

Type/size: 90 vegetable capsules

Coral Black Walnut helps with:

- Parasite Helminths;
- Bacteria;
- Inflammation;
- Constipation.

Ingredients:

- Extract of Black Walnut Leaves (*Juglans nigra*) 300 mg
- Extract of Oregano leaves (*Origanum Vulgare*) 50 mg
- Other ingredients

Black walnut (*Juglans nigra*) is the closest relative of the walnut and has an identical chemical composition. At the same time, black walnut is distinguished by its rich nutrient composition, which explains its healing properties. For example, the concentration of the most valuable substance, juglone, in the pericarp and leaves of the black walnut is 2-4 times higher than in the walnut itself, which means that the effects are significantly different.

Main Components

Black Walnut Leaf Extract fights worms and fungi of the *Candida* genus, and also helps to normalize stools

and improve bowel function. It has antioxidant and tonic properties. The healing properties of Black Walnut are due to the fact that this plant contains high levels of juglone, flavonoids, organic acids, unsaturated fatty acids, coumarins, glycosides, vitamins C, B1, P, essential oils and minerals.

Oregano leaf extract is a rich source of essential oils and tannins, as well as thymol and carvacrol - valuable substances that are effective against various types of parasites. In addition to anthelmintic properties, oregano helps to normalize digestion, as it stimulates intestinal motility, improves gallbladder functions and activates the secretion of the digestive glands.

Coral Boswellia

Item: 91846

Type/size: 90 capsules

Coral Boswellia helps:

- to support the musculoskeletal system;
- to strengthen bone and cartilage structure;
- to improve blood flow in muscles.

Ingredients:

- Boswellia extract (Boswellia serrata) 400 mg
- Other ingredients

Coral Boswellia is a product derived from the extract resin of the Boswellia tree, which helps fight inflammation of the musculoskeletal system.

Main Components

The resin of Boswellia species has been used as incense in religious and cultural ceremonies and in medicines since time immemorial. Boswellia serrata (Salai gugul/shallaki/ Indian incense) is a moderate to large-sized branching tree of Burseraceae family (Genus Boswellia), which grows in the dry mountainous regions of India. Boswellia, or Indian frankincense, is a resin herbal extract from the Boswellia tree. Natural health practices have used boswellia for centuries to treat various chronic inflammatory disorders.

Among all the nutrients, essential oils (camphene, pinene), gums, and palmitic acid, boswellic acid is the most valuable component due to its anti-inflammatory properties.

Scientists in India found that taking Boswellia has been effective in reducing swelling and pain in patients with rheumatoid arthritis. Its mechanism of action is similar to the mechanism of action of nonsteroidal anti-inflammatory drugs, but without their inherent side effects. The principle effect of boswellic acids on the

musculoskeletal system is that they effectively block the synthesis of leukotrienes, hormone-like substances, which are one of the main factors of inflammation in the spinal cord, cartilage, ligaments, connective tissue, and periarticular fluid. They also prevent the penetration of white blood cells (leukocytes) into the cartilage and joint fluid, thereby not only contributing to the weakening of the inflammatory reaction, but also directly reducing the degree of damage to the articular cartilage.

Boswellia is also valued for its strengthening effect on the structure of cartilage and bone tissue. Boswellic acids prevent the development of special enzymes that destroy cartilage and reduce the secretion of its structural components via urination; such as hydroxyproline, hexosamines, and uronic acid, thus slowing down the destruction of cartilage and accelerating the regenerative processes. This action of the plant is directly related to the reduction of pain and swelling of the joints.

Among other health effects, boswellic acids also improve blood flow to inflamed joint tissue tissues, help strengthen and restore damaged blood vessels, and facilitate access of blood and nutrients to the lesions.

Coral Burdock Root

Item: 91860

Type/size: 90 capsules

Coral Burdock Root:

- improves body detoxification;
- helps to reduce cholesterol level;
- reduces inflammatory and bacterial processes in the gastrointestinal tract;
- optimizes digestion and liver function.

Ingredients:

- | | |
|--|--------|
| • Burdock (Arctium lappa) root powder | 500 mg |
| • Burdock (Arctium lappa) root extract | 100 mg |
| • Other ingredients | |

Coral Burdock Root is a unique herbal supplement that consists of crushed root powder and an array of highly concentrated extracts of burdock root that help normalize metabolism. Due to its detoxification, diuretic, and blood purification irritation, it effectively removes toxins and pollutants.

Main Components

Burdock root has a high content of bioactive substances that have a diverse effect on the body. It contains inulin polysaccharide (more than 35%), natural sterols, fatty carboxylic (palmitic and stearic), hydroxycinnamic acids, tannins, bitterness, protein, and essential oils.

Burdock root contains high levels of inulin, which gives the plant a sweet taste. Inulin increases the deposition of glycogen in the liver and normalizes the insulin-producing function of the pancreas. It is therefore very useful for people with diabetes. Inulin also has prebiotic properties, which means that it has a positive effect on the gut microflora, encouraging the growth of beneficial bacteria.

Burdock oxycinnamic acids have anti-toxic, diuretic and blood cleansing properties. They help to increase the removal of diuretic acid, urea, ammonia and toxins from the blood, improve kidney function and increase diuresis. They also normalize water-salt metabolism and have a hepatoprotective effect.

Burdock active substances reduce inflammation in the gastrointestinal tract, protect the mucous membrane of the stomach and colon from irritation, and improve the secretion of gastric juice, promote healing of ulcerative erosions, reduce spastic pain and promote bowel release.

Burdock compounds increase bile secretion and increase the secretion of pancreatic enzymes. Because of this healing effect, burdock root can be used to treat for various eating disorders, abnormal liver and gallbladder function and gallbladder.

Burdock is also characterized by the presence of valuable plant compounds, such as stearins, sitosterol and stigmasterol. They are known as cholesterol antagonists. These substances regulate the metabolism of lipoproteins in the liver and small intestine, reduce the absorption of cholesterol in the the absorption of cholesterol in the intestine, thereby reducing its cholesterol in the intestine, thereby reducing its levels in the blood. At the same time, as substances, they prevent or hormonal disorders.

Burdock roots contain a number of essential oils and acids, known as antiseptics, which destroy pathogenic pathogenic bacteria in the gastrointestinal tract, which are known to cause dyspepsia, allergies and meteorism.

Coral Carnitine

Item: 91890

Type/size: 180 capsules

Coral Carnitine helps:

- maintain a healthy weight;
- with L-carnitine deficiency;
- support mitochondrial health and energy function;
- support cardiovascular health.

Ingredients:

- Acetyl-L-Carnitine 400 mg
- Other ingredients

Coral Carnitine supplement is recommended to boost one's energy and to improve immunity. The product enhances mental and physical performance and has fat burning effects.

Main Components

Carnitine plays an important role in energy production. Its name is derived from the Latin "carnus" or flesh, as the compound was commonly derived from meat. It transports long-chain fatty acids into the mitochondria to produce energy. Carnitine is concentrated in skeletal and cardiac muscle tissues that utilize fatty acids as dietary fuel. It is one of the best commonly

derived supporting heart health. Other health benefits of Acetyl-L-Carnitine, include improved memory in older people and help with fatigue symptoms.

Carnitine is present in almost every cell in the body. It plays a crucial role in energy production, as it is responsible for transporting fatty acids to the mitochondria. Mitochondria exist inside every cell in the body. They produce the energy cells need to function. It also transports the generated toxic compounds out of this cellular organelle to prevent their accumulation. Given these key functions, carnitine is concentrated in tissues like skeletal and cardiac muscle that utilize fatty acids as a dietary fuel.

Coral Cat's Claw

Item: 91642

Type/size: 60 capsules

Coral Cat's Claw:

- boosts immunity;
- reduces oxidization;
- reduces inflammation;
- reduces blood clotting;
- tones up the body.

Ingredients:

- | | |
|--|--------|
| • Cat's Claw (<i>Uncaria tomentosa</i>) bark extract | 300 mg |
| • Burdock (<i>Arctium lappa</i>) root extract | 100 mg |
| • Green tea (<i>Camellia sinensis</i>) leaf extract | 100 mg |
| • Other ingredients | |

Coral Cat's Claw strengthens the immune system and boosts the vitality of the body. It is based on a number of immunity boosters (Peruvian liana, green tea, and burdock root) that are indispensable in increasing the body's resistance to adverse environmental factors and reducing allergic reactions.

Main Components

The Peruvian liana has a number of unique properties. It grows in the mountains and rain forests of Latin America. The natives of Peru call it "cat's claw" for a reason. Its stem is studded with small spines resembling the claws of a cat. It is with these spines that it clings to the trunks and branches of trees. It was discovered in 1974 by Dr. Keplinger and since then it has quickly found its way from the Amazon jungle to pharmacies all around the world. The Peruvian liana is the only plant in its group that has a powerful immunity boosting effect, thanks to a number of powerful ingredients. They work together to activate the function of T lymphocytes and T killer cells, which destroy foreign particles, bacteria, dead or dying cells, and suppress the reproduction of viruses in the cell. They also normalise blood serum levels of particles responsible for

the humoral immune response, improve blood rheology, prevent platelet aggregation and reduce the risk of blood clotting in the vessels. Cat's Claw also strengthens capillaries and improves vascular tone.

Connoisseurs of Chinese culture believe that the delicate aroma of green tea improves the mood, reinvigorates, and prolongs life. **Green tea** is one of the healthiest drinks in existence as it is chock full of vitamins, antioxidants, minerals, essential oils, and amino acids. Vitamin P protects blood vessels from free radical damage, making them more elastic and flexible, and prevents cell oxidation, which slows down ageing. At the same time tea catechins inhibit a wide range of viruses and bacteria.

Burdock is very popular in traditional medicine. The root of the plant is especially valuable as it contains lots of biologically active ingredients, such as polysaccharides, salts of chromium, iron, phosphorus, magnesium, sodium, potassium, copper, linoleic, oleic, stearic and palmitic acids, and essential oils. All of these produce a very powerful antiseptic and antimicrobial effect, while also reducing inflammation and allergies.

Coral Kelp

Item: 91805

Type/size: 60 capsules

Coral Kelp produces positive effects on:

- endocrinal system;
- cardiovascular system;
- digestive system;
- intestine peristalsis and movements.

Ingredients:

- | | |
|--|--------|
| • Kelp (<i>Laminaria japonica</i>) extract | 180 mg |
| • Rose hips (<i>Rosa canina</i>) extract | 150 mg |
| • Ginger (<i>Zingiber officinale</i>) root extract | 20 mg |
| • Other ingredients | |

Coral Kelp – combines the powers of herbal plants and the sea to invigorate our bodies; helps to enhance blood vessels, cleanses the body from toxins and waste, supports the endocrine system, and help prevent premature ageing.

Main Components

Laminaria Japanese is a type of kelp from the Sea of Japan which is very beneficial to our health, youth, and beauty. Its popularity is explained by its rich composition. It contains amino acids, minerals (potassium, iodine, sodium, calcium, magnesium, serum, silica, iron, and phosphorus), vitamins A, C, E, K, D, B, proteins, alginates, polyunsaturated fatty acids and others. Laminaria is a source of fiber; thereby improves digestion, is effective in proctitis, enterocolitis, and atonic constipation. Sufficient amount of organic iodine helps to prevent thyroid diseases: endemic and exophthalmic goiter and hyperthyroidism. Laminaria prevents the formation of blood clots, reduces appetite and normalises weight.

Rose Hips are helpful for treating stomach and duodenal ulcers, gastritis with low acidity, gallstones, liver and kidney diseases. They contain 10 times more vitamin C than blackcurrant and 100 times more than apple. Rose hips are rich in vitamin P (which strengthens blood vessels), vitamin K (which increases blood clot-

ting) and B vitamins (which play an important role in regulating the functions of the nervous system). The plant is rich in pectin, organic acids, and flavonoids. Rose Hips improves tissue regeneration, hormones synthesis, enhances carbohydrate metabolism, normalizes redox processes, activates some ferments, stabilizes adrenalin content, and increases the body's resistibility against harmful influences of environment and infections.

Ginger, the fragrant spice, contains many healthy ingredients: vitamins A, C, B1, and B2, minerals (phosphorus, magnesium, calcium, iron, potassium, sodium, and zinc), essential amino acids (tryptophan, threonine, phenylalanine, methionine, and valine), essential oils, and other nutrients. Ginger is a powerful antioxidant: it lowers blood pressure and cholesterol levels, improves blood flow to the brain, strengthens blood vessels, prevents the formation of atherosclerotic plaque and improves memory. It also affects the endocrine system by stimulating thyroid activity, cleanses the body of waste and toxins or food poisoning, minimises inflammatory processes in the gastrointestinal system; improves appetite and the digestive system as a whole, increases metabolism by stimulating the process of burning calories, and activates intestine peristalsis facilitating food digestion.

Coral Lecithin

Item: 91650

Type/size: 120 capsules

Coral Lecithin can help with the following conditions:

- cardiovascular diseases;
- anxiety, fatigue, attention deficit, and memory impairment;
- low mental or physical activity;
- liver conditions;
- skin problems.

Ingredients:

- | | |
|-----------------------|---------|
| • Lecithin (from Soy) | 1200 mg |
| • Other ingredients | |

Coral Lecithin is a new high quality product manufactured as a separate Coral Club brand. It is one of the most versatile bioactive supplements. Lecithin is the basis of all cellular membranes in the human body and is used to rebuild damaged cells.

Main Components

The main components of lecithin are **choline and inositol**. They are vital for the normal functioning of the brain. Choline coordinates muscle contractions, mental activity, creativity, and memory. Inositol improves mood, behavior, and navigational skills. It also has a sedative effect, reducing anxiety and irritability.

Lecithin is indispensable for the proper functioning of the heart. It reduces the amount of cholesterol, improves blood flow and circulation. It can also indirectly affect blood pressure.

Lecithin actively regulates fat metabolism, breaking down fat into simple acids. As a consequence when

there is lecithin, lipids quickly get purged from the liver, which regenerates more quickly after damage caused by alcohol, nicotine, medications, narcotics, food preservatives, and dyes.

Lecithin also plays an important part in the immune system by restoring the function of lymphocytes and macrophages. It helps to enhance disease resistance through the production of additional antibodies, and stimulation of the activity and growth of phagocytes.

Lecithin is also one of the primary drivers of the reproductive function and is especially important for the proper development of the fetus and newborn babies.

Other benefits of benefits of Lecithin include antioxidant protection of the skin against free radicals. It also supports nutrition and detoxification processes, activates the lipid metabolism and stimulates the growth of new skin cells.

Coral Licorice Root

Item: 91641

Type/size: 100 capsules

Coral Licorice helps to produce favorable effects with:

- respiratory diseases;
- gastrointestinal tract diseases;
- adrenocorticotrophic hypofunction, acute and chronic pyelonephritis.

Ingredients:

- | | |
|---|--------|
| • Deglycyrrhizinated Licorice (Glycyrrhiza glabra) root extract | 300 mg |
| • Licorice (Glycyrrhiza glabra) root extract | 80 mg |
| • Ginger (Zingiber officinale) root extract | 20 mg |
| • Other ingredients | |

Coral Licorice Root – an anti-inflammatory and immunity normalization complex, expectorant, formulated on the basis of licorice and ginger extracts for rehabilitation and health support.

Main Components

Licorice is a valuable source of many helpful nutrients: saponins, glycyrrhizic and glycyrrhetic acids, flavonoids, mannitol, mucous substances, gums, ascorbic acid. For good reason, it is put on the same footing in its properties as ginseng in Chinese medicine.

Glycyrrhizic and glycyrrhetic acids possess hormone-like actions which produces antiviral, immunomodulatory, anti-inflammatory and expectorative effects. They induce formation of interferon by raising protective properties of mucous membranes. Glycyrrhizic acid plays a special role, as it is able to inhibit the initial stage of inflammatory processes thanks to its stimulating effect on the adrenal cortex. A major advantage of liquorice over corticosteroids is that it does not depress the adrenal cortex, but stimulates the production of its own hormones.

Saponins irritate mucous membranes of the upper respiratory tracts (trachea, bronchi) and also other organs, intensifying the secretion of their glands. That's why licorice is included into the composition of expectorants and remedies for coating and soothing

cough. Flavonoids have antispasmodic, wound healing and anti-inflammatory effects, reduce capillary fragility and help to form a protective film on the mucous membranes of the digestive system, improving the regeneration of damaged tissue.

Polysaccharides are involved in immune processes and have antibiotic and antiviral effects.

Ginger is an ancient spice and remedy. Its spicy composition has been appreciated by people in India, Japan and Australia for its anti-inflammatory, tonic and anti-stress properties.

Ginger has a beneficial effect on the digestive system by digestive system, helping it to cope with all types of dyspepsia (feeling of stomach, bloating, early satiety, flatulence), swelling in the epigastric region, nausea). Regular consumption of ginger stimulates digestion and improves gastric secretion.

Ginger blocks the action of prostaglandins, which cause inflammation of capillaries and joints and the growth of pathogenic bacteria in the gastrointestinal tract; it also lowers blood cholesterol levels.

It is very useful for boosting the immune system. Liquorice contains essential vitamins, minerals, essential oils and amino acids that have a powerful stimulating and toning effects and mobilises the body's inner forces.

Coral Magnesium

Item: 91881

Type/size: 90 capsules

Coral Magnesium should be used for the prevention of:

- cardiac arrhythmias;
- high blood pressure;
- stroke and heart attack.

Ingredients:

- Magnesium (as taurate and bisglycinate) 150 mg
- Other ingredients

Coral Magnesium is an important product, especially for the cardiovascular system. It is a leading activator of the neuromuscular stimulation. The product strengthens the energy potential of the heart muscle, ensuring a stable heart rhythm and regulating the integrity of blood vessels.

Main Components

Magnesium is one of the most common chemical elements in the world. It is found in animals and plants such as some types of sea weed. In humans, the largest amounts of magnesium are found in bone tissue, a third in the muscles and the rest in body fluids. Vegetarian foods are particularly rich in magnesium: legumes and cereals, spinach, salads, and nuts. Water is also an important source of magnesium and the harder the water the more magnesium it contains. Regions with soft water usually have a high incidence of hypomagnesemia (low magnesium content in the blood serum).

An adequate level of magnesium in the body supplies vital processes with energy; keeps the muscles smooth (blood vessels, bowel, gallbladder, and bladder, etc.) and toned. Magnesium stimulates protein

production, regulates the storage and release of ATP, and reduces nerve cell stimulation. Magnesium is also known for its anti-stress properties: a person who has enough magnesium in their blood will have a positive mental attitude.

In traditional medicine magnesium is valued first of all as an antihypertensive, antiarrhythmic agent. Arrhythmias are often caused by magnesium deficiency, and the condition can be stabilised by giving the person extra magnesium. Magnesium also plays an important role in the proper functioning of the heart, regulating the balance of sodium and calcium in the heart cells, reducing the contractility and stimulation of the heart muscle, reducing the heart rate and therefore the heart's need for oxygen. It also has a beneficial effect on the blood vessels, increasing their lumen and stimulating coronary blood flow.

Magnesium helps regulate blood clotting, maintains healthy blood vessels, and prevents the formation of cholesterol plaques.

Magnesium strengthens the immune system, and helps the body recover after exercise.

Coral-Mine

Item: 2221/2220

Type/size: 10/30 sachets

When they come into contact with water the Coral-Mine minerals help to:

- achieve an optimal PH level;
- prevent osteoporosis and various forms of arthritis;
- increase the elasticity of muscles and restore the structure of bones and cartilage;
- regulate kidneys and the digestive system;
- improve the condition of the skin.

Ingredients:

• Powdered coral	995 mg
• L-Ascorbic acid	5 mg

Coral-Mine is made in Japan from deep-water scleractinian coral fossils that grow in the Sea of Japan off the islands of Okinawa and Tokunosima.

Coral is a unique substance which has achieved a perfect harmony of its animal, plant and mineral origins over 500 million years of evolution. A coral is a sea animal with a strange shape reminiscent of seaweed, which feeds on sea salt and marine microbodies.

Main Components

The skeleton of a coral is made up of mineral salts which are at the heart of coral's effect on the human body. These salts are primarily calcium and magnesium, but in addition to these two there's also potassium, sodium, iron, phosphorous, silicon, sulfur, chrome, manganese, zinc, and many others. This rich multitude of minerals regulates bodily functions and makes all the systems run like clockwork.

Calcium and phosphorous are the building blocks for bone tissue and all other connective tissues. They sup-

port the heart and improve nerve conductivity, insuring proper flexing of muscles and increasing the permeability of cell membranes, which normalizes the blood clotting process.

Magnesium helps calcium by freeing up ATP and increasing the body's energy potential. It makes the heart beat rhythmically and tones up the smooth muscles in the blood vessels, intestines, the gall bladder, and the urine bladder. A good balance of calcium and magnesium in the body keeps calcium in the bone tissue, preventing bones from going soft.

Sodium regulates osmotic pressure, fluid and protein metabolism and is needed to maintain proper excitability of muscles and nerve cells. It is also required for the sodium-potassium pump, which regulates cellular metabolism.

Potassium is the main intercellular cation that maintains the PH balance, ensures proper muscle and nerve conductivity, keeps blood pressure in check and removes excess fluid from the body.

Coral Taurine

Item: 2101

Type/size: 60 capsules

Coral Taurine:

- improves circulation and metabolism in the heart muscle;
- improves eye health;
- normalizes metabolism;
- has antioxidant properties.

Ingredients:

- Taurine 600 mg
- Other ingredients

Coral Taurine is a highly bioactive amino acid that is necessary for overall health. This is shown by the fact that taurine is found in almost every vital organ of the body, regardless of a person's age.

Main Components

Taurine is vital for a person's overall health. It is one of the most abundant amino acids in the muscle tissue, brain, and many other organs in the body. Sources of taurine are entirely of animal origin (meat, eggs, milk, fish, and seafood). In the human body, taurine is a derivative of another amino acid called cysteine, and its synthesis significantly decreases with age. That is why vegetarians should take measures to maintain their taurine levels.

Taurine helps to stabilize and protect the work of cellular membranes by regulating the transport of nutri-

ents and electrolytes through them. For example, it regulates the ion flow through cell membranes in the heart. It can regulate (reduce or increase as needed) the levels of calcium and magnesium in cells and sodium in the body in general.

Taurine is found in almost every vital organ of the body, regardless of a person's age. Taurine is found in very high concentrations in brain tissue.

Taurine makes up 40-50% of the amino acids, which are found in the retina and over 50% of the amino acids that are found in the heart muscle. Taurine is one of the main constituents of bile. High levels of taurine are found in lymphocytes, leukocytes and platelets - white blood cells that help to that help protect our bodies.

D-Spray/D-Spray 2000

Item: 2179/2197

Type/size: 10 ml (170 doses)

Vitamin D3:

- strengthening the immune system;
- normalization of carbohydrate and lipid metabolism;
- maintaining nervous, cardiovascular, and reproductive system functions;
- improving memory and attention.

Ingredients:

- | | |
|--|-----------------|
| • Vitamin D3 (as Cholecalciferol) | 10 mcg (400 IU) |
| • MCT Coconut Oil | |
| • Tocopherol-rich Extract (from vegetable oil) | |
-
- | | |
|--|------------------|
| • Vitamin D3 (as Cholecalciferol) | 10 mcg (2000 IU) |
| • MCT Coconut Oil | |
| • Tocopherol-rich Extract (from vegetable oil) | |

D-Spray/D-Spray 2000 is Vitamin D3 in spray form. Vitamin D3 plays an essential role in maintaining healthy metabolism and promoting the absorption of calcium, magnesium, and phosphorus. It also helps ensure proper musculoskeletal system function, strengthens the immune system, reduces the likelihood of frequent colds; and supports the work of the nervous, cardiovascular, and reproductive systems. The fat-soluble form of vitamin D3 is absorbed naturally and quickly. The spray form provides a fine dispersion which facilitates the penetration of the vitamin into the bloodstream and increases the absorption area.

D-Spray is suitable for the whole family - children 4 years and up, adults, and women who are pregnant or breastfeeding.

D-Spray 2000 is suitable for those who are recommended to take higher doses of vitamin D.

Vitamin D3

Vitamin D3 is a very important biologically active substance for the body. It is synthesized in human skin cells under the influence of ultraviolet rays, and also enters the human body via food. However, people all over the world suffer from vitamin D3 deficiency. This is the result of the lack of sufficient sunlight in certain latitudes, the deterioration of the environment (an increase in smog and dust in cities), nutrient-poor

food, and even an increase in the use of sunscreen. Maintaining optimal vitamin D3 levels is especially relevant for residents of middle and northern latitudes, children and adolescents, women who are pregnant or breastfeeding, and the elderly.

It is difficult to get enough vitamin D3 from food alone because it is only found in certain animal products, such as egg yolks, certain types of fish and mushrooms. Therefore, taking an additional source of vitamin D3 is advisable regardless of the time of year. This is especially true for those who suffer from frequent illnesses, metabolic disorders, excess weight, regular pain in joints and muscles, and diseases of the intestines, liver, or kidneys.

D-Spray/D-Spray 2000 is a vitamin D3 spray. This form has several advantages:

- guarantees an accurate dosage;
- one dose provides the entire daily intake;
- 170 doses per bottle – enough for the whole family;
- the dark glass protects against oxidation;
- does not need to be refrigerated;
- does not need to be washed down;
- the small bottle is convenient for on-the-go.

Daily Delicious Beauty Shake

Raspberry/Vanilla/Chocolate/Orange-Mango

Item: 211600/213600/211500/213500/211700/213700/211800/213800

Type/size: 500 g/25 g

Daily Delicious shakes help:

- to provide our bodies with protein, which is a major component of cells and tissues;
- to support overall health, keep your skin elastic and firm, hair lustrous and nails strong;
- to normalize vitamin and mineral balance in the body;
- to increase your stamina and overall vitality.

Ingredients:

Milk protein 7,25 g, whey protein concentrate 4,2 g, soy protein isolate 3 g, magnesium (citrate) 50 mg, collagen hydrolyzate 250 mg, vitamin C (ascorbic acid) 145,5 mg, PABA (para-aminobenzoic acid) 25 mg, vitamin E 4 mg, selenium (selenomethionine) 50 µg, pantothenic acid 4 mg, copper (gluconate) 0,5 mg, vitamin A 367,25 µg, folic acid 128,5 µg, biotin 41 µg, nicotinamide 4,75 mg, other ingredients.

Daily Delicious Beauty Shakes with orange & mango, chocolate, raspberry and vanilla flavours are a great source of protein, collagen, vitamins and minerals. It is the right and delicious way to improve your health and fill you up with beauty and overall vitality.

Main Components

Collagen is the main building block of skin, muscles, hair, and nails. Skin contains up to 70-80% collagen. Collagen hydrolysate, found in our shakes, is a form of animal collagen made up of three peptides (amino acids): lysine, proline, and hydroxyproline. It's special in that it has a low molecular weight, is easily digested. Collagen provides protein nutrition to the skin that may help prevent signs of premature aging.

Milk protein is an essential element of diet. Cells and tissues of the body are formed only from dietary protein. Proteins continuously to key body functions and it is very important continuously add to your diet foods that contain protein. Especially immediately after a full night of sleep or a tiring workout, the body has little to no protein available to rebuild tissue, we need to ensure that the body has an adequate supply.

Soy protein isolate is a food product that is not only rapidly absorbed, but contains up to 90% vegetable protein. Nutritionists recommend soy isolate to people whose bodies have difficulty digesting casein protein or unable to tolerate lactose.

In addition, soy protein is preferred by those who are actively involved in sports and lead a healthy lifestyle.

Soy isolate is rich in many essential and nonessential amino acids; it combines perfectly with milk protein. Together they help to qualitatively enrich the diet of older people and people with poor health, compensate for potential protein deficiencies and improve overall health.

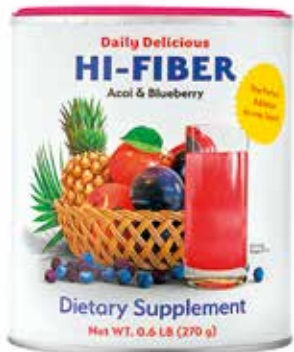

Vitamins A, C, E, B3 (PP), B7, B9, and the minerals magnesium, copper, and selenium participate in the metabolic processes of converting carbohydrates, protein, and fat into energy. Vitamins and minerals improve digestion, support skin and muscle health, and aid the body in the synthesis of its own collagen.

Daily Delicious Hi-Fiber

Acai & Blueberry

Item: 2103

Type/size: 270 g

Daily Delicious Hi-Fiber helps:

- to maintain a healthy microflora balance in the intestine;
- to improve digestion;
- to lower cholesterol and blood sugar levels;
- to control weight.

Ingredients:

Apple fibre, inulin, guar gum, gum arabic, sodium carboxymethyl cellulose, rice bran, currant flavor, blueberry flavor, cherry flavor, red beetroot powder, citric acid, L-glutamine, glucomannan, pineapple fruit powder, blueberry fruit powder, acai berry extract, apple pectin, steviol glycosides, silicon dioxide.

Daily Delicious Hi-Fiber is a balanced source of dietary fiber with a pronounced berry flavour. It is a balanced combination of different fiber types and active components that supply our body with enzymes, amino acids, vitamins and minerals. It contains Aloe Vera gel and Glutamine, which are effective in restoring and normalizing intestinal functions.

Main Components

Soluble fiber (apple fiber and apple pectin, guar gum, gum arabic, inulin, glucomannan) forms a jelly-like mass that absorbs a large amount of water, protects the mucous membrane of the stomach and intestines, facilitates the removal of toxins and slags from the body. It also gives you a feeling of satiety, which helps prevent overeating.

Insoluble fiber (cellulose, rice bran) activates laxation, accelerates digestion. It improves metabolism and facilitates assimilation of vitamins, minerals and other nutrients.

Glutamine is conditionally an essential amino acid, which enables protein production and is necessary for sustaining bowel action, especially when the mucous membrane is damaged.

Aloe Vera Gel protects the stomach from irritation, improves digestion and gastrointestinal tract functions. Helps normalise digestive functions, protects the gastrointestinal lining and improves absorption of nutrients from food.

DHA + D3 Smart chews

Item: 2304

Type/size: 30 individual chews

DHA + D3 smart chews:

- These are essential omega-3 acids with vitamin D3
- No fishy taste or smell
- Increased bioavailability and stability
- Produced in Norway

Ingredients:

• Fish oil	720 mg
Omega-3	482 mg
DHA (Docosahexaenoic acid)	360 mg
EPA (Eicosapentaenoic acid)	72 mg
• Vitamin D3	12 mcg

The "intellectual age of the brain" is determined by a person's ability to learn, i.e. to acquire new knowledge. That's why it's important for children and adolescents to develop the ability to pay attention and memorize what they have read or heard, while adults should try to maintain these skills throughout their lives. Much of the information we receive daily is visual, so our body's nervous system and organs must withstand considerable stress during school, work, and even while resting.

DHA + D3 Smart chews were especially created to help develop the intellect, nervous system, and organs for those on that honors path, no matter the age.

How the active ingredients work:

Omega-3 polyunsaturated fatty acids (PUFAs) are an essential component of our diet: they are not synthesized in the human body and, therefore, must be regularly obtained from food. Omega-3 PUFAs are most often found in fatty fish (like tuna, cod, herring, trout, and mackerel), seafood, and, to a much lesser extent, plant sources, like flaxseed oil, which is high in omega-3 PUFAs. Fish is becoming less common in today's modern diet, so finding a substitute to omega-3 PUFAs is becoming more important.

The most important omega-3 fatty acids are **DHA (docosahexaenoic acid)** and **EPA (eicosapentaenoic acid)**. Studies related to their properties have shown that DHA supports and builds intellectual capacity during childhood and adolescence periods. It helps us learn information more easily and efficiently and also helps us be more attentive when studying. In addition,

DHA is continuously involved in the nervous system and organs throughout our lifetime. The important role of DHA for brain health and the nervous system is proven by the fact that the gray matter cells of the cerebral cortex in a healthy person contain about 13% DHA, while the retina contains up to 20%, which means the retina has the highest concentration of DHA in the human body.

Vitamin D3

Vitamin D3 is produced in the skin by exposure to sunlight and is essential for healthy bones and teeth, as well as a healthy immune, nervous, reproductive, and cardiovascular systems.

Sunscreens, air pollution and dust greatly reduce the amount of UV rays our skin absorbs. Therefore, deficiencies of this vitamin are common not only in northern latitudes that get less sun but also in sunny countries. It is particularly important to get enough vitamin D3 during childhood.

The product was created using **ConCordix technology**, reproducing the distribution of drops of fish oil in cold-water fish. The idea behind the technology is that the active ingredient is divided into tiny droplets, each of which is placed in a separate gelatin cell that protects them from sticking together and premature oxidation. It has been proven that fat-soluble substances from chews, created with ConCordix technology, are absorbed 44% better.

Evening Formula

Item: 91832

Type/size: 60 capsules

Evening Formula helps:

- to cope with stress and increases stamina;
- to relieve symptoms of depression and chronic fatigue;
- to normalize the emotional state;
- to fight insomnia and improves mood.

Ingredients:

• L-Theanine	100 mg
• Lemon balm (<i>Melissa officinalis</i>) leaf extract	100 mg
• Hops (<i>Humulus lupulus</i>) flower extract	100 mg
• St. John's wort (<i>Hypericum perforatum</i>) herb extract	100 mg
• Scullcap (<i>Scutellaria baicalensis</i>) root extract	50 mg
• Other ingredients	

Evening Formula is a dietary supplement that helps to cope with stress, depression and normalize the sleep pattern. The ingredients of Evening Formula are carefully selected to go beyond protecting the nervous system from the consequences of stress. They also work to improve mood and act as a general tonic.

Main Components

L-Theanine is an amino acid found naturally in the tea plant. Theanine helps the CNS recover following emotional overloads, improves the mood, and leaves you feeling calm and relaxed.

Lemon Balm is a well-known sedative supplement that helps to manage excitement, reduce vascular spasms, can help stimulate memory and enhance mood.

The hop plant is known botanically as *Humulus lupulus*. Hops encourages restful sleep, especially for those who have trouble falling asleep.

St. John's wort is most commonly used for depression and symptoms that sometimes go along with moods such as nervousness, tiredness, poor appetite, and trouble sleeping. St. John's wort may be an effective all-natural remedy for insomnia and anxiety.

Magnesium is a stress-fighting element, it slows down CNS excitement, reduces nerve and muscle spasms and susceptibility to neuroses.

Skullcap is the common name for *Scutellaria*, a genus of flowering plants in the mint family. Some of the most important health benefits of Skullcap include its ability to reduce anxiety, balance hormones, and help with sleep issues.

FanDetox

Item: 91663/9167500

Type/size: powder 10/30 stick packs

FanDetox helps with different problems and improves the way you feel:

- from hepatitis and hepatosis;
- from poisoning, as it breaks up toxic products in hypatocytes enhances lipid metabolism, lowering blood cholesterol levels;
- it is a unique plant drink which relieves alcohol withdrawal syndrome and all its unpleasant symptoms: general weakness, headaches, giddiness, nausea, tremors, tachycardia, hyperhidrosis, and insomnia.

Ingredients:

Glucose 1,54 g, Persimmon (*Diospyros kaki* thunb) fruit extract 0,28 g, Citrus (*Citrus unshiu*) peel extract 0,21 g, Goji (*Lycium chinensis*) berry extract 0,21 g, Buckwheat (*Fagopyrum esculentum* moench) extract 0,21 g, Soybean (*Glycine semen Germinatum*) sprout extract 0,07 g, Taurine 0,05 g, Vitamin C (Ascorbic acid) 0,01 g, Other ingredients.

FanDetox is a product developed by the Korean scientist Song Khe Bock to protect the liver from toxic effects of alcohol, medicines, low-quality food, and other harmful substances. The product is based solely on plant extracts. Persimmon, goji berry, citrus peel, buckwheat seeds, and soy bean sprouts produce fast effects on the body.

Main Components

Persimmon has more nutrients than grapes or figs. It is a source of vitamins C, P, and A, apple and lemon acids, minerals, and plant sugars of glucose and fructose to increase vital resources of the body. These sugars are needed for glycogen formation in the liver and its energetic nutrition.

Goji berries enhance digestion, produce general health improvements, with antioxidant and toning effects. The plant contains betaine, which improves metabolism, assists in production of alcohol dehydrogenase, and aldehyde dehydrogenase, which in turn normalize bile excretion and lipid metabolism in the liver, and also neutralize toxic substances including alcohol waste products.

Citric peel extract contains a large amount of flavonoids, which have an antisclerotic effect. When they

get into the body they accelerate the decaying process of low-density lipoproteins and normalize general cholesterol levels and protect vitamin C from oxidative destruction.

Buckwheat's high levels of flavonoids, organic acids and lecithin have a beneficial effect on the digestive, cardiovascular and nervous systems, helping to restore damaged liver tissue and eliminate excess lipids.

Soy is rich in biologically active substances: proteins, vitamins (E, PP, H, and B-group), minerals, lecithin, and fibers.

Dextrine is a well assimilated product of partial decomposition of polysaccharides: starch and glycogen. It is stored in liver cells and is considered to be a quick energetic reserve for their nutrition and increased performance.

Vitamin C is an essential participant of collagen synthesis; it strengthens blood vessel walls, prevents the accumulation of oxidized forms of cholesterol and protects the body from toxins.

FlexiCor can help alleviate various disorders of the musculoskeletal system:

- arthritis and arthrosis;
- osteoporosis;
- osteochondrosis;
- injuries, muscle strains, and traumas.

Ingredients:

• Vitamin C (ascorbyl palmitate)	50 mg
• Manganese (manganese gluconate)	0,3 mg
• Bamboo (<i>Bambusa vulgaris</i>) extract	7,5 mg
• Glucosamine HCl	300 mg
• Chondroitin sulfate	250 mg
• MSM (methylsulfonylethane)	200 mg
• Other ingredients	

FlexiCor can help with existing problems of the musculoskeletal system or prevent potential future problems. This well-balanced combination of two complementary active ingredients is designed to restore musculoskeletal function, strengthen bones and joints, as well as prevent the destruction of bone, cartilage, and connective tissue; it also substantially reduces pain and joint stiffness restoring the mobility and ease of walking.

Main Components

Glucosamine is a building material for connective tissue, bones, and cartilage. It is the primary component of intra-articular fluid, which serves as a "lubricant" for the joints and reduces friction and abrasion of cartilage. Glucosamine protects articular cartilage from inflammation and destruction, and stimulates chondroitin production to strengthen bone and cartilage tissues. It minimizes hypersensitivity and pain in joints and spine, both at rest and during exercise.

Chondroitin sulphate, the main structural component of cartilage, plays a crucial part in building bone, cartilage, ligaments, as well as in maintaining resilience and elasticity of the vascular walls. It reduces the leeching of calcium from bones, accelerates calcium-replenishment processes, and inhibits degenerative processes in the cartilage by suppressing the

activity of specific enzymes (for instance, interleukin-1 that destroys articular cartilage). Chondroitin is capable of retaining fluid inside the cartilage in the form of water cavities, which provide a good cushioning effect and absorb impact shock, increasing cartilage strength and integrity.

MSM takes an active part in building collagen and keratin, which maintain the elasticity and mobility of the joints; it reduces inflammation, helps restore flexibility and permeability of the cell walls, facilitating the passage of nutrients into the tissues.

Vitamin C is a necessary component of collagen production. Working with MSM, it increases permeability of capillary walls, improves bone and skin structure, stimulates assimilation of glucosamine, activates production of antibodies, and fights infections that cause joint inflammation.

Manganese is necessary for production of intrinsic chondroitin; it normalizes mineral metabolism and assists in calcium assimilation accelerating cartilage self-repair.

Bamboo is a source of silica, one of the most important microelements, which stimulates the production of hyaluronic acid and chondroitin. It restores resilience and elasticity of collagen and elastin fibers, as well as the destruction of bone and cartilage.

Garlic Extract

Item: 2151

Type/size: 90 vegetable capsules

Garlic Extract:

- supports cardiovascular health;
- has a positive effect on intestinal bacteria;
- helps to destroy pathogenic bacteria in the GI tract;
- supports immune system and reduces your chances of catching a winter sniffle;
- reduces cholesterol levels.

Ingredients:

- Garlic (*Allium sativum*) bulb extract 200 mg
- Other ingredients

Garlic is a valuable plant taken as food. A vivid demonstration of this fact is that a plant can be a source of food and medicine at the same time. Its curative properties were described by Dioscorides back in the 1st century A.D.

Garlic's main virtue is its high content of essential oils, which have powerful antibacterial properties. Garlic has long been used to combat dental plaque, influenza, gastric and intestinal atony, dyspepsia, meteorism and bronchopulmonary diseases.

Main Components

Its bulb and leaves contain glycoside alliin, carbohydrates, phytosterols, ethereal and fatty oils, inulin, vitamins C, B, D, and PP, organic acids, minerals: (selenium, potassium, calcium, magnesium, copper, iron, manganese and zinc), as well as cobalt, chrome, molybdenum, bromine, and lithium.

Garlic is one of the most popular agents for preventing colds. It stimulates the human immune system by increasing antibody production and phagocytosis. Garlic's phytoncides intensify its inhibitory effect on malignant bacteria.

The glycoside alliin is a specific substance of garlic and the source of its specific scent. Thanks to allin

and alliin – volatile fractions of garlic – this plant has the most powerful antimicrobial, antifungal, and anti-helminthic effects. The above-mentioned glycosides suppress various kinds of microbes, bacteria, fungi, and parasites, prevent fermentation and putrefaction processes in the bowel without disturbing the natural flora of the body, and increase bile production. They can suppress propagation of *Helicobacter pylori*, this is why garlic is used to treat gastric and duodenal ulcers. It is also useful in treating colitis, gastritis, helminthic infection, and intestinal atony.

Garlic normalizes the level of cholesterol in the blood, reducing it by 9% and increasing the level of high-density lipoproteins. It prevents thrombocyte adhesion, regulates vascular tone, and reduces arterial tension. It is a perfect agent to treat plaque buildup, hypertension, and to prevent stenocardia.

Garlic also protects the body from free radicals. It contains a sufficient amount of selenium, which binds free radicals and reduces cell oxidation, regulates permeability of cell membranes, neutralizes the toxic effects of radio nuclides and heavy metals, and thus it is recommended for persons working with ionizing radiation or live in ecologically unfriendly places.

Ginerra

Item: 2303

Type/size: 60 vegetable capsules

Ginerra can help:

- Restore and protect gastrointestinal mucosa
- Alleviate unpleasant symptoms (heartburn, belching, nausea, upper abdominal fullness, stomach growling, flatulence, and stool irregularities) after meals
- Improve digestion and absorption of nutrients

Ingredients:

- Mucosave®FG (Opuntia ficus indica cactus cladode extract and Olea europaea olive leaf extract) 200 mg
- L-glutamine 50 mg
- deglycyrrhized licorice root extract (Glycyrrhiza glabra L.) 75 mg
- Other ingredients

Approximately 40% of otherwise healthy adults experience gastrointestinal discomfort, which may manifest as heartburn, belching, a sensation of heaviness in the upper abdomen, nausea, bloating, and irregular bowel movements. Gastrointestinal tract mucous lining is integral to digestive health, offering protection against stomach acids, infections, mechanical trauma, and thermal injuries. It also facilitates the production of gastric and intestinal juices. Furthermore, the microvilli of the intestinal mucosa serve to increase surface area for nutrient absorption.

Ginerra combines plant extracts with the amino acid L-glutamine to help alleviate symptoms of dyspepsia and gastrointestinal discomfort, while also promoting digestion.

Main Components

Mucosave®FG, a key component, features a synergistic blend of Opuntia cactus cladode and olive leaf extracts. Sourced from the sun-drenched climes of Southern Europe, particularly Sicily, these plants have traditionally been used to support gastrointestinal health. Opuntia cladodes are rich in polysaccharides that assist in forming a gel-like substance, thus es-

tablishing a protective lining for the stomach and intestines. Olive leaves contain polyphenols, known to help moderate inflammatory processes and provide soothing effects. Clinical studies have evidenced the efficacy of Mucosave®FG in alleviating gastrointestinal discomfort in healthy adults suffering from gastroesophageal reflux (GER).

The licorice root, widely used for its health benefits in China, India, Tibet, and Egypt for centuries, contains **deglycyrrhized licorice root extract**. This extract boasts a rich array of flavonoids, which positively impact the digestive system by reducing dyspepsia symptoms, controlling Helicobacter pylori growth, averting ulcer formations, modulating intestinal functions, and providing protection against oxidative stress.

L-glutamine, an amino acid, is the primary energy source for gastrointestinal mucosa cells. It facilitates healing and fortifies barrier functions. Additionally, L-glutamine boosts gastric juice secretion, stimulates the proliferation of beneficial intestinal bacteria, and aids in maintaining normal intestinal functions.

Gotu Kola Extract

Item: 2149

Type/size: 60 vegetable capsules

Gotu Kola Extract is good for those, who:

- have atherosclerosis;
- have memory issues;
- have chronic fatigue, neurosis, depression;
- have vegetative-vascular dystonia;
- have phlebeurysm.

Ingredients:

- Gotu Kola (*Centella asiatica*) herb extract 120 mg
- Other ingredients

Gotu Kola Extract is based predominantly on the Gotu Kola plant. It activates cerebral circulation, improves mental clarity, memory, and cardiovascular system functions.

Main Components

Gotu Kola helps to strengthen blood vessel walls and increase their elasticity. It has a positive effect on capillary and cerebral blood flow. These phytochemicals may prevent thrombosis by inhibiting blood clotting. Gotu Kola has a positive effect on some blood components and stabilizes haemoglobin levels and blood sugar.

Triterpenoid saponins found in the herb participate in the formation of collagen, which leads to lower blood pressure.

The Flavonoids in the plant help to stabilize the cardiovascular system during stress, and enhance blood flow by expanding the coronary arteries that bring more oxygen-rich blood to the heart muscle.

Cardiac glycosides are organic compounds that increase the force of the heart and increase the rate of contractions. Glycosides regulate the function of the heart muscle.

Gotu Kola's triterpenes provide an additional detoxifying effect by stimulating the functions of cytochromes, which ensure the elimination of toxic substances and drugs from the body.

Griffonia

Item: 91848

Type/size: 60 capsules

Griffonia helps to relieve:

- depression;
- sleep disorders;
- various neuroses;
- chronic fatigue syndrome.

Ingredients:

• Vitamin B6 (as pyridoxine HCl)	2 mg
• Vitamin B12 (as methylcobalamin)	3 mcg
• Griffonia (Griffonia simplicifolia) seed extract	50 mg
• Other ingredients	

Griffonia is an essential product for optimising the functioning of the central and peripheral nervous systems. The tropical plant Griffonia and group B vitamins create a synergy that improves brain function, normalises sleep cycles, helps cure dystrophy and reduces anxiety and depression.

Main Components

Griffonia is an exotic plant from Western and Central Africa. Its seeds are the most valuable part of the whole plant as they contain natural 5-hydroxytryptophan (5-HTP). This amino acid is a precursor to serotonin, one of the most important serotonin neuromediators. 5-HTP molecules easily penetrate brain cells and turn into serotonin. Research has shown that 5-HTP is as effective as synthetic antidepressants. Griffonia with vitamin B6 increases the body's production of endorphins, improving mood and normalising all stages of sleep, from falling asleep to REM and deep sleep. 5-HTP has been used in Europe for many years to improve memory and combat depression. 5-HTP also suppresses appetite, reducing the craving for carbohydrate foods. In addition, this amino acid successfully relieves PMS symptoms by helping women to feel less depressed, reducing anxiety and emotional instability;

along with the irritability characteristics that often occur in the last week of the ovulation cycle.

Vitamin B6 plays a key role in normalising the functions of the central and peripheral nervous systems, contributing to the synthesis of important neuromediators and vitamin B12. A number of studies have shown that vitamin B6 is a highly effective anti-depression treatment: it helps the brain absorb important amino acids (tryptophan, cysteine, and methionine) and the production of antipsychotic hormones such as serotonin and norepinephrine. Demand for this vitamin increases when a person is taking antidepressants and oral contraceptives, and during periods of stress and emotional strain.

Vitamin B12 – The level of vitamin B12 affects a broad range of emotional and cognitive abilities. Vitamin B12 prevents depression, dementia, helps overcome insomnia by normalising the sleep cycle. These effects are the result of the fact that cyanocobalamin participates directly in the synthesis of melatonin. At the same time, a deficiency of this vitamin can lead to the development of peripheral neuritis, optic nerve atrophy and degeneration of bone tissue and the spinal cord.

H-500

Item: 91800/91883

Type/size: 60/120 capsules

H-500 is the source of:

- vital force;
- physical endurance;
- mental capacity for work.

Ingredients:

- H-500 Proprietary Blend 300 mg
(Potassium citrate, Magnesium citrate, Potassium ascorbate, Silicon dioxide, Boron)
- Other ingredients

H-500 contains bioavailable forms of essential minerals. It provides multipurpose effect on almost all metabolic processes of the body and helps to restore acid-based balance. This product has beneficent effect on all organs and systems of the body, improving both physical and mental health.

Main Components

H-500 is the source of vital force, endurance, physical and mental work capacity.

H-500 enhances endurance during any physical activities, sport exercises and hard work. Both the buildup of lactic acids and consequent recovery times will be greatly reduced when using H-500. With such positive effect the product can be recommended to people do-

ing intellectual or laborious jobs, sportsmen and activity-lovers as it helps to withstand overwork, relieve overexertion and increase muscle tone and elasticity.

This product increases the body's energy potential by stimulating the production of cell energy, which is formed by breaking up of protein and carbohydrate food. This is very important for your overall health, normal physical and mental functionality. The product improves metabolism and helps to resist many unfavorable factors.

H-500 prevents oxidation of healthy cells and restores a favourable alkaline environment. This helps to improve cell nutrition and metabolism.

Iron

Item: 2123

Type/size: 60 vegetable capsules

Iron helps to:

- prevent anemia;
- regulate tissue respiration and metabolism;
- prevent skin diseases;
- improve the condition of the skin, nails, and hair.

Ingredients:

- Iron (as Ferrous Bisglycinate) 14 mg
- Other ingredients

Iron prevents the development of anemia and increases vitality. Organic iron is richer and gets absorbed more easily. It does not have any side effects common to non-organic iron such as diarrhea, irritation of the mucous membrane of the stomach, metallic taste in the mouth, or darkening of tooth enamel.

Main Components

Iron participates in blood generation and tissue respiration. Iron is digested in the intestine and then is diffused into the blood vessels, where it is transported by the special protein transfer, which carries iron to cells and tissues.

As part of cytochrome enzymes, iron participates in the tissue respiration process (transporting oxygen from the lungs to the rest of the body), in the synthesis of ATF, in enzyme reactions, and in the metabolism of cholesterol. Iron gets accumulated in the spleen, liver, bone marrow; and is then used by the body as needed,

preventing the development of iron deficiency anemia whose symptoms include muscle weakness, impaired taste and smell, and brittle nails and hair.

Iron boosts immunity. Sufficient iron level in the body helps the immune system to function properly. Iron is also found in a number of enzymes that suppress pathogenic microbodies. It also has detoxifying and antibacterial properties and helps in the synthesis of the protective proteins lysozyme and interferon.

Iron improves the condition of the skin, nails, and hair, activates the production of antioxidants, which prevent excessive oxidation in the cells and participates in the regeneration of epithelial tissues, eliminating brittle nails, and improving the structure and pigmentation of the hair.

Iron deficiency leads to significant disorders such as anemia, immunodeficiency, increased risk of infections, and chronic fatigue.

Lax-Max

Item: 91117

Type/size: 120 vegetable capsules

Lax-Max helps to:

- normalize the peristalsis of the intestine;
- bind toxin and purges them from the body;
- ensure regular soft stool;
- restore microflora.

Ingredients:

Magnesium (from Magnesium oxide) 90 mg, Psyllium husk (*Plantago psyllium*) 300 mg, Inulin (from Chicory root) 70 mg, Alfalfa (*Medicago sativa*) leaf extract 50 mg, Coral powder 30 mg, Diatomaceous algae 24 mg, Cascara (*Rhamnus purshiana*) bark 12 mg, Senna (*Cassia angustifolia*) leaf 12 mg, Rhubarb (*Rheum palmatum*) root 12 mg, Pau D'Arco (*Tabebuia heptafylla*) bark 6 mg, Black Walnut (*Juglans nigra*) hull 6 mg, Cloves (*Syzygium aromaticum*) flower bud 6 mg, Bayberry (*Myrica cerifera*) root bark 6 mg, Watercress (*Nasturtium officinale*) leaf 6 mg, Parsley (*Petroselinum crispum*) leaf 6 mg, Rosemary (*Rosmarinus officinalis*) leaf 6 mg, Echinacea (*Echinacea purpurea*) herb 6 mg, Fenugreek (*Trigonella foenum graecum*) seed 6 mg. Other ingredients:

Lax-Max is a natural mild laxative. It contains several groups of active ingredients that allow it to achieve its effects.

Main Components

The fructooligosaccharides inulin and psyllium husk act on intestinal peristalsis. They inhibit the absorption of fluid in the colon, making the stool more fluid and improving bowel motility. This increases the frequency of bowel movements, softening the stool and restoring a relaxed bowel. As a sorbent, inulin absorbs various heavy metals and radionuclides and removes them from the body while promoting the growth of microflora in the gut.

Buckthorn, Turkish rhubarb and Senna are sources of active ingredients that strengthen the peristalsis of the colon. Their laxative effect is achieved through the irritation of the mucous membrane of the colon. Their

laxative effect is achieved by irritating the colonic mucosa. They are very effective in treating chronic constipation and flatulence, as well as ridding the body of toxins and improving bowel function.

Alfalfa, clover, rosemary, fenugreek, Myrick, black walnut; the saponins, flavonoids, minerals and mucous substances contained in these plants inhibit fermentation and putrefaction in the intestine, and reduce inflammation.

Plant fibres help to evacuate the contents of the bowel. Mucilage reduces inflammation by forming an extra layer over the bowel and helping it to heal.

Magnesium oxide accelerates metabolism and bile excretion while at the same time increasing the amount of water in the intestine, thereby strengthening the peristalsis and eliminating constipation.

Libidextra Men

Item: 2301

Type/size: 30 herbal capsules

The product Libidextra Men will help:

- increase sexual desire (libido),
- Improve erectile function,
- Support prostate health.

Ingredients:

• Cold-pressed pumpkin seed oil	250 mg
• ENOSTIM (grape and apple peel extracts, saffron)	200 mg
• Essential oil of damask rose flowers	100 mcg
• Pine phytosterols	50 mg
• L-arginine	30 mg
• Niacin	8 mg
• Selenium	25 mcg
• Other ingredients	

Sexual activity is an important indicator of overall health and men's well-being. First of all, it is assessed by the state of erectile function, which is physiologically related to age and physical and emotional states. It is thought that around half of men between the ages of 40 and 70 experience a decline in sexual performance, which may lead to feelings of anxiety, mood swings and low self-esteem, forming a vicious cycle of dissatisfaction.

Libidextra Men will help increase libido, improve erectile function, support prostate health.

Main Components

EnoSTIM™ is a patented synergistic combination of polyphenols from grape and apple peels, enriched with saffron. The active ingredients in EnoSTIM™ improve microcirculation and blood flow in the pelvic organs by stimulating nitric oxide (NO) production. Nitric oxide also plays a crucial role in producing an erection. Studies have shown that taking EnoSTIM™ for 4 weeks increases blood flow by up to 50% and reduces oxidative stress by 74%, with 75% of men having an improved erection.

L-arginine is an important ingredient for maintaining adequate levels of nitric oxide, which is formed from L-arginine.

Niacin (vitamin B3) has vasodilating effects, improves blood flow and microcirculation in the pelvic area. It also supports the health of the nervous system and reduces fatigue.

Selenium increases male reproductive capacity: stimulates the maturation of male germ cells (sperm), increases their mobility and quality. It reduces the level of oxidative stress and supports the immune system as a whole.

Pumpkin seed oil contains beta-sitosterol, which in combination with phytosterols from the pine tree has a positive effect on prostate health. Pumpkin seed oil is also rich in mono- and polyunsaturated fatty acids, carotenoids and tocopherols. Unsaturated fatty acids help control "bad" cholesterol levels and support heart and vascular health.

The essential oil of damask rose flower has been known as an aphrodisiac since the days of Ancient Persia and Greece. Its attractive fragrance reveals sensuality and enhances attraction, sets the mood for romance.

Libidextra Women

Item: 2302

Type/size: 30 herbal capsules

Libidextra Women will help:

- Increase sex drive (libido)
- Improve the quality and satisfaction of sexual relationships
- Support the health of women during PMS or pre-menopause
- Improve the condition of skin, hair, and nails

Ingredients:

• Evening primrose seed oil (stabilized with mixed tocopherols)	250 mg
• Fenugreek seed extract	200 mg
• L-arginine	30 mg
• Niacin (nicotinamide)	8 mg
• Damask rose flower essential oil	100 mcg
• Selenium (L-selenomethionine)	25 mcg
• Biotin	40 mcg
• Other ingredients	

A comprehensive formula with patented fenugreek extract, Libifem™ is for the ongoing support of women's health. The product helps to unlock sensuality and improve the quality of a woman's sex life.

Main Components

Libifem™ is a proprietary, standardized fenugreek seed extract with clinically proven efficacy to support sex drive and increase libido in women, and to alleviate the symptoms of menopause. Contains 50% furostanol saponins, which maintain normal levels of the female hormone estradiol.

Evening primrose seed oil is one of the richest sources of unsaturated fatty acids, gamma-linolenic (GLA) and linoleic acids (LA). Women take this oil to reduce PMS pain and menstrual cramps, and to relieve menopausal symptoms. The product contains the highest quality evening primrose oil, obtained by cold pressing it without the use of chemical solvents.

L-arginine is an important ingredient for producing and maintaining adequate levels of nitric oxide, upon which normal blood circulation largely depends. It is known that a sufficient supply of blood to the pelvic organs stimulates the function of the genitals and accelerates arousal.

Niacin (vitamin B3) has a vasodilator effect (dilates blood vessels), improves blood flow and microcirculation. It supports the health of the nervous system and reduces tiredness and fatigue.

Biotin is involved in the conversion of food into energy and helps to speed up metabolism, so taking biotin increases energy and performance. It is often called the "beauty vitamin" for its ability to maintain healthy skin, hair, and nails.

Selenium is important for the body's antioxidant and immune systems and is deservedly considered the element of longevity. It contributes to the proper functioning of the nervous system, helping to maintain alertness and good mood. It also contributes to the strengthening of hair and nails, and skin health.

Damask rose oil has been known as an aphrodisiac since the Persian and Greek times. Its attractive fragrance unlocks sensuality and increases feelings of attraction as well as putting one in a romantic mood.

The product is recommended for women who feel a low sex drive and decreased sexual satisfaction due to emotional and physical stress, or age-related changes.

Liposomal Curcumin

Item: 2165

Type/size: 100 ml

Curcumin:

- improves the cardiovascular, musculoskeletal, digestive systems;
- boosts immunity;
- helps to slow the aging process.

Ingredients:

- Cureit™ (Curcuma longa rhizome extract) 100 mg (Curcumin 50 mg.)
- Other ingredients

Liposomal Curcumin is the most bioavailable form of curcumin.

The powdered rhizome of turmeric has been extensively used in India and other South Asian cuisines, and is an integral part of Ayurvedic medicine for a broad range of conditions. In particular, curcumin, a major active component of turmeric, is one of the most studied botanicals for its anti-inflammatory, antioxidant properties.

Turmeric has been used as a spice and medicinal plant in India for thousands of years. It has powerful anti-inflammatory effects and is a very strong antioxidant. Curcumin boosts levels of the brain hormone, which increases the growth of new neurons and fights various degenerative processes in the brain. Not only can curcumin help modulate inflammation throughout the cardiovascular system it also supports normal cholesterol, triglyceride, and blood sugar levels.

The bioavailability of curcumin has always been an issue for sustainable availability, and thanks to a new

innovative patented technology PNS (Polar-Non-Polar Sandwiching) of the Aurea Biolabs company has solved the issue.

For over 40 years, Aurea Biolabs has been focused on nutraceutical product development, extraction, isolation and formulation of bioactive ingredients from spices and other natural extracts. Curcumin is not entirely bio available in the human system. This has been solved by Aurea Biolabs by making use of the PNS technology which is patented. All molecules of Turmeric are used in this formulation resulting in a 100% Natural Turmeric Matrix with a high content of Curcumin, which can bring in the true synergies of all the molecules of Turmeric.

Cureit™ is 10 times more bio-efficient than regular curcumin.

Liposomes allow the curcumin to safely pass through your digestive system and be absorbed into the bloodstream, where it is most needed to be effective.

Lipostick Fit

Item: 2169/216904

Type/size: 15 sachets, 15 ml each

Lipostick Fit helps to:

- accelerate fat burning
- prevent the formation of new fat cells
- improve the quality of sleep
- protect against oxidative stress

Ingredients:

Tangerine (*Citrus reticulata*) peel 5000 mg, Noni (*Morinda citrifolia*) fruit juice 300 mg, L-Carnitine 50 mg, Green Tea (*Camellia sinensis*) leaf extract 26 mg, Green coffee (*Coffea arabica*) bean extract 5 mg, Burdock (*Arctium lappa*) root powder 1 mg, Black Pepper (*Piper nigrum*) fruit extract 1 mg, other ingredients.

Contains sweeteners (erythritol and steviol glycosides).

Lipostick Fit is an innovative product for weight loss. Manufactured using liposomal technology for maximum bioavailability and effectiveness.

It's been proven that metabolism gradually slows down with age. This creates the prerequisites for the conversion of unused calories into body fat, even while maintaining the usual diet. The active components of the product help to accelerate metabolism and "burn" fat deposits.

Main Components

Patented Flavonoid Complex from Tangerine Peel Extract (*Citrus reticulata*) is the main component of the product. The fermentation process significantly increases the levels of 'super flavonoids' (nobiletin, hesperidin) in the peel.

Nobiletin prevents the accumulation of fat in the liver by influencing genes associated with fat metabolism: it stimulates the gene expression involved in the burning of excess fat and suppresses genes responsible for the formation of new fat cells.

Hesperidin regulates lipid and glucose metabolism and stimulates the secretion of the hormone cholecystokinin. This process controls appetite and regulates the sense of fullness.

A complex of flavonoids regulates circadian rhythms in the body and helps to improve sleep, which is known to be essential for normal metabolism and maintaining hormonal balance.

Green coffee bean extract is a source of caffeine, chlorogenic acid, and chromium. Chlorogenic acid helps to metabolize fatty acids more efficiently and reduce triglycerides in the liver, leading to weight loss. It also slows down the formation of new fat cells. In combination with caffeine, chlorogenic acid accelerates lipolysis and stimulates the release of energy. Chromium helps to maintain proper blood sugar levels by increasing the sensitivity of cellular receptors to insulin. Chromium deficiency increases sweet cravings, which leads to the consumption of extra calories from "fast" carbohydrates.

Green Tea leaf extract is the richest source of antioxidants and a famous fat burner. Protects the body from oxidative stress, speeds up metabolism, and regulates blood sugar levels.

L-Carnitine an amino acid vitamin-like substance that enhances the breakdown and directs them to the mitochondria - the 'power stations' of the cells, where fat is oxidised and energy is released. Helps to reduce fat deposits and prevents the accumulation of fat in cells.

Noni fruit juice contains powerful antioxidants: the enzyme superoxide dismutase (SOD) and polyphenols, which neutralize free radicals, lower triglycerides and minimize the effects of oxidative stress.

Black Pepper fruit extract improves blood flow to the gastrointestinal tract and controls the formation of new fat cells.

LymFlow

Item: 91865

Type/size: 90 capsules

LymFlow helps to:

- optimize lymphatic drainage and vascular blood flow;
- support elasticity of strength of vessels;
- reduce vascular inflammation.

Ingredients:

- | | |
|---|--------|
| • Cherry (<i>Prunus cerasus</i>) pedicle extract | 150 mg |
| • Black Currant (<i>Ribes nigrum</i>) leaf extract | 150 mg |
| • Parsley (<i>Petroselinum sativum</i>) leaf extract | 75 mg |
| • Hibiscus (<i>Hibiscus rosa-sinensis</i>) flower extract | 50 mg |
| • Other ingredients | |

LymFlow helps improve lymphatic circulation and promotes the health of the lymphatic system. Lym-Flow also promotes the elimination of toxins and excess fluids from the body. This supplement helps to strengthen the immune system and improve overall health.

Main Components

The **cherry** is the fruit of many plants of the genus *Prunus*, and is a fleshy drupe (stone fruit). It is recorded that a cultivated cherry was brought to Rome by Lucius Licinius Lucullus from the Turkish town of Kerasunda. It turned out that not only the pulp of cherries is useful, but also the leaves and the stem, which contain lemon and apple acids, coumarins, plant pigments, tannins, vitamins C, B1, B6, PP1, many minerals, pectin. It has been noted that the extract of the stem cherry improves the circulation of contributing to the removal of excess fluid or lymph, thus providing drainage of the vessels and contributing to the removal of excess fluid and slag. Cherry coumarins reduce blood clotting and prevent the formation of blood clots. Vitamin P and flavonoids help to strengthen blood vessels.

Black currant (leaves and fruits) activate lymphatic drainage of the heart muscle and liver. The leaves of blackcurrant contain vitamin C, volatile, magnesium, silver, copper, sulfur, essential oil. The extract of blackcurrant leaves also helps to remove excess purine and uric acid from the body.

Beloved by many, **parsley** saturated with useful substances. Parsley contains essential oils, glycosides, vitamins and flavonoids. Parsley is rich in ascorbic acid (vitamin C) which, together with the other active ingredients in the plant, supports the elasticity of small and large blood vessels.

Chinese hibiscus is valued as a tonic in Asia and far beyond. The composition of bioactive compounds in hibiscus is diverse. They are anthocyanins and proanthocyanidins, organic (apple, lemon, hibiscus) and phenolic carbon acids. It is shown that polyphenols and protocatechuic acid neutralise toxic products of life pathogenic microbes, left by the latter on walls of vessels. The flower extract also has excellent antioxidant properties that prevent thinning and damage to vascular tissues.

Memo-Prime

Item: 2181

Type/size: 30 vegetable capsules

Memo-Prime can help:

- improve cognitive ability and memory;
- increase concentration and stress resistance;
- reduce emotional stress and irritability;
- maintain high performance throughout the day.

Ingredients:

• Memophenol™ (Vitis vinifera fruit extract and Vaccinium angustifolium fruit extract)	300 mg
• Green tea (Camellia sinensis) leaf extract	50 mg
• Vitamin B12 (Methylcobalamin)	3 mcg
• Vitamin B6 (Pyridoxine HCl)	2 mg
• Folic Acid (L-Methylfolate Ca as Extrafolate-S™)	100 mcg
• Other ingredients	

The human brain contains about 100 billion nerve cells (neurons). These neurons constantly send signals to each other to maintain all of our bodily functions. Stress, sleep deprivation, overwork, disease and ageing lead to changes in the brain. Neurogenesis (the formation of new neurons) slows down and interneuronal connections are disrupted, affecting the ability of neurons to send signals. As a result, cognitive abilities deteriorate, it becomes more difficult to take in new information, and memory and attention deteriorate.

Memo-Prime is designed to improve cognitive functions, the emotional state, and the nervous system - prolonging active life.

Active ingredients:

Polyphenols, especially flavonoids, are known to have a positive effect on cognitive function. Berries and fruits are especially rich in polyphenols. The result of 4 years of research by French and Canadian scientists was the development of the **Memophenol™** complex, which combines extracts of **French grapes and wild blueberries**, both of which are rich in polyphenols. The French Pinot Noir and Chardonnay varieties from the Champagne region have been selected for this

complex, as they contain high levels of catechins and resveratrol, giving them exceptional antioxidant properties. Wild blueberry (*Vaccinium angustifolium* A.) contains phenolic acids, flavonols, and anthocyanins and helps to correct memory disorders. No wonder it is called the 'brain berry'. In the Memophenol complex, these extracts work synergistically to increase overall effectiveness.

Clinical studies have shown that Memophenol™ improves learning abilities, short and long term memory and concentration.

Green tea extract contains a large number of polyphenols, the most important of which are catechin, epicatechin, gallic acid, and epigallocatechin. An important component of the extract is the amino acid theanine, which increases resistance to stress and reduces tension and irritation.

Vitamins B6, B9, and B12 are involved in the transmission of nerve impulses from neuron to neuron, the synthesis of serotonin and choline, and improving blood circulation in the brain. Mood, mental activity, and sleep largely depend on these vitamins.

Metastick

Item: 2193/219304

Type/size: 15 sticks, each containing 20 ml.

Metastick will help:

- improve digestion and the absorption of food
- reduce discomfort in the gastrointestinal tract
- improve stool
- strengthen the immune system
- reduce allergic reactions

Ingredients 1 stick (20 ml) contains:

- | | |
|---|-------|
| • Musa paradisiaca (banana) pulp extract | 10 g |
| • Lactobacillus plantarum water-substrate from orange peels (TC1507) | 2,5 g |
| • Lactobacillus plantarum water-substrate from Korean kimchi (TC1378) | 2,5 g |
| • Vitamin B6 (pyridoxine hydrochloride) | 2 mg |
| • Other ingredients | |

Microbiota, or microbiome (micro comes from Greek, meaning "small", and bios from Greek, meaning "life") of the intestine, is the totality of microorganisms that inhabit this organ. It is the largest and most numerous of all the microbiota in the human body. Healthy microorganisms produce metabiotics, which are biologically active metabolites that improve the digestion and absorption of food, maintain the integrity of the intestinal barrier, and have a positive effect on the immune system.

A new class of products - metabiotics for more quickly help and maintain gastrointestinal (GI) tract health, and the body as a whole. There are several advantages of metabiotics: they are resistant to the harsh environment of the digestive system, its enzymes, antibiotics, and they are well absorbed by the body. Once in the GI tract, metabiotics begin to work immediately.

Ingredients

Metastick is a complex of active metabolites from two strains of *Lactobacillus plantarum*, supplemented with natural prebiotic banana pulp extract and vitamin B6.

Lactobacillus plantarum from orange peel and Korean kimchi produce **active metabolites** that help maintain healthy gut microflora, normalize stools, reduce flatulence and intestinal discomfort

The effects of *Lactobacillus plantarum* metabolites complement those of **banana pulp extract**. It contains fructooligosaccharides (FOS), soluble fiber, organic acids, minerals (especially potassium and magnesium), vitamins A, C, E, and B group vitamins. FOS and soluble fiber are food for healthy gut bacteria and activate bowel peristalsis, and support lipid and carbohydrate metabolism.

The product also includes vitamin B6. This vitamin is partially synthesized in the intestines and partially absorbed from food, but when the microbiota are not in good shape, both processes are disrupted, leading to a **vitamin B6** deficiency. It is also important for normal liver function and the absorption of vitamin B12. It also helps regulate digestive enzymes and is essential for both the nervous and cardiovascular systems.

MindSet

Item: 91819

Type/size: 90 capsules

MindSet helps to:

- prevent development of atherosclerosis;
- increase energy and brain performance;
- improve mental abilities, memory, and attention;
- normalize the "sleep-wake" cycle.

Ingredients:

Vitamin B6 (Pyridoxal-5'-Phosphate) 2 mg, Folic acid 50 mcg, Vitamin B12 (Methylcobalamin) 3 mcg, Acetyl-L-Carnitine 250 mg, St John's Wort (*Hypericum perforatum*) herb extract 75 mg, Gotu Kola (*Centella asiatica*) leaf extract 50 mg, L-Tyrosine 50 mg, L-Theanine 40 mg, Reishi (*Ganoderma lucidum*) mushroom extract 30 mg, Reishi (*Ganoderma lucidum*) mycelium extract 20 mg, Alpha-Lipoic acid 20 mg, Ginger (*Zingiber officinale*) root extract 15 mg, Ginkgo (*Ginkgo biloba*) leaf extract 12 mg, Rosemary (*Rosmarinus officinalis*) leaf extract 5 mg. Other ingredients.

MindSet enhances blood supply and nutrition to the brain. Other improvements include attention, memory, mental ability, increased physical energy, performance and stress resistance, and stress resistance.

Main Components

Tyrosine and teanine are amino acids responsible for adrenalin synthesis and mood optimization; they enhance adrenal and pituitary gland functions. They are participants of gamma-aminobutyric acid formation, which is a strong stress-preventing component. They play a significant role in the formation of all memory types and produce a calming effect.

Vitamins of the B-group (B6, B9, and B12) optimize post-stress behavior, help to restore the sleep-wake cycle and facilitate the prevention of disorders of different brain structures.

Reishi has many effects on the the activity of the Central Nervous System (CSN). Its health-promoting effect is achieved by calming the "overexcited" nervous system without causing drowsiness. Its bioactive ingredients do not depress or excite, but optimise the functioning of nerve cells. The result of this harmonising action is an improvement in sleep parameters and waking activities.

Ginger root, ginkgo biloba and rosemary extracts are natural antioxidants that help to tone the blood and nervous system. They have also been shown to strengthen blood vessels, improve blood flow to the brain and lower blood pressure.

Lipoic acid is an active antioxidant which protects the mitochondrion from the most aggressive radicals. This substance performs the function of coenzyme; it is an energy supplier to brain cells, preventing them from oxidation.

MSM

Item: 2152

Type/size: 60 vegetable capsules

MSM will be beneficial for people suffering from:

- Muscle and bone problems;
- Skin problems;
- Allergies;
- Poor nail and hair structure.

Ingredients:

• Vitamin C (as Magnesium ascorbate)	50 mg
• Biotin	50 mcg
• Magnesium (as Magnesium ascorbate)	4 mg
• MSM (Methylsulfonylmethane)	750 mg
• Other ingredients	

Sulphur deficiency can cause hair loss and joint pain. To avoid these problems, it is important to consume enough sulphur, the levels of which decrease with age. MSM is an ideal supplement to help with this.

MSM is a product based on organic sulfur combined with Vitamin C and Biotin.

Main Components

Sulfur (MSM) is necessary for the formation of the basic structural proteins used in the formation of connective tissues; collagen and keratin. Collagen keeps the joints elastic and mobile. It's found in cartilages, tendons, ligaments, bones, and the skin. Keratin is responsible for the health of the hair, nails, and the skin. MSM has been shown to be particularly effective in people with impaired muscle and skeletal function.

In addition to that, sulfur is also found in immune proteins (antibodies, cytokines), some hormones (insulin), enzymes, antithrombin III (blood clotting inhibitor), and glutathione (an antioxidant).

Organic sulfur supplements help not only to normalize the synthesis of insulin but also stabilize the blood sugar level and protein structure. On top of that organic sulfur increases the permeability of cell membranes, which improves the intake of nutrients and stimulates the removal of toxins from the body. The availability of vitamin C and other antioxidants is also increased.

Vitamin C improves the permeability of capillaries, stimulates the function of the cells synthesizing collagen, participates in the synthesis of adrenal and thyroid hormones, helps absorb iron, and normalize blood regeneration. It also helps protect the body from the consequences of stress.

O!Mega-3 TG

Item: 2194/2191

Type/size: 30/90 capsules

O!Mega-3 TG will help:

- support a healthy cardiovascular system
- strengthen immunity
- support the nervous system and vision proper function
- prolong an active lifestyle.

Ingredients:

- Omega-3 PUFA fish oil concentrate from oceanic fish (anchovies, sardines, mackerel, tuna) 650 mg
 - Including EPA (Eicosapentaenoic acid) 360 mg
 - DHA (Docosahexaenoic acid) 240 mg
- Vitamin E (D-alpha-tocopherol) 6,71 mg
- Other ingredients

Scientists have long known that regularly consuming fish fat reduces the risk of cardiovascular disease. Fish oil is known to be a rich source of omega-3 polyunsaturated **fatty acids**, essential fatty acids, so it is extremely important to get enough of them in your daily diet.

A review of 298 scientific studies shows that adults in most regions of the world have low or very low levels of omega-3 PUFAs, especially the essential **Eicosapentaenoic (EPA) and Docosahexaenoic (DHA) acids**.

«O!Mega-3 TG» contains a high concentration of omega-3 PUFAs in the **reduced triglyceride form**. The reduced triglyceride form is similar in structure to the natural form, so it is easily and quickly absorbed by the body. The source of omega-3 PUFAs in this product is fish oil from oceanic fish (anchovies, sardines, mackerel, and tuna) from the Pacific and Atlantic Oceans. The high quality of the product is ensured by an innovative, environmentally friendly process of raw material purification without using organic solvents and high temperatures.

Effects of Active Ingredients

The fat of cold-water saltwater fish is a natural and virtually the only source of the valuable omega-3 acids EPA and DHA. The human body cannot synthesize these nutrients on its own; they can only be obtained from food or supplements. Omega-3 PUFAs have a number of important biological functions that contribute to the health of the cardiovascular, immune, and nervous and visual systems. Omega-3 PUFAs compete with cholesterol by displacing it from the bloodstream. They increase the activity of human immune cells. EPA helps to increase the level of the "happiness" hormone, serotonin. DHA has a positive effect on brain function and visual acuity. It is the gray matter of the brain and the retina that contain the highest concentrations of DHA.

Vitamin E in its most active and natural form, D-alpha-tocopherol, protects cell membrane lipids from oxidation and damage by free radicals, increases the body's performance and resistance to infectious diseases.

Oceanmin

Item: 225115/225130

Type/size: powder, 15 sticks per pack

Oceanmin helps:

- deal with the feeling of fatigue;
- increase physical endurance and mental performance;
- normalize emotional balance and increase stress resistance;
- support the work of the heart;
- strengthen bone tissue.

Ingredients:

- Deep ocean mineral concentrate containing Magnesium not less than 120 mg
- Sodium not less than 90 mg
- Potassium not less than 35 mg
- Calcium not less than 0,9 mg

Oceanmin is a deep ocean mineral concentrate produced using patented technology from seawater sourced from a depth of 662 meters in the Pacific Ocean. Deep ocean water is exceptionally clean, because it is isolated from the effects of sunlight and pollution, has a consistently low temperature (6-9 degrees Celsius), and there is no bacterial microflora in it. It also has a unique composition of minerals in various concentrations.

The dominant mineral of Oceanmin is magnesium, and the product contains about 70 more minerals. The rich mineral composition and proportions of the main macronutrients - magnesium, potassium, calcium, sodium - help to cope with one of the main problems of our time - fatigue caused by various reasons (physical or mental stress, past illnesses, poor ecology, or other problems) and allow you to restore energy, and feel the taste of life.

Action of active components

Magnesium

Magnesium is the main component of the composition for a reason: the characteristic symptom of its deficiency is fatigue, lethargy, low efficiency, insomnia, and irritability. It is magnesium that regulates the

excitability and conductivity of nervous tissue in the human body, participates in the synthesis of most neuropeptides in the brain (neuropeptides regulate behavioral and adaptive responses, control circadian rhythms, eating behavior, and play an important role in the mechanisms of memory and learning). Magnesium provides relaxation of muscles (including the heart), and helps relieve spasms that often occur in muscles after intense physical activity or stress.

Other composition minerals

It is known that the mineral composition of the body is represented by various macro- and microelements, each of which performs its own function, and together which ensure the coordinated work of all systems and organs. Oceanmin, in addition to magnesium, potassium, sodium, and calcium, contains trace amounts of about 70 different marine minerals, which allows the body to select the minerals it needs "here and now", thus ensuring homeostasis.

Before taking, "Oceanmin" is dissolved in water, while deep ocean mineral salts quickly dissociate with the formation of active chemical particles - mineral ions, which ensures their rapid assimilation.

Omega 3 Oranges

Item: 2113

Type/size: 30 chewable softgel capsules

Omega 3 Oranges helps:

- to protect the heart and blood vessels;
- to reduce irritability and hyperactivity;
- to promote normal intellectual development of the child, improves concentration, memory and vision;
- has a positive effect on overall children's health.

Ingredients:

- | | |
|---------------------------------------|--------|
| • Fish Oil | 500 mg |
| • Omega 3 Fatty Acids | 150 mg |
| including EPA (Eicosapentaenoic acid) | 80 mg |
| DHA (Docosahexaenoic acid) | 50 mg |
| • Other ingredients | |

Omega-3 are essential fatty acids that have many health benefits. The body cannot produce Omega-3 fatty acids on its own, so they should be obtained from diet and supplementation.

These fatty acids are found in fish, such as salmon and tuna, as well as from seafood and nut oils. Essential fatty acids such as Omega -3 are vital for brain and nervous system development as well as the proper functioning of the cardiovascular system, the absorption of nutrients, and vision.

In the body, Omega-3 are broken down into easily-absorbable units called eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA). Although EPA and DHA naturally occur together and work together in the body, studies show that each fatty acid has unique benefits. DHA supports the brain, eyes, and central nervous system, making it particularly important for pregnant and breastfeeding women. EPA supports the heart, immune system, and inflammatory response.

OpiStop

Item: 91654

Type/size: 100 capsules

OpiStop reduces the toxic effect when having:

- opisthorchiasis;
- giardiasis;
- ascariasis;
- enterobiasis.

Ingredients:

- | | |
|--|--------|
| • Rose hips (<i>Rosa canina</i>) fruit extract | 200 mg |
| • Long pepper (<i>Piper longum</i>) fruit extract | 100 mg |
| • Aspen (<i>Populus tremuloides</i>) bark extract | 100 mg |
| • Deglycyrrhizinated Licorice (<i>Glycyrrhiza glabra</i>) root extract | 100 mg |
| • Yarrow (<i>Achillea millefolium</i>) flower extract | 50 mg |
| • Tansy (<i>Tanacetum vulgare</i>) flower extract | 20 mg |
| • Other ingredients | |

OpiStop is an exclusive plant-based formula that protects the body from the dangers of parasitic disease caused by Siberian liver fluke or Southeast Asian liver fluke. This unique formula has triple-action properties (antiparasitic, increasing bile in the liver, and an emollient) which fight parasites without disrupting the normal function of the digestive system. OpiStop promotes the proper functioning of your gastrointestinal tract. It does this by combining the natural properties of the main plants in its composition.

Main Components

Rosehips, long pepper, yarrow and licorice have a restorative effect. They improve metabolism and nor-

malize gastrointestinal tract functioning. These ingredients have a highly beneficial effect on the liver and gall bladder and are known to promote bile excretion. They help restore cells of the intestinal mucosa. Yarrow promotes cleansing of the body by removing excess liquids and toxins.

Aspen and Tansy are potent anti-parasitic ingredients and are particularly beneficial in cases of opisthorchiasis. They boost efficacy and normalize the gastrointestinal tract functions and tone up the muscles of the digestive tract.

ParaFight

Item: 2124

Type/size: 90 vegetable capsules

ParaFight functions by:

- helping the body fight against dangerous parasitic worms (roundworms, scaridosis, enterobiasis, trichocephalosis, ankylostomiasis, and necatoriasis, etc.);
- supporting detoxification.

Ingredients:

Black Walnut (*Juglans nigra*) leaf extract 150 mg, Clove (*Caryophyllus aromaticus*) fruit extract 45 mg, Gentian (*Gentiana lutea*) root extract 35 mg, Chamomile (*Matricaria recutita*) flower extract 35 mg, Long Pepper (*Piper longum*) fruit extract 25 mg, Yarrow (*Achillea millefolium*) plant extract 25 mg, Althaea (*Althaea officinalis*) root extract 25 mg, Garlic (*Allium sativum*) bulb 20 mg, Mint (*Mentha piperita*) leaf extract 20 mg, Thyme (*Thymus vulgaris*) leaf extract 20 mg, Sage (*Salvia miltiorrhiza*) leaf extract 20 mg, Oregano (*Origanum vulgare*) leaf extract 20 mg, other ingredients.

ParaFight is a broad-spectrum anti-parasitic product. The concept is based on well-known antihelmintic herbs that effectively help to optimise the function of the gastrointestinal tract and help to expel parasites.

Main Components

Black Walnut Leaves are a source of tannins, organic acids, coumarins, glycosides, flavonoids, essential oils, vitamins C, B1 and F, minerals, and most importantly juglone. Juglone actively inhibits pathogenic bacteria and *Candida* fungus; improves bowel function, and softens stools. Flavonoids and tannins relax the smooth muscle tissues; reduce irritation and inflammation of the mucous membranes, and accelerates their healing.

Tansy is a source of essential oil, the main components of which are thujone, camphene, camphor, thujol, borneol, pinene, flavonoids and phenol carbonic acid, etc. The components of tansy essential oil have a paralysing effect on giardia, roundworms, pinworms and other parasites in various organs, suppressing their reproduction and reducing their toxic effects on the body.

Gentian root has proven to be an effective natural antihelmintic. The gentiopicrin found in the plant can kill one of the most dangerous parasites, *Toxosara canis*, in its early stages of development. This parasite damages the lungs, liver, eyes, often leading to the development of gastritis and severe allergies.

Red Thyme is a source of thymol, which is especially effective against hookworm and other exotic worms such as the American hookworm and the whipworms, often found in the large intestines of pets.

Sage leaf and Oregano leaf complement the antihelmintic ingredients of the product with anti-inflammatory, antispasmodic and astringent properties. These plants contain tannins, catechins and flavonoids, which help to reduce bloating and heaviness in the stomach, while minimizing putrefaction and fermentation in the intestines.

Pau D'Arco Bark

Item: 2190

Type/size: 90 vegetable capsules

Pau D'Arco helps address:

- respiratory conditions caused by flu, corona viruses, and bronchitis;
- various kinds of localized inflammation;
- infections of the urinary tract;
- skin legions with pus;
- fungal diseases.

Ingredients:

- Pau D'Arco (Tabebuia impetiginosa) bark powder 500 mg
- Other ingredients

The ant tree is so called because all the cavities in its trunk and branches are populated by ants. The curative properties of this tree are well known to the indigenous peoples of Mexico and Peru who call it the "divine tree". Its bark is a natural antibiotic that has long been used in traditional medicine to treat a variety of infectious diseases.

Pau D'Arco Bark is made from the internal layer of ant tree bark. It kills bacteria and viruses and also has an anti-inflammatory effect. It also boosts immunity.

Main Components

Lapahol is the main ingredient of the bark that has an antibacterial effect. It is found on the inside of the bark and prevents the growth and reproduction of gram-positive and gram-negative microbodies.

Lapahol can also slow down the production of enzymes which explains its antiviral effect since viruses can't multiply without enzymes. Ant tree bark can destroy the viruses of flu, herpes, corona virus, and a number of others.

Its antifungal properties are due to xyloidine which,

when combined with lapahol, suppresses the growth of many types of fungi, including vaginal fungi (Candida, Trihofiton). Even the wood itself is extremely resistant to fungi which never grow on it.

The anti-parasite effect manifests in its ability to inhibit the reproduction and growth of intracellular parasites. It also prevents invasions of micro-pathogens by creating a most adverse environment for adaptable parasites. This is why ant tree is routinely included in herbal anti-parasite programs.

Because it also improves immunity, this unique tree can be used to fight allergies and autoimmune conditions in the body without fear of aggravating them. The bark increases the non-specific resistance of the body, boosting the cellular and humoral immunity. But, the most important thing is that all of the properties of the ant tree bark listed above have been thoroughly researched and confirmed. It has also been proven that none of the ingredients found in the bark can have the same effect on their own.

Pau D'Arco with Mate

Item: 2125

Type/size: 90 vegetable capsules

Pau D'Arco with Mate helps:

- support the immune system;
- increase vitality and stress resistance.

Ingredients:

- | | |
|--|--------|
| • Pau D'Arco (<i>Tabebuia impetiginosa</i>) bark extract | 200 mg |
| • Olive (<i>Olea europaea</i>) leaf extract | 70 mg |
| • Mate (<i>Ilex Paraguariensis</i>) extract | 30 mg |
| • Other ingredients | |

Pau D'Arco with Mate is a complex based on Pau D'Arco bark extract, Brazilian mate and olive leaf extract. It helps to strengthen the immune system and increase vitality.

Main Components

The Pau D'arco tree (*Tabebuia avellanedae*) is a large evergreen tree with purple flowers, native to the Amazonian rainforest and South America. Pau D'Arco has been used for many centuries by the tribes of South America. The ancient Incas and Aztecs were probably the first to discover the herb's healing powers. Pau D'Arco bark extract contains high consistency of active ingredients, which significantly increases its effectiveness. The Pau D'arco tree is indigenous to the Amazonian rainforest and has a long history of traditional use for infections, stomach, and bladder problems. Its active ingredient, beta-lapachone, also attracted a lot of attention for its anti-inflammatory, and anti-aging potential. It helps to slow down virus, enzyme and bacteria activity, improves the body's resistance to bacterial and viral infections, stimulates the immune system.

Mate (leaf extract) is a plant grown mainly in South America (Brazil, Paraguay, etc.) Yerba mate is a traditional South American drink that's gaining worldwide popularity. The leaves are usually dried over a fire and then steeped in hot water to make the tea. Yerba mate is an antioxidant powerhouse that contains many beneficial plant nutrients. Thanks to its caffeine content, yerba mate can help increase your energy levels and boost your mental focus. Mate enhances the healing effect of the Pau D'Arco, and helps to saturate the blood with oxygen and nutrients. It helps to relieve fatigue and stress, improves mood, increases performance and resistance to stress.

Long used in traditional medicine, **olive leaf** extract comes from the leaves of the olive tree (*Olea europaea*) and has a variety of health benefits. Olive leaves contain flavonoids and vitamins C, A, D and E, which help to strengthen the immune system and improve overall health. Olive extract helps protect the blood vessels and increases the vitality of the body.

Pau D'Arco with Selenium

Item: 2153

Type/size: 90 vegetable capsules

Pau D'Arco with Selenium helps the body to resist:

- respiratory infections (colds, flu, bronchitis);
- localized inflammations;
- fungal infections;
- skin legions.

Ingredients:

• Vitamin C (as ascorbic acid)	60 mg
• Selenium (as L-Selenomethionine)	30 mcg
• Pau D'Arco (Tabebuia impetiginosa) bark powder	500 mg
• Other ingredients	

Pau D'Arco with Selenium is a product that can treat inflammations as well as viral, bacterial and fungal infections. Selenium and vitamin C enhance the effect of ant tree bark, stimulating the body's immune system and increasing resistance to a whole range of pathogens.

The active ingredient is **lapahol**, a substance that suppresses the reproduction and growth of viruses and bacteria such as gram-positive staphylococcus and streptococcus and gram-negative microbes.

Main Components

Lapahol also eliminates or suppresses the reproduction of a number of viruses including herpes, polio, stomatitis, and inhibits the production of enzymes in viruses, rendering them unable to reproduce.

Ant tree bark improves the efficiency of the immune system which means it can be used to treat allergies and autoimmune conditions without the risk of mak-

ing things worse. The bark increases the non-specific resistance of the body by stimulating the intracellular and humoral immunity. The positive effects of ant tree bark are achieved by the synergy of its ingredients.

Ant tree bark is also highly effective against fungal infections, including vaginal infections and parasites. Ant trees are highly resistant to termites and various fungi, which never grow on the trunk of ant trees.

Selenium combines with vitamin C to increase its effect. It is a very effective antioxidant that protects the cells and tissues against stress, radiation, chemicals, and heavy metals. It boosts the immune system by stimulating killer cells and macrophages.

Vitamin C strengthens the walls of the capillaries, reducing their permeability to bacteria, thereby helping to reduce the severity and duration of colds. It also improves recovery and resistance to infection.

Pentokan K⁺

Item: 2183

Type/size: 20 effervescent tablets

Pentokan K⁺ helps:

- boost energy levels;
- promotes effective regulation of intracellular metabolism;
- provide many benefits to cardiovascular health.

Ingredients:

- | | |
|--|--------|
| • Vitamin C (as L-ascorbic acid) | 100 mg |
| • Potassium (as potassium bicarbonate) | 420 mg |
| • Ribose (as D-ribose) | 20 mg |
| • Other ingredients | |

Pentokan K⁺ is a product that was created specifically to prevent the lack of potassium in the cell - the "building block" of the body, which will guarantee a healthy and proper cell function.

Main Components

Potassium is an essential nutrient used to maintain the electrolyte balance in the body. Potassium is an electrolyte, a substance that conducts electricity in the body. Our bodies use potassium ions to conduct electrical impulses along muscle and nerve cells. Potassium plays an important role in ensuring good heart health. Potassium regulates the amount of sodium entering and exiting our cells, thereby controlling the amount of fluid we retain or excrete. This mineral is essential for the body to produce energy for physical activity. Potassium deficiency can lead to feelings of fatigue and low energy levels.

Vitamin C is one of the most important nutrients to include in a healthy diet. This vitamin provides a number of very important health benefits. Vitamin C helps manage stress levels, which is caused by a number of factors from our everyday life. Vitamin C is essential for collagen and elastin synthesis, slowing down skin aging through its antioxidant action. Vitamin C has a very important role - to transport potassium into the cell, by adjusting potassium conductance across cellular membranes.

Ribose is necessary for the synthesis of ATP molecules (adenosine triphosphate), which help our bodies to store and use energy for biochemical reactions. Ribose is very important for athletes: it improves workout recovery time and output by boosting muscle energy and minimizing fatigue. Energy from the breakdown of ATP powers many reactions in the cell, especially during exercise.

PhytoMix for Women

Item: 2173

Type/size: 30 vegetable capsules

PhytoMix for Women helps to:

- reduce the frequency and intensity of hot flashes and other menopause symptoms caused by lowered estrogen levels;
- recalibrate the sleep-wake cycle;
- stabilize the emotional state.

Ingredients:

• β -Alanine	400 mg
• Lifenol® Hops (<i>Humulus lupulus</i>) extract	100 mg
• Flax (<i>Linum usitatissimum</i>) seed lignan complex	30 mg
• Saffron (<i>Crocus sativus</i>) herb extract	20 mg
• Other ingredients	

PhytoMix for Women is a non-hormonal product designed to support the physical and mental health of women during the menopause and reduce the discomfort associated with its typical symptoms (hot flashes, increased perspiration, mood swings, insomnia, and depression).

Main Components

β -alanine is an amino acid that plays an important role in softening such symptoms as hot flashes, night sweats that women often experience during the menopause. Taking β -alanine helps reduce the frequency and intensity of hot flashes, recalibrates the sleep-wake cycle and improves the mental and emotional states.

Lifenol® is a standardized extract of hops that ensures the mixture is complete and keeps the active plant-based ingredients from breaking down. It contains stable concentrations of flavonoids, including the main active ingredient 8-PN, acts similar to estrogen. The main advantage of Lifenol over hormone replacement therapy is its safety. It is a completely natural product that contains phytoestrogens that are not hormones and therefore do not have negative effects on the body. Lifenol is not only a solution for the symptoms of the menopause to prevent health problems connected to the hormonal changes (reduced bone density, cardiovascular malfunctions, poor skin condition, etc.)

Flaxseeds are rich in α -linoleic acid, which is an essential fatty acid in the omega-3 group and in phytochemical substances such as lignans. As a source of phyto-oestrogens, flaxseed is extremely beneficial to health, especially for women. Research has shown that phytoestrogens contained in flaxseed have the added benefit of containing additional components such as omega-3 fatty acid, which gives tangible relief from menopause symptoms.

Saffron stigma extract exhibits an accentuated antidepressant effect thanks to its ability to normalize serotonin in the brain. It is well known that women during the menopause often experience melancholy, indifference toward life and difficulty concentrating. These emotional disturbances are caused by reduced estrogen levels, which is accompanied by a drop in serotonin, the happiness hormone. Serotonin has effects on important psychological and physiological functions: mood, libido, cognitive ability and memory, capacity for work, sleep patterns and appetite.

Saffron extract has been shown to have a positive effect on the mood, suppressing depression and making it difficult to overeat, and consequently reducing weight gain.

Phytoviron

Item: 2174

Type/size: bottle 500 ml

Phytoviron is helpful for those with compromised immunity because it helps:

- activate the body's natural defences;
- strengthen non-specific (innate) and specific (acquired) immunity;
- relieve symptoms, duration, and complications resulting from disease;
- increase the adaptive capacity of the body.

Ingredients:

Aloe arborescens extract, Tilia cordata flower extract, Rhodiola rosea root extract, Calendula officinalis flower extract, Eupatorium perfoliatum herb extract, Glycyrrhiza glabra root extract, Inonotus obliquus extract, Rosa canina fruit extract, Eleutherococcus senticosus root extract, Echinacea purpurea herb extract, Scutellaria baicalensis root extract, Angelica officinalis root extract, Astragalus chinensis root extract, Salvia miltiorrhiza root extract, Betula alba leaf extract, Rosmarinus officinalis leaf extract, Urtica dioica leaf extract, Centaurium erythraea herb extract, Juniperus communis fruit extract, Hippophaë rhamnoides fruit extract, Equisetum arvense herb extract, invert sugar, potassium sorbate, ethanol (5.6 vol.%), water up to 500 ml.

Phytoviron is a unique phytoconcentrate of 21 plant extracts that boosts immunity and increases the body's resistance to various infections and viruses.

It is a source source of many useful substances of plant origin: vitamins C and B, essential oils (phytoncides), polysaccharides, saponins, flavonoids, sterols, organic acids, macro- and microelements, bitterness, tannins. The plants included in the product synergistically interact, vitally enhancing the overall beneficial effect.

Extraction takes place at the plant where the product is manufactured. Each extract is obtained using the individual bioactive extraction technology. This allows the producers to take full control over the product's manufacturing cycle.

The active ingredients work against pathogens at all stages of invasion and development in the body, and also help to overcome the consequences of the disease.

Glycyrrhiza glabra root and Scutellaria baicalensis prevent viruses from entering cells and spreading in the body.

Rose canina and Hippophaë rhamnoides fruits, Tilia cordata and Calendula officinalis flowers, Centaurium erythraea, Urtica dioica leaves have a high content of natural vitamin C which plays an important role in the functioning of the immune system in combination with hesperidin, rutin, quercetin, carotenoids:

it activates the production of interferon, and promotes the synthesis of antibodies involved in the stimulation of cells responsible for the elimination of viruses and bacteria.

Glycyrrhiza glabra and Angelica officinalis root regulate the production of cytokines, help to stabilize the condition during the disease and prevent more serious tissue damage and swelling.

Juniperus communis fruit, Angelica officinalis root, Betula alba and Rosmarinus officinalis leaves contain phytoncides that inhibit the growth and development of pathogenic micro-organisms and prevent the development of many complications.

Inonotus obliquus, Eleutherococcus senticosus and Astragalus chinensis root, Betula alba and Urtica dioica leaves, Calendula officinalis and Tilia cordata flowers, Equisetum arvense, Aloe arborescens, Centaurium erythraea are involved in activation of lymphocytes, stimulate phagocytosis, and have anti-inflammatory activity.

The active components of **Aloe arborescens, Rhodiola rosea root, Inonotus obliquus, Eleutherococcus senticosus root, Echinacea purpurea** have adaptogenic properties, i. e. they help the body adapt to unfavorable or rapidly changing conditions. They improve metabolism and oxygen transport, helping to cope with stress and fatigue and also increase the body's resistance to various adverse effects.

Premium Plankton Oil

Item: 2192

Type/size: 60 capsules

Premium Plankton Oil:

- is a naturally derived product;
- featuring unique lipids in the form of waxy esters and the natural antioxidant astaxanthin;
- it's designed to help mitigate the adverse effects of today's sedentary lifestyle and poor dietary habits.

Ingredients:

- | | |
|---|-------------------|
| • Zooca™ Calanus Oil (Calanus finmarchicus) including omega-3 fatty acids | 550 mg
92,5 mg |
| • Astaxanthin | 0.3 mg |
| • Other ingredients | |

Main Components

Covering approximately two-thirds of the Earth's surface, our oceans are vast and largely unexplored, hiding incredible secrets and mysteries. The study of marine life has led to remarkable discoveries, one of which is Calanus oil.

Calanus, a genus of crustaceans, plays a vital role in the marine ecosystem, serving as a food source for numerous marine species, including fish and whales. Calanus finmarchicus, or North Atlantic Calanus, is particularly abundant along the Norwegian coast and is well adapted to the frigid waters of the Arctic and Subarctic. This species has a unique ability to store energy from its diet in the form of a special oil, rich in various lipids (primarily mono- and polyunsaturated fatty acids), which exist in a rare waxy ester form. Additionally, this oil is rich in the antioxidant astaxanthin, which gives it a distinctive deep red hue.

The waxy esters found in these lipids are digested slowly within the human digestive system, reaching the lower intestine where they activate GPR120 (FFAR4) receptors, which are linked to metabolism. Activating these receptors is known to help maintain metabolic balance and insulin sensitivity.

In the context of a modern sedentary lifestyle and imbalanced diet, there's an increased risk of metabolic disorders, such as metabolic syndrome. This condition, often a precursor to more severe health issues like type 2 diabetes and cardiovascular diseases, affects up to 30% of the global population. A product that can help combat the onset of such conditions is an invaluable tool for modern living.

Premium Spirulina

Item: 2163

Type/size: 200 tablets

Spirulina helps:

- improve metabolism;
- support immune function;
- maintain healthy weight.

Ingredients:

Spirulina (<i>Spirulina platensis</i>)	500 mg
--	--------

Premium Spirulina is made from 100% eco-friendly algae spirulina, produced to the highest quality standards. This unique product combines the benefits of bacteria and algae, and is a natural and environmentally friendly option, rich in a variety of phytonutrients, vitamins, and minerals. Spirulina has become known as a "superfood" in today's world, due to its many health benefits.

Main Components

Spirulina is a type of vegetable protein that contains a complete range of essential amino acids. This makes it easier for the body to absorb the protein found in spirulina, compared to other sources such as beef. In fact, it is absorbed 12 times easier, making it an ideal choice for vegetarians and vegans who want to ensure they are getting all the necessary nutrients.

The fat content in spirulina is very low, only 2-4%. This fat is mostly composed of omega-6 polyunsaturated fatty acids, such as gamma-linolenic acid and gamma-linolenic acid. These fatty acids are very beneficial for physical and mental health, as they help protect the body against premature aging, stress, age-related changes, and various allergic reactions and inflammatory processes.

Spirulina is a rich source of vitamins A, E, F, and B-complex. It contains many essential macronutrients such as calcium, potassium, and magnesium, as well as trace elements like manganese, iron, and zinc. The high antioxidant content of spirulina, including carotenoids, selenium, and germanium, is particularly noteworthy. The use of spirulina can help improve metabolism, detoxify the body, aid in weight management, and regulate cholesterol levels.

Prenatal +

Item: 2140

Type/size: 30 capsules

Prenatal + helps:

- support the health of expecting mothers and contribute to the healthy development of the fetus;
- help to strengthen a baby's health during the first years of life;
- contribute to lowering the risk of congenital anomalies.

Ingredients:

Vitamin D3 (as cholecalciferol) 5 mcg, Vitamin E (as d- α -tocopherol) 13 mg, Vitamin B1 (as thiamin mononitrate) 1,2 mg, Vitamin B2 (as riboflavin) 1,5 mg, Niacin (as nicotinamide) 15 mg, Vitamin B6 (as pyridoxine HCl) 1,9 mg, Folate (as folic acid) 400 mcg, Vitamin B12 (as cyanocobalamin) 3,5 mcg, Biotin 50 mcg, Pantothenic acid (as D-calcium pantothenate) 6 mg, Iodine (as potassium iodate) 150 mcg, Zinc (as zinc oxide) 2,25 mg, Selenium (as sodium selenate) 30 mcg, DHA (from fish oil) 200 mg, other ingredients.

Prenatal + is designed to help expecting or new mothers and their babies have a healthy start to their lives. It contains all the essential vitamins and minerals needed, as well as docosahexaenoic acid (DHA), which is particularly important for the developing baby. Prenatal+ helps ensure that you are getting all the vitamins and minerals you need before, during, and after pregnancy, so that you can confidently embark on this exciting journey of motherhood.

Main Components

PUFA Omega 3 (DHA). This is one of the key components that ensure the health of a mother-to-be and her baby, and her baby. This nutrient penetrates the placenta and reaches the fetus, assisting in the development of the brain, nervous system, and eyes. DHA also helps strengthen blood vessel and capillary walls, normalizes heart function, and lowers "bad" cholesterol levels. A sufficient amount of DHA in a pregnant woman's body can help reduce the risk of preterm birth.

Vitamin D is essential during pregnancy, as it helps the body absorb calcium. Without enough vitamin D, calcium absorption can be reduced, leading to conditions such as rickets. Rickets can cause the skeleton to develop incorrectly, resulting in a range of health problems.

B group vitamins ensure the normal functioning of the nervous system and take an active part in the meta-

bolic processes during the formation of the fetus. Deficiency of vitamins B9 and B12 is associated with defects of the neural tube formation, intrauterine growth retardation, miscarriage and risk of premature birth.

Vitamin E and niacin are needed for the normal development of the child and the proper functioning of the placenta. They help to prevent possible threats of miscarriage in the early stages. They are necessary for the normal development of the fetus (in particular, they take part in the formation of the respiratory system of the baby). Vitamin E improves the function of the ovaries and promote normal hormonal levels.

Selenium and zinc are essential minerals for the proper development of a fetus. A lack of these nutrients in a pregnant woman's diet can lead to various congenital anomalies in the child, such as muscle weakness, underdeveloped spine, heart defects, and respiratory system diseases. It can also cause late toxicosis, swelling, anemia, and premature birth.

Iodine is important for the normal functioning of the thyroid gland. Insufficient intake of this element during pregnancy can lead to the formation of a goitre and subsequent changes in thyroid function in the mother and the development of thyroid disorders in the child. Therefore, during pregnancy it is recommended to check the thyroid gland and ensure sufficient levels of iodine.

Promarine Collagen Peptides

Item: 2260/226003

Type/size: liquid, 10 vials of 50 ml

Promarine Collagen Peptides helps:

- slow down age-related changes in the skin (decreased elasticity, dryness, thinning, uneven tone);
- improve the condition of hair and nails;
- reduce the appearance of cellulite.

Ingredients:

- Hydrolyzed fish collagen 10,000 mg, Apple juice concentrate 700 mg, Ascorbic acid 100 mg, Blueberry juice concentrate 10 mg, Vitamin B6 1,4 mg, Spinach 1 mg, Biotin 50 mcg, other ingredients.
- Contains sweeteners - erythritol and steviol glycosides.

Promarin Collagen Peptides are a concentrated source of collagen peptides from deep-sea fish, including cod, pollock and haddock, to help maintain youthfulness and the beauty of skin, hair and nails. These peptides have a low molecular weight, which makes them easily absorbed by the body.

Main Components

Collagen peptides (low molecular weight collagen) are short chains of amino acids that form the basis of collagen and keratin, one of the main proteins in the human body. Collagen is found in many organs and tissues, and two-thirds of the skin is composed of collagen, which gives it elasticity, smoothness, and density. After the age of twenty-five, collagen production starts to decrease, and by sixty years of age, only half of the initial level may remain in the body. As we age, collagen fibers thicken, their number decreases, and their elasticity decreases, leading to sagging, thinning, and static wrinkles in the skin.

There are currently 28 different types of collagen identified. More than 90% of the collagen in the skin is composed of types 1 and 3, so their replenishment is particularly important to prevent age-related changes.

Vitamin C stimulates the production of collagen, elastin, and hyaluronic acid by fibroblasts.

Biotin, or "beauty vitamin", is a source of sulfur, which is necessary for the synthesis of keratin - the main structural protein of hair and nails. Biotin also regulates the sebaceous glands, reduces skin flaking, and prevents clogging of pores.

Vitamin B6 is essential for the synthesis of amino acids and stimulates metabolic processes in the skin and mucous membranes.

Blueberries and spinach: Anthocyanins, flavonoids, vitamins A, C and PP are included in their composition, strengthening the walls of blood vessels and protecting collagen fibers from damage.

Promarine Collagen Tripeptides

Item: 2270/227003

Type/size: liquid, 10 vials of 50 ml

Promarine Collagen Tripeptides is designed to:

- Alleviate signs of aging such as reduced elasticity, dryness, thinning, and uneven complexion
- Even skin tone and diminish pigmentation
- Enhance the health of hair and nails
- Minimize the appearance of cellulite

Ingredients:

Fish Collagen Hydrolysate MAXICOLLAGEN 15000 mg, including tripeptides 3500 mg, Hibiscus Sabdariffa Flower Extract 1500 mg, White Currant Fruit Extract (Ribes rubrum) 700 mg, Vitamin C (L-ascorbic acid) 100 mg, Hyaluronic acid 72 mg, Vitamin B6 1,8 mg, Vitamin B2 1,7 mg, Spinach Leaves 1 mg, Biotin 50 mcg, Other ingredients.

In today's fast-paced world, the need for efficient and quick skincare solutions is more pressing than ever. **Promarine Collagen Tripeptides** emerge as the ideal choice for those seeking to experience the benefits of collagen-based products more rapidly.

Action of active ingredients.

Promarine Collagen Tripeptides feature **MAXICOLLAGEN**, a state-of-the-art liquid collagen characterized by its **low molecular weight and enriched with a significant concentration of tripeptides**. Tripeptides are the tiniest building blocks of collagen consisting mainly of three amino acids (typically glycine, proline, and hydroxyproline), and boast a minimal molecular mass. These compounds, because of their diminutive size and mass, can be assimilated directly by the intestines, swiftly entering the bloodstream to reach targeted organs and tissues more efficiently. This process significantly accelerates wrinkle reduction and skin lifting.

The innovative low-molecular MAXICOLLAGEN is produced using enzymatic hydrolysis technology, em-

ploying both endo- and exo-peptidases. This method meticulously breaks down native collagen into tripeptides and peptides, optimizing the formulation for skin absorption.

Hibiscus extract plays a crucial role in decelerating the skin's transepidermal water loss while enhancing the synthesis of hyaluronic acid. It contributes to the skin's elasticity and firmness and helps diminish fine lines and wrinkles.

White currant extract, particularly beneficial for aging skin, inhibits the production of the dark melanin pigment, thereby reducing pigmentation and promoting a more uniform skin tone.

Hyaluronic acid is instrumental in maintaining skin moisture, ensuring optimum hydration. In synergy with **vitamin C and spinach**, it fosters collagen production and shields the skin from oxidative stress, imparting a smooth and luminous appearance.

Vitamins B2, B6, and B7 (biotin) are essential for cell regeneration and the renewal of tissues, nurturing healthy skin, hair, and nails.

Protivity Ultra

Item: 2187

Type/size: 150 tablets

Protivity Ultra helps:

- in case of a nutritionally unbalanced diet;
- during various restrictive diets;
- with lactose intolerance;
- in case of problems with the digestive processes;
- cope with physical and intellectual stress;
- accelerate recovery after injuries and operations;
- with weakened immunity and loss of strength.

Ingredients:

L-leucine 250 mg, L-isoleucine 125 mg, L-valine 125 mg, L-lysine 120 mg, L-arginine 100 mg, L-phenylalanine 100 mg, L-glutamine 100 mg, citrulline 80 mg, L-threonine 60 mg, L-histidine 40 mg, L-cysteine 20 mg, other ingredients.

Protivity Ultra is a complex of 11 essential and non-essential amino acids to supplement and enrich your daily diet. It replenishes protein deficiencies in the diet, optimizes metabolism, helps to restore muscles, joints and ligaments, build muscle mass, strengthen immunity, and increase the body's endurance. It is GMO, soya and gluten free.

Action of active ingredients.

A healthy and balanced diet provides the nutrition necessary for growth, normal development, and the vital functions of a person. It helps to maintain good health and prevent diseases, as well as improve the overall quality of life.

Proteins are complex organic substances that consist of amino acids, which form the basis of all cellular structures. They are the building blocks of our muscles, internal organs, skin, hair, and nails, as well as other tissues. Proteins also regulate metabolism, help to build immunity, speed up and direct chemical reactions, and are responsible for tissue repair. Unlike carbohydrates and fats, they cannot accumulate in the body.

Most people today consume low-protein diets, which seriously compromises their quality of life by increasing the risk of chronic diseases and conditions.

To be assimilated, protein from food has to travel a long way through the body and be broken down into individual amino acids during digestion. It takes time and energy. The use of amino acids significantly accelerates the assimilation and does not require high energy consumption. So it is the amino acids, not the proteins themselves, that are the most valuable nutrients.

Protivity Ultra is:

- a balanced composition of essential (valine, leucine, isoleucine, lysine, threonine, phenylalanine), non-essential (arginine, histidine, glutamine, citrulline) and conditionally essential (cysteine) amino acids;
- minimum calories - only 7 kcal, 0.02 g of carbohydrates and 1 g of protein in each tablet;
- easily digestible amino acids with a high degree of availability and efficiency, obtained by modern biotechnological methods (fermentation, hydrolysis).

Pure-C 500 mg

Item: 2185

Type/size: 60 vegetable capsules

Vitamin C:

- Strengthens the immune system;
- Protects against oxidative stress;
- Promotes collagen synthesis and maintains the health of the skin, vessels, bones, teeth, joints, and gums;
- Participates in the regulation of the nervous system;
- Increases endurance, reduces fatigue.

Ingredients:

PUREWAY-C™

- Vitamin C (L-ascorbic acid) 500 mg
- Citrus bioflavonoids from fruit extract (Citrus sinensis, Citrus limon, Citrus aurantifolia, Citrus reticulata, Citrus tangerina) and fatty acids from rice bran oil (Oryza sativa L)
- Other ingredients

Active ingredients

Vitamin C is a crucial antioxidant for the body. Throughout evolution, humans have lost the ability to synthesize Vitamin C, hence it can only be obtained from external sources: food and dietary supplements. Since Vitamin C does not accumulate in the body, it is essential to replenish its supply regularly. The primary sources of Vitamin C are fresh vegetables and fruits, but improper storage or thermal processing can reduce its content by several folds.

Vitamin C is an antioxidant that protects the cells of organs and tissues from damage by free radicals, activates the body's protective functions, and accelerates the healing of wounds and scars.

Vitamin C is involved in the synthesis of collagen and elastin, endogenous hyaluronic acid, steroid hormones, the formation of active forms of folic acid,

Vitamin D, and many enzymes. It affects protein and carbohydrate metabolism, enhances the absorption of calcium, iron, zinc, and the synthesis and metabolism of cholesterol. It speeds up the elimination of toxic substances from the body: lead, copper, mercury, vanadium. Vitamin C strengthens vessels and increases the body's endurance.

To improve the bioavailability and increase the stability of Vitamin C, plant fatty acids and citrus bioflavonoids are included **in the patented form of PUREWAY-C™**. It is clinically proven that Vitamin C from PUREWAY-C™ stays in the body 233% longer than conventional forms of Vitamin C and is well-tolerated by the gastrointestinal tract.

Safrino

Item: 2184

Type/size: 30 vegetable capsules

Safrino can help:

- stabilize the emotional balance in acute and chronic stressful situations, including PMS and menopause;
- improve mood and sleep quality;
- reduce the physical impact of stress on the heart by maintaining a normal heart rate in stressful situations.

Ingredients:

- | | |
|---|--------|
| • Inositol (as Myo-Inositol) | 350 mg |
| • Saffron (Crocus sativus L.) stigma extract (Safr'Inside™) | 30 mg |
| • Zinc (as zinc oxide from capsule shell) | 2,3 mg |
| • Other ingredients | |

Safrino combines the valuable properties of "Safr'Inside™," a patented Iranian saffron extract, with those of Myo-Inositol. The product helps to stabilize the emotional balance during acute and chronic stress, as well as improve sleep and mood.

Active ingredients

Since ancient times, saffron has been used to help people cope with mental and emotional disorders. Saffron was cultivated as early as 1500 BC. It was and remains the most expensive spice in the world. Saffron stigmas are prized for their medicinal value because they have a positive effect on physical and mental health.

Safr'Inside™ is the only encapsulated saffron stigma extract available today.

The manufacturer of the extract, the French company Activ'Inside, uses high quality Iranian Sargol saffron.

The patented gentle extraction process preserves the active ingredients of saffron and provides the highest content of safranal (2%), which is 10 times more than in non-encapsulated saffron extracts. Saffron stigma extract slows down the breakdown of serotonin by 50%, while reducing the secretion of the hormone cortisol by 44%. Both of these hormones are directly related to ability of the body to cope with stress.

Myo-Inositol

Out of all the nine isomers of inositol, Myo-Inositol has the highest biological activity, is best absorbed, and therefore acts fastest. The highest concentration of inositol is found in the brain, since it plays an important role in the transmission of nerve impulses and is involved in the synthesis of dopamine and serotonin. These actions together can help increase the body's resistance to stress.

Selenium

Item: 2111

Type/size: 100 vegetable capsules

Selenium supports:

- cardiovascular function;
- immune system function;
- antioxidant activity, thus slowing the processes of aging in cells;
- skin elasticity.

Ingredients:

- | | |
|------------------------------------|--------|
| • Vitamin C (as Ascorbic acid) | 75 mg |
| • Selenium (as L-selenomethionine) | 75 mcg |
| • Other ingredients | |

Selenium is an essential micronutrient needed to protect the body from oxidation and detoxification. As selenium is a synergist of vitamin E, it can increase the antioxidant activity of this vitamin. Selenium is involved in iodine metabolism, because in the absence of selenium-containing enzymes, the body cannot produce thyroid hormone T3, which is necessary for normal physical and mental development of the body in general and the central nervous system in particular.

Selenium is found in the proteins of muscle tissue, including the heart muscle. It improves the elasticity of the vascular walls, the fluidity of the blood and the transport of nutrients and oxygen to the tissues, and also normalizes the arterial pressure.

Selenium has a pronounced effect on the increase in production of the major immune cells: leukocytes, lymphocytes, antibodies, macrophages, and interferon.

Selenium plays an important part in maintaining skin health. It helps decrease melanin production, which can significantly reduce skin pigmentation. Selenium becomes incorporated into the lipid fraction of cellular membranes and has a stabilizing effect, protecting the skin cells from the damage caused by heavy metals and free radicals. Selenium is also responsible for skin elasticity; it protects the skin from the aggressive effects of ultraviolet light and slows down skin ageing processes.

Shark Liver Oil Plus

Item: 2309

Type/size: 60 capsules

Shark Liver Oil Plus helps:

- strengthen the immune system;
- recovery after diseases and stress;
- reduce the level of bad cholesterol.

Ingredients:

- | | |
|-------------------------------|--------|
| • Shark liver oil | 320 mg |
| • Squalene (from shark liver) | 275 mg |
| • Other ingredients | |

The liver of deep-sea sharks is a valuable nutritional product which is often called "grey gold" for its content of unique nutrients. **Shark liver oil** contains squalene, squalamine, alkylglycerols, PUFA Omega-3, vitamins A, E, D. Since ancient times, fishermen have used shark oil to heal wounds, improve visual acuity, and treat diseases of the respiratory system and the gastrointestinal tract.

Main Components

Squalene and alkylglycerols extracted from the liver of deep-sea sharks have a tonic and immunomodulatory effect and help to reduce cholesterol levels.

Not all shark species contain alkylglycerols in the liver oil. Studies have shown that only deep-sea sharks that actively migrate at depths in cold water have alkylglycerols as a major component of the liver, along with squalene and triglycerides.

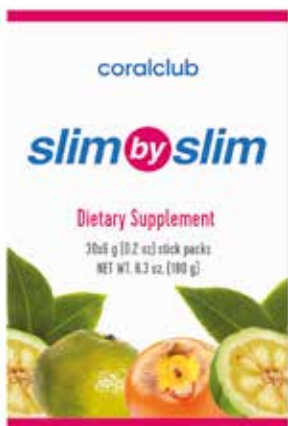

Alkylglycerols increase the secretion of more than 50 immune factors, including interleukins. Alkylglycerols also increase the production of cytokines that destroy viruses. They regulate the levels of white blood cells, red blood cells and platelets. They are involved in building the membranes of immunocompetent cells (macrophages and lymphocytes), blood cells and bone marrow.

Squalene is a strong natural antioxidant and anti-inflammatory. It captures oxygen and saturates cells and tissues therewith, prevents hypoxia and the destructive effect of free radicals. As a result, regenerative processes in damaged tissues are activated, cell regeneration is accelerated, and the aging of the body slows down. Squalene promotes the elimination of bad cholesterol through the gastrointestinal tract and prevents the formation of cholesterol plaques in the blood vessels.

Slim by Slim

Item: 91673/91674

Type/size: powder 10/30 stick packs

Slim by Slim helps:

- normalize lipid metabolism;
- normalize body weight;
- reduce appetite and cravings for sugar;
- normalize blood sugar levels;
- increase vitality and endurance.

Ingredients:

FOS (Cichorium intybus root fiber) 2 g, Citrus peel extract powder (Citrus unshiu) 0,8 g, Persimmon fruit extract powder (Diospyros kaki thunb) 0,7 g, Goji berry extract powder (Lycium chinense mill) 0,7 g, Garcinia fruit extract powder (Garcinia cambogia) 0,5 g, Green tea leaf extract powder (Camellia sinensis) 0,3 g, Taurine 0,25 g, Vitamin C (Ascorbic acid) 0,1 g, other ingredients.

Contains sweetener. May have a laxative effect if consumed in excess.

Thanks to its active herbal ingredients, **Slim by Slim** maximises weight change and easily deals with cholesterol by quickly splitting and flushing it from the body, which ensures low blood sugar. Slim by Slim also detoxifies and purifies the body.

Main Components

Cambodian Garcinia is a source of Hydroxycitric Acid (HCA). Once released from the fruit into the body, it has a threefold effect: it reduces the production of fatty acids and cholesterol, increases fat oxidation and controls appetite.

Inulin is a soluble fibre and an active prebiotic. It selectively stimulates the growth and metabolic activity of good bacteria. It also acts as an absorbent, helping cleanse the body of toxins and waste materials.

Citrus Peel Extract has a coffee-like stimulating effect. It contains high levels of flavonoids (naringin, rutin, quercetin and hesperidin). The extract reduces the overall level of lipids in the blood, liver, blood vessels and bile; it helps to speed up the breakdown of bile without any harmful side effects.

Persimmon extract is a source of many nutrients: dietary fibre, minerals (sodium, magnesium, potassium,

manganese, and calcium), easily digestible carbohydrates, vitamins A, C and P. These sugars are necessary for the production of glycogen in the liver and its nutrition.

Goji Berry Extract has antioxidant and energizing effects, significantly improves the digestive process, and has a beneficial effect on liver function. The weight loss associated with eating these fruits is linked to the high levels of antioxidants they contain. Their effect is the rapid dissolution of fats.

Green Tea Leaf Extract is also an active antioxidant and a source of biologically active ingredients. It stimulates metabolism, accelerating the oxidation of fats and increasing energy utilization. It also binds to and removes cholesterol and other toxic substances from the body.

Taurine is an essential amino acid found in the liver. It plays an important role in carbohydrate and lipid metabolism, helping to optimise energy use.

Vitamin C is one of the most effective antioxidants. It stimulates the detoxification enzyme systems of the liver, and normalizes blood cholesterol levels.

SuperBars

Super Bars are healthy protein bars that contain only organic, plant-based ingredients: nuts, raisins, fruit, berries, brown rice protein, biologically active ingredients such as spirulina or chlorella algae, sprouted flax seeds, quinoa, wheat or barley juice, etc. These nutritional ingredients are high in natural polyunsaturated fatty acids (PUFAs), otherwise known as omega-3, -6, and -9, which are necessary for the body, and contain a complex of amino acids, vitamins and minerals, and

fiber. The bars do not contain sugar, preservatives, artificial colors or flavor enhancers, and are high in flavor and nutritional value. The bars contain no sugar, preservatives, artificial colours or flavour enhancers and are high in taste and nutritional value. Children and adults alike will love them, as will anyone who leads a healthy lifestyle and cares about the health of their loved ones.

SuperBlueberry Bar

Item: 91649

Type/size: 38 g

Ingredients:

Organic Almond Butter, Organic Dates, Organic Blueberries, Organic Agave Nectar, Organic Sprouted Flax Seeds. May contain pieces of date pits, stems, nut or seeds.

Nutritional facts: Calories 170 kcal, total fat 7 g, total carb 19 g, dietary fiber 4 g, sugars 13 g, protein 5 g.

SuperMango Bar

Item: 91694

Type/size: 38 g

Ingredients:

Organic Mango, Organic Raisins, Organic Agave, Organic Quinoa Crisps, Organic Tapioca, Salt, Organic Olive Oil. May contain nut shells, or seeds.

Nutritional facts: Calories 130 kcal, total fat 1.5 g, total carb 30 g, dietary fiber 3 g, sugars 23 g, protein 0 g.

SuperChlorella Bar

Item: 91691

Type/size: 38 g

Ingredients:

Organic Cashew Butter, Organic Date Paste, Organic Tapioca, Organic Rice Protein, Organic Cashews, Organic Chlorella, Organic Alfalfa, Organic Pineapple, Organic Sesame Seeds. May contain pieces of date pits, stems, nut shells, or seeds.

Nutritional facts: Calories 140 kcal, total fat 7 g, sodium 90 mg, total carb 16 g, dietary fiber 1 g, sugars 9 g, protein 7 g.

Coral Protein Bar

Item: 91686

Type/size: 46 g

Ingredients:

Organic Rice Protein, Organic Agave Syrup, Organic Date Paste, Organic Almond Butter, Organic Chocolate Chips, Organic Cranberries, Organic Cranberry Juice Powder, Organic Sprouted Flax Seeds, Organic Sesame Seeds. May contain nut shells or seeds.

Nutritional facts: Calories 170 kcal, total fat 7 g, sodium 30 mg, total carb 19 g, dietary fiber 1 g, sugars 16 g, protein 9 g.

SuperSpirulina Bar with Macadamia Nuts

Item: 91681

Type/size: 38 g

Ingredients:

Organic Cashew Butter, Organic Date Paste, Organic Agave Syrup, Organic Rice Protein, Organic Raisins, Organic Macadamia Nuts, Organic Spirulina, Organic Sprouted Flax Seeds, Organic Quinoa Sprouts, Organic Sesame Seeds. May contain nut shells or seeds.

Nutritional facts: Calories 170 kcal, total fat 8 g, sodium 15 mg, total carb 19 g, dietary fiber 3 g, sugars 13 g, protein 5 g.

Choco Spirulina Bar

Item: 91692

Type/size: 44 g

Ingredients:

Oats, cashew nut oil, chocolate, rice syrup, agave, raisins, cashew nuts, spirulina, cinnamon.

Nutritional facts: calories 200 kcal, proteins 4 g, fats 9 g, carbohydrates 25 g, fibre 2 g.

Choco Almond Bar

Item: 91684

Type/size: 38 g

Ingredients:

Almond oil, agave, dates, chocolate chips, puffed rice, walnuts, cocoa powder, sprouted flax seeds, cocoa butter.

Nutritional facts: Calories 170 kcal, proteins 4 g, fats 8 g, carbohydrates 21 g, fibre 4 g.

Super-Flora

Item: 2150

Type/size: 90 vegetable capsules

Super-Flora helps:

- restore healthy gut microflora;
- prevent the development of flatus, heaviness in the stomach;
- improve metabolism and digestion.

Ingredients:

- | | |
|-----------------------------|----------------------------|
| • Bifidobacterium longum | 3x10 ⁹ CFU/caps |
| • Lactobacillus acidophilus | 2x10 ⁹ CFU/caps |
| • Inulin | 25 mg |
| • Other ingredients | |

Super-Flora is a highly effective synbiotic, consisting of a balanced combination of probiotics (Bifidobacterium longum and Lactobacillus acidophilus) and prebiotics (inulin) that work together to deliver real results for your gut microbiome. The ratio of lactobacillus to bifidobacterium corresponds to that found in a healthy digestive tract, and the inulin significantly improves the effectiveness of the probiotics and more importantly helps you grow your own personal microflora.

Main Components

Probiotics are foods or supplements that contain live microorganisms intended to maintain or improve the “good” bacteria (normal microflora) in the body. Bifidobacteria (Bifidobacterium longum) are the most numerous group of beneficial bacteria in the gut microbiome. The microflora of breastfed children is 80–90% composed of these bacteria. They hinder the growth and reproduction of harmful pathogenic and conditionally pathogenic bacteria in the GI tract, protecting the body from intestinal infections and fermentation in the gut. Along with other beneficial microorganisms they play an active role in digestion, accelerating the breakdown of proteins and carbohydrates, and improving the absorption of nutrients, generating their own enzymes to improve the digestive function.

Bifidobacteria take a part in the synthesis of many vitamins-K, B group, including B3 and B9, essential

amino acids, improving calcium and vitamin D uptake. These bacteria actively create lactic acid, which also suppresses pathogenic bacteria in the GI tract. Thanks to bifidobacteria in the body, allergic reactions are reduced, the immune system is strengthened and the digestive system begins to function properly.

Lactobacillus acidophilus and bifidobacteria have different habitats in the GI tract. Lactobacillus is essential for the proper functioning of bifidobacteria in particular. Many experiments have shown that where lactobacilli are deficient or absent, bifidobacteria levels are also reduced. Just like bifidobacteria, lactobacillus destroys pathogenic flora and helps to maintain a healthy balance in the microbiome. One of the most important functions of Lactobacillus is the role it plays in the immune system. Both types of beneficial microorganism (Bifidobacterium and Lactobacillus) activate the body's detoxification processes, reducing negative effects from pharmaceutical chemicals, poor-quality food, flatulence and heaviness in the stomach.

Inulin is a well-known plant-based prebiotic, a source of dietary fiber required by the gastrointestinal tract. Inulin stimulates the growth of the good bacteria already found in your large intestine, improving the health of your microbiome. Inulin is also highly absorbent, improving intestinal peristalsis and helping to flush out toxins.

Tasty B

Item: 2187

Type/size: 30 chewable tablets

Tasty B helps:

- support the health of the nervous and cardiovascular systems;
- increase energy levels;
- cope with fatigue and apathy;
- improve concentration, memory, and intelligence;
- preserve the beauty of skin, hair, and nails.

Ingredients:

vitamin B1 (as thiamine hydrochloride) 1,1 mg, vitamin B2 (as riboflavin) 1,4 mg, niacin (as nicotinamide) 16 mg, pantothenic acid (as calcium-D-pantothenate) 6 mg, vitamin B6 (as pyridoxine hydrochloride) 1,4 mg, biotin 50 mcg, folic acid 200 mcg, vitamin B12 2,5 mcg, other ingredients.

Tasty B is a balanced complex of B vitamins in chewable tablet form with a pleasant lemon flavour. The product is designed to address a vitamin B deficiency, which often occurs as a result of an unbalanced diet, increased stress levels, intense physical activity, unhealthy habits, frequent consumption of caffeine (coffee, energy drinks, or strong tea), or in people taking antibiotics or diuretics. A lack of B vitamins in the body can lead to chronic and rapid fatigue, neurological disorders, cognitive impairment, and various skin and hair problems.

Active ingredients

Vitamin B1 (thiamine) takes an active part in the regulation of cellular metabolism, as well as the metabolism of carbohydrates, proteins, and fats. It is important for nervous system function, as it improves memory and intelligence, slows down the aging of brain cells, and helps to stabilize the emotional state.

Vitamin B2 (riboflavin) takes part in the synthesis of ATP molecules, the "fuel of life." Put simply, it is needed for energy production. It is also important for the health of the liver and eyes, and participates in the synthesis of nerve cells. Finally it helps in the production of blood.

Vitamin B3 (niacin) supports optimal metabolism and energy production and helps control cholesterol levels in the body, preventing the formation of atherosclerotic plaques on the walls of blood vessels. It also helps relieve anxiety, apathy, and stress.

Vitamin B5 (pantothenic acid) contributes to the ef-

ficient functioning of the central nervous system and strengthens the immune system. It also improves the overall tone of the body, fights fatigue, and increases endurance.

Vitamin B6 (pyridoxine), along with folic acid and vitamin B12, helps to maintain the health of the nervous and cardiovascular systems. It also takes part in the synthesis of proteins, hormones, and erythrocytes. It is also necessary for the complete absorption of vitamin B12.

Vitamin B7 (biotin), the "beauty vitamin," is required for cell growth and division, as it takes part in the synthesis of nucleic acids. It is necessary for the formation of keratin (the main "building material" for hair) and the normal formation of hair follicles. It contains sulfur, which is necessary for the synthesis of collagen, and therefore, for maintaining the firmness and elasticity of the skin.

Vitamin B9 (folic acid) has a positive effect on the growth and development of all tissues and contributes to the normal immune and cardiovascular system function. It participates in the synthesis of amino acids, enzymes, and hematopoiesis, and it helps to normalize the function of the liver and the digestive system as a whole. It is essential for maintaining women's reproductive health.

Vitamin B12 (cyanocobalamin) helps prevent anemia, increases energy levels, maintains a healthy nervous system, and improves concentration, memory, and intelligence.

Ultimate Max

Item: 2175

Type/size: 60 vegetable capsules

Ultimate Max helps:

- normalize the vitamin and mineral balance in the body;
- strengthen the immune system;
- increase efficiency and vitality;
- prolong active longevity.

Vitamins: A (beta-carotene) 900 µg (3000 IU), D3 5 µg (200 IU), E (tocopheryl succinate and tocotrienols) 20 mg, C (calcium ascorbate and magnesium ascorbate) 80 mg, B1 1,1 mg, B2 (riboflavin 5-phosphate) 1,4 mg, nicotinamide 8 mg, B6 (pyridoxal 5-phosphate) 1,4 mg, B12 (methylcobalamin) 2 µg, pantothenic acid 5 mg, folic acid (Metafolin®) 100 µg, biotin 50 mcg, choline 50 mg, inositol 50 mg, PABA (para-aminobenzoic acid) 50 mg.

Minerals: magnesium (citrate) 20 mg, potassium (citrate) 10 mg, zinc (citrate) 5 mg, iodine (from kelp) 50 µg, selenium (L-selenomethionine) 50 µg, manganese (gluconate) 1 mg, copper (bisglycinate) 0,5 mg, molybdenum (sodium molybdate) 12 mcg, chromium (picolinate) 40 mcg.

Phytonutrients: citrus bioflavonoid complex (lemon, grapefruit, orange, lime, tangerine) 50 mg, herbal complex (citrus hesperidin, bilberry berry extract, acai and tomato fruits), other ingredients.

Ultimate Max is a modern balanced complex of vitamins, minerals and plant components in an active bioavailable form, which helps to compensate for the deficiency of essential nutrients necessary for normal metabolism and the functioning of all systems and organs.

Action of active ingredients

Vitamin A is called the "vitamin of vision", as it supports the normal function of the retina and helps to adapt vision to low light conditions. It promotes normal metabolism, and supports the immune and reproductive systems. It is presented in the product in the form of beta-carotene, which is one of the most easily and fully-digestible forms of vitamin A.

Vitamin C is an essential antioxidant that strengthens the immune system and protects the cells of the body from damage. Essential for collagen synthesis, it accelerates the healing of skin lesions. The source of vitamin C in this product is mineral ascorbates. Such compounds are called the buffered form of vitamin C. Vitamin C in this form is more stable, less irritating to the mucous membranes and also provides the body with magnesium and calcium.

Vitamins D and E included in the product are of natural origin. They are necessary for the normal functioning of the immune, nervous, cardiovascular, musculoskeletal, and reproductive systems.

The product contains the entire spectrum of B vitamins, which are important for metabolism and energy, the functioning of the nervous, and cardiovascular systems, digestion, and the health of the skin, hair and nails. The need for B vitamins increases during stressful situations and high physical exertion. The product contains vitamins B6, B9, and B12 in modern bioactive forms - pyridoxal phosphate, the patented Metafolin® formula, and methylcobalamin, respectively.

Minerals zinc, magnesium, chromium, copper, and manganese in the composition of the product are represented by organic salts - zinc and magnesium citrates, chromium picolinate, copper bisglycinate, manganese gluconate. Organic compounds have significantly better bioavailability and efficiency.

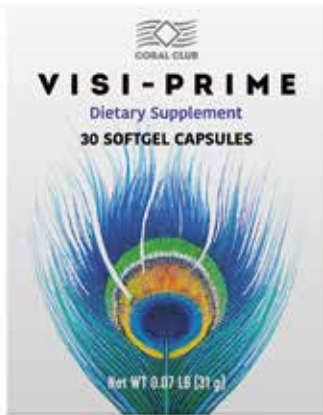

The source of **iodine** is the brown seaweed kelp. Iodine is involved in the synthesis of thyroid hormones, which in turn regulate all types of metabolism in the body.

Bioflavonoids from various citrus and berry crops - lemon, grapefruit, orange, lime, tangerine, blueberry, acai and tomato - are excellent antioxidants, the best protectors of the heart and blood vessels. In synergy with vitamins, they provide elasticity of blood vessels, improve blood microcirculation, and prevent the formation of blood clots.

Visi-Prime

Item: 2114

Type/size: 30 capsules

Visi-Prime helps:

- reduce eye fatigue;
- slow down the age-related loss of vision;
- protect the eyes from the influence of external factors (UV rays, working with computer, etc.);
- prevent dry eye symptoms.

Ingredients:

Vitamin E (as d- α -tocopherol) 12 mg (18 IU), Riboflavin 1,4 mg, Zinc (as gluconate) 10 mg, Lutein 10 mg, Zeaxanthin 2 mg, Fish Oil 500 mg (Omega 3 Fatty Acids 300 mg, incl. DHA (Docosahexaenoic acid) 250 mg, EPA (Eicosapentaenoic acid) 30 mg), other ingredients.

Visi-Prime was created using top-quality raw materials and production technology.

The product contains PUFAs - Omega-3, antioxidants lutein and zeaxanthin, vitamins - B2 and E, as well as zinc, which can help to ensure healthy eyes, better vision and overall good health.

Main Components

Polyunsaturated Fatty Acids Omega-3 help to prevent dry eye symptoms, the development of inflammatory processes and to benefit overall eye health.

Fatty acids are important nutrients that are essential for normal functioning of cells, muscles, nerves and organs.

Lutein and zeaxanthin are two types of carotenoids (yellow to red pigments found widely in vegetables and other plants) with antioxidant properties that help to protect eye cells from UV-induced damage and prevent retinal degeneration due to aging or the influence of external factors.

Riboflavin, also known as vitamin B2, is one of the eight B vitamins, which plays an important role in the health of the liver, skin, hair, and eyes. Due to poor diet or other health issues, middle-aged individuals are often at risk of riboflavin deficiency, which can be expressed through symptoms such as eye fatigue, light sensitivity and chronic tiredness. Along with other nutrients, riboflavin is essential for maintaining normal vision.

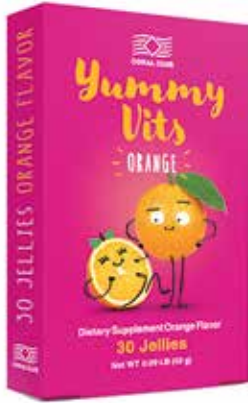

The main function of vitamin E is to protect the body from free radicals and eliminate them. It is an essential vitamin that helps protect certain parts of the eye that are particularly susceptible to oxidative damage.

Zinc is an essential trace mineral that is associated with numerous enzymatic activities, especially those with antioxidant property. Zinc helps vitamin A to create a pigment called melanin, which protects the eyes.

Yummy Vits Orange

Item: 2126

Type/size: 30 jellies

Yummy Vits can help:

- contribute to the proper development of the musculoskeletal system during active growth;
- support the immune system and quickly recover energy after illnesses;
- compensate for deficiency of vitamin and mineral deficiencies.

Ingredients:

Vitamin A (as retinyl palmitate) 0,49 mg (833 IU), Vitamin D3 (as cholecalciferol) 5 mcg (200 IU), Vitamin E (as d- α -tocopherol) 3,5 mg (5 IU), Vitamin B6 (as pyridoxine HCl) 0,6 mg, Folate (as folic acid) 100 mcg, Vitamin B12 (as cyanocobalamin) 0,5 mcg, Pantothenic acid (as D-calcium pantothenate) 1 mg, Iodine (as potassium iodide) 20 mcg, Selenium (as sodium selenite) 10 mcg, Choline (as choline bitartrate) 20 mg, other ingredients.

Contains sweeteners. May have a laxative effect if consumed in excess.

Yummy Vits is a vitamin and mineral complex that was created for the healthy growth and development of children. The innovative technology behind the Con-Cordix® ensures high bioavailability of all the vitamins in the product. Chewable jellies with a delicious flavor will satisfy even the pickiest eaters.

Main Components

Vitamin A, also known as retinol, is a fat-soluble vitamin that functions as an antioxidant. It plays a crucial role in cell growth and differentiation, supporting the normal formation and function of various organs, including the heart, lungs, and kidneys. Vitamin A also plays a vital role in vision, as it helps form pigments in the eyes that allow us to adjust to different levels of light. Night vision, in particular, relies heavily on vitamin A, making it essential for our ability to see in low-light conditions.

Vitamin D3, also known as cholecalciferol, is known for its important role in maintaining healthy teeth, bones, and cartilage. Vitamin D's primary function is to help the body absorb calcium and magnesium, two essential minerals for strong bones. It also helps the body utilize phosphorus and absorb and metabolize vitamin A.

Vitamin E (d- α -tocopherol) is a fat-soluble antioxidant that helps maintain healthy cells and, consequently, a healthy body. It is crucial for children's good health and development, as it helps boost the immune system.

As an antioxidant, it helps to stabilize cell membranes and protect the tissues of the skin, eyes, and liver.

Vitamin B6 (pyridoxine hydrochloride) helps the body metabolize fats and proteins, maintain proper functioning of nerves, and produce red blood cells. It is important for cardiovascular, digestive, immune, muscular, and nervous system function.

Folic acid (vitamin B9) is crucial for proper brain function and plays an important role in mental and emotional health.

Vitamin B12 (cyanocobalamin) helps in healthy regulation of the nervous system. It is needed for concentration and cognitive processes.

Pantothenic acid, also known as d-calcium pantothenate, provides a variety of benefits for the human body. It is essential for the production of red blood cells and the synthesis of cholesterol, among other things.

Iodine (as potassium iodide) is an important trace mineral that is needed for normal thyroid function, and for the production of thyroid hormones.

Selenium is involved in maintaining normal liver function, protein synthesis and helps to protect the body from toxic minerals.

Choline is a water-soluble nutrient that has a number of important responsibilities in both the brain and body and is integral for overall health.

Zaferan

Item: 91873

Type/size: 60 capsules

Zaferan helps:

- promote liver health;
- reduce inflammation;
- normalize metabolism;
- produce a strong antioxidant effect.

Ingredients:

- Curcuma (Curcuma longa) extract 120 mg
- Other ingredients

Zaferan is a turmeric-based dietary supplement that promotes liver and gallbladder health. Turmeric is remotely related to ginger. No wonder that the people of India, China, Ceylon and Java call it “yellow ginger”. Curcumin is the active ingredient that determines the color and a subtle ginger flavor of this spice.

Main Components

A relative of ginger, this bright yellow-orange spice is common in Indian, South-East Asian, and Middle Eastern cooking. The powdered rhizome of **turmeric** has been extensively used in India and other South Asian cuisines, and is an integral part of Ayurvedic medicine for a broad range of conditions. In particular, curcumin, a major active component of turmeric, is one of the most studied botanicals for its anti-inflammatory, antioxidant properties.

Turmeric has been used as a spice and medicinal plant in India for thousands of years. It has powerful anti-inflammatory effects and is a very strong antioxidant. Curcumin boosts levels of the brain hormone, which increases the growth of new neurons and fights various degenerative processes in the brain. Not only can curcumin help modulate inflammation throughout the cardiovascular system it also supports normal cholesterol, triglyceride, and blood sugar levels.

Zinc Methionine 15 mg

Item: 2306

Type/size: 90 vegetable capsules

Zinc Methionine 15 mg:

- helps to strengthen the immune system;
- supports the beauty and health of skin, hair and nails;
- slows down early aging;
- supports cognitive health and the functioning of the visual organs;
- promotes reproductive function in men and women.

Ingredients:

- Zinc (mono-L-methionine sulfate) 15 mg
- Other ingredients

Zinc Methionine 15 mg is a source of bioavailable zinc, an essential mineral for human health. The daily need for zinc is measured in milligrams, but it is vital for the balanced functioning of the whole body. A good source of zinc is animal products – meat, fish, seafood, eggs, dairy products. It is also found in plant foods – nuts, legumes. However, the absorption of zinc from food is hindered by phytates – special compounds present in many plant sources: cereals, legumes, nuts, root crops, which bind zinc and prevent its absorption in the intestine. Therefore, even in developed countries, mild zinc deficiency is common.

The compound of the mineral zinc with the amino acid methionine, presented in the product Zinc Methionine 15, protects zinc from the negative effects of phytates and improves its absorption.

Action of active components.

The body of an adult contains only 1.5-3 g of zinc, but this trace element is present in all organs and tissues. The greatest amount of zinc is found in bones and muscles, prostate gland, sperm, skin, hair, blood cells, retina of the eyes.

Zinc participates in all types of metabolism, its role in protein and carbohydrate metabolism is especially great. In particular, it is required for the synthesis of collagen protein and is important for the restoration of

skin, bone formation, hair and nail growth. Zinc plays a critical role in the proper synthesis and structuring of the hemoglobin protein, which allows hemoglobin to effectively perform its main function – to transport oxygen throughout the body. Zinc is involved in the process of synthesis, storage and release from pancreatic cells of the hormone insulin, which regulates blood sugar levels.

Zinc is also necessary for the health of the reproductive system. It plays a role in the synthesis of male and female sex hormones, participates in the process of spermatogenesis in men, affects the development of follicles in women.

Zinc participates in the processes of division, specialization and activation of immune cells, which helps to strengthen the immune response.

Zinc participates in the formation of active forms of vitamins A, D, C, B6. It protects vitamin E from oxidation and helps maintain its normal concentration in the blood. Together with vitamin A, it helps protect the eyes from UV radiation, maintains the quality of night vision.

Zinc exhibits pronounced antioxidant activity, protecting cells from the destructive effects of oxidants, prolonging the youth of the body.

Coral Club Complete Solutions

The Coral Club Concept of Health is a new, systematic approach to improve people's quality of life.

Our many years of experience in the production of food supplements has been used to create complete solutions - targeted programmes designed to solve specific health problems. A well-thought-out combination of active components and a clear application scheme allows you to achieve excellent results.

To create effective programs, Coral Club specialists select synergistic combinations of products, and give recommendations on nutrition and lifestyle. Such a combined approach guarantees positive results in the healing and prevention of various health problems.

Advantages of complete solutions:

- systematic approach
- complete health solution
- enhanced action of components
- simple and convenient
- synergetic performance
- great products at a great price

The price of the products in the pack is lower than the retail price of each product sold individually.

C-Pack

Item: 803700

The set helps:

- improves heart muscle functions;
- protects from oxidative stress;
- supports a normal sinus rhythm;
- supplies heart cells with energy.

Ingredients:

- Pentokan K⁺ (60 effervescent tablets)
- Coenzyme Q10 (60 capsules)
- Coral Taurine (60 capsules)
- Coral Magnesium (90 capsules)

C-Pack is a set for a healthy heart. The products in the set are perfectly-combined to provide nutrients and energy to the cells of the heart and ensure the proper functioning of the cardiovascular system.

Pentokan K⁺ is a source of potassium, vitamin C and ribose. Potassium is an essential nutrient used to maintain the electrolyte balance in the body. Potassium plays an important role in ensuring good heart health. It is also essential for energy production for physical activity. Effervescent tablets increase the bioavailability of potassium for the body.

Coenzyme Q10 is a source of ubiquinone and plays an important role in the production of cellular energy. It is necessary to maintain the normal functioning of the heart muscle, regulate metabolism, and improve physical endurance. Coenzyme Q10 helps slow down aging by normalizing the function of organs and im-

proving physical performance. This product is especially useful for those who engage in increased physical activity, as it helps to increase energy levels and reduce fatigue.

Coral Taurine is a highly bioactive taurine amino acid, has a beneficial effect on the heart muscle functioning; regulates metabolism of calcium, potassium, magnesium and sodium, responsible for a stable heart rhythm. This product improves energy exchange, helps to prevent heart muscle aging.

Coral Magnesium is a source of magnesium. This dietary supplement actively supports cardiovascular health and neuromuscular tissue function. The product contributes to the synthesis of enzymes, it normalizes metabolism, and actively regulates the calcium and sodium balance on a cellular level.

Colo-Vada Light

Item: 120100

The set helps:

- support the digestive, nervous, and cardiovascular systems;
- promote mental health.

Ingredients:

- **Stage 1:**
- D-Tox I (20 vegetable capsules)
- D-Tox II (20 vegetable capsules)
- GreenGreen (20 vegetable capsules)
- **Stage 2:**
- Light Mix (12 stick packs)
- **Stage 3:**
- Assimilator (20 vegetable capsules)
- GreenGreen (20 vegetable capsules)
- Super-Flora (30 vegetable capsules)

Colo-Vada Light is a complete solution to detoxification. Dr. Albert Zehr's latest program is a hassle-free way to improve health. This 14-day program includes a three-stage process: detoxification, purification, and restoration. Specially formulated plant-based supplements, probiotics, and enzymes help effectively cleanse the body of toxins, improve digestive function, and restore health.

Stage 1

DETOX - 5 days

Contains 3 plant extract complexes, which Dr. Albert Zehr's latest program is a hassle-free way to improve health. This 14-day program includes a three-stage process: detoxification, purification, and restoration. Specially formulated plant-based supplements, probiotics, and enzymes help effectively cleanse the body of toxins, improve digestive function, and restore health. The GreenGreen complex is rich in dietary fibre, vitamins and minerals, which improve the functioning of the gut as well as the expelling of by-products of metabolism and toxins.

Stage 2

PURGE - 4 days

The effect of the active components in Light Mix (psyllium husk powder, flax seed and prunes) is enhanced by the fiber in GreenGreen. The powdered drink works wonders for the digestive system. A mix of vegetable dietary fiber cleanses the intestinal walls and improves motility. It cleanses, restores the mucous membranes, and positively affects the microflora.

Stage 3

RESTORE - 5 days

After the cleanse, the probiotics, enzymes and phytonutrients contained in GreenGreen restore the digestive system and establish a solid base for good health.

We recommend drinking at least 1.5 liters of water with Coral-Mine each day during the program and following some general dietary guidelines. Drinking water is necessary for water-salt and acid-alkaline balances and is beneficial for digestive system functions.

Coral Detox

Item: 803500

The set contributes to:

- to boost immunity;
- to decrease allergy symptoms;
- to regulate acid-base balance;
- to improve skin condition.

Ingredients:

- Assimilator (90 capsules)
- H-500 (60 capsules)
- Coral Lecithin (120 capsules)
- Coral-Mine (30 sachets)

Coral Detox is a combination of products that help to detoxify the body.

Every day toxins from external and internal sources affect our health. Toxins can enter our body through the air that we breathe and through the food we eat and drink. Our body naturally produces toxins as part of natural processes inside the body. 80% of toxins are water-soluble, and 20% of toxins are fat-soluble.

The body must constantly remove toxins from our body, but if that process is not functioning well, it can lead to high levels of toxicity in the body. It is very important to stay hydrated so that 80% of the toxins will be expelled with urine. Only enzymes and bile can break down fat-soluble toxins. When fat-soluble toxins are converted into water-soluble substances, they can be excreted from the body.

Assimilator and Coral Lecithin work together to help remove fat-soluble toxins from the body. Assimilation helps promote a healthy metabolism and slow down the creation of toxins.

H-500 is a powerful antioxidant that increases endurance during any physical activity, sports or work. It increases the energy potential of the body by stimulating cellular energy production, while improving performance during physical and mental labor. It keeps healthy cells from oxidation and restores the body's natural pH balance.

Coral Lecithin is a product, which helps to promote health of the heart, brain and liver.

Coral-Mine is a natural product made from deep-sea corals (scleractinians) collected in the Sea of Japan near the islands of Okinawa and Tokunoshima, Japan. It also contains calcium, magnesium, potassium, iron, phosphorus, sulfur, silicon, chromium, manganese, zinc and other minerals. A sachet of beneficial minerals placed in water helps to restore the water-salt balance and enriches the water with essential nutrients. The minerals promote the growth of bone and connective tissue, which has a positive impact on overall health and provides a mild tonic effect.

Coral Detox Plus

Item: 803600

The set helps:

- improve skin condition;
- alleviate allergy symptoms;
- support immune function;
- increase productivity.

Ingredients:

- Assimilator (90 capsules)
- H-500 (60 capsules)
- Coral Lecithin (120 capsules)
- Coral-Mine (30 sachets)
- Pentokan K⁺ (40 effervescent tablets)
- Coral Alfalfa (120 capsules)

Coral Detox Plus is an advanced version of the Coral Detox set that helps to detoxify the body, protect cells, increase vitality and boost the immune system.

Assimilator and **Coral Lecithin** help remove fat-soluble toxins. Assimilator promotes a healthy metabolism and slows down toxin creation. Coral Lecithin protects cell membranes from damage by toxins.

H-500 is a powerful antioxidant that increases endurance during any physical activity, sports or work. It increases the energy potential of the body by stimulating cellular energy production, while improving performance during physical and mental labor. It keeps healthy cells from oxidation and restores the body's natural pH balance.

Coral Lecithin is a product, which helps to promote health of the heart, brain and liver.

Coral-Mine is a natural product made from deep-sea corals (scleractinians) collected in the Sea of Japan

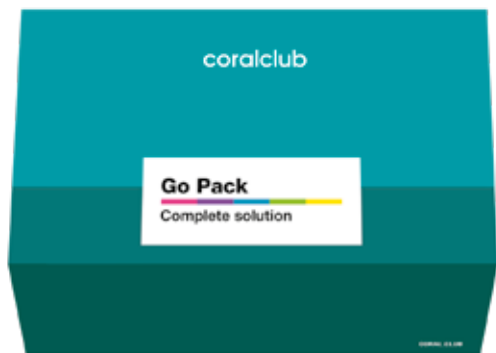

near the islands of Okinawa and Tokunoshima, Japan. It also contains calcium, magnesium, potassium, iron, phosphorus, sulfur, silicon, chromium, manganese, zinc and other minerals. A sachet of beneficial minerals placed in water helps to restore the water-salt balance and enriches the water with essential nutrients. The minerals promote the growth of bone and connective tissue, which has a positive impact on overall health and provides a mild tonic effect.

Pentokan K⁺ is a unique combination of potassium, vitamin C and ribose. Promotes effective regulation of intracellular metabolism, boosts energy levels.

Coral Alfalfa is a dietary supplement based on the leaf and concentrated juice of the alfalfa plant. It contains biologically active substances that improve overall health, stimulate the immune system, boost vitality, improve digestion, have a detoxifying effect.

Go Pack

Item: 8011096

The set helps:

- maintain digestive, nervous, and cardiovascular function.
- improve emotional and mental health.

Ingredients:

- Griffonia (60 capsules)
- Coral Lecithin (120 capsules)
- Coral-Mine (30 sachets)
- Chewable Papaya (90 tablets)
- Super-Flora (90 capsules)

Go Pack is a combination of five products that help improve the health of the digestive, cardiovascular, and nervous systems, as well as improve metabolism and help cope with stress.

A properly-functioning digestive system is one of the main ingredients good health. This is a complex process in which enzymes, probiotics, prebiotics, and bile acids are all involved at various stages. Therefore, it is necessary to maintain their sufficient presence in the body.

The complex **Super-Flora** is a balanced source of lactobacillus, bifidobacteria, and inulin – a prebiotic.

Chewable Papaya chewable tablets help improve the quality of the digestive process.

Coral Lecithin is an antioxidant that plays an important role in the work of the cardiovascular, nervous, and immune systems. It is also involved in regulating the metabolism of fat. Lecithin is the main component of all cell membranes in the body.

Griffonia seed extract contains the amino acid 5-hydroxytryptophan, which is the precursor to the hormone serotonin. Serotonin, also known as the "joy hormone", is a natural antidepressant that helps regulate mood and sleep.

Coral-Mine, a mineral composition, is sourced from scleractinia, a deep-sea corals. It improves the taste of water, and normalizes the water-salt balance of the body.

HG Onestack

Item: 80510030

The set helps:

- improve bowel function - one of the most important organs for maintaining proper organ function overall;
- provide immune support and increase the body's resistance to infections and viruses;
- normalize metabolism;
- improve the skin and overall health.

Ingredients:

AquaOx (10 capsules), Assimilator (10 capsules), Cascara Sagrada (10 tablets), Coral Alfalfa (20 capsules), Coral Artichoke (10 capsules), Coral Black Walnut (20 capsules), Coral Burdock Root (20 capsules), Coral Carnitine (10 capsules), Coral Lecithin (20 capsules), Coral Magnesium (20 capsules), Coral Taurine (10 capsules), Coral-Mine (30 sachets), GreenGreen (10 capsules), O!Mega-3 TG (10 capsules), Chewable Papaya (20 tablets), Super-Flora (30 capsules), Zaferan (30 capsules)

A healthy interaction between our immune system and the gut microbiota is crucial for the maintenance of our body's homeostasis and health.

The targeted program **Healthy Gut** is a multi-faced approach to your health. Healthy Gut is designed for 30 days and includes 3 phases. Achieving a Healthy Gut is a long-term process, which provides consistent and gentle recovery of the intestine.

Phase 1

Super-Flora (10 capsules), Coral Black Walnut (20 capsules), Chewable Papaya (10 tablets), Coral Alfalfa (10 capsules), Coral Lecithin (10 capsules), Coral Carnitine (10 capsules), Zaferan (10 capsules), Coral Burdock Root (10 capsules), Cascara Sagrada (10 tablets), Coral-Mine (10 sachets).

The 1st phase includes cleansing of the intestine. The body is released from toxins and parasites (helminth).

Phase 2

Super-Flora (10 capsules), Coral Artichoke (10 capsules), Assimilator (10 capsules), Coral Lecithin (10 capsules), AquaOx (10 capsules), Zaferan (10 capsules), Coral Magnesium (10 capsules), Coral-Mine (10 sachets).

The 2nd phase includes products that contribute to the recovery of good bacteria, which optimize diges-

tion and regulate the synthesis of enzymes. It is very important to restore these functions. Normalization of the intestinal microbiome functions is the main purpose of this phase. Different groups of microorganism are balanced by restraining the growth of each other.

Phase 3

Super-Flora (10 capsules), Chewable Papaya (10 tablets), Coral Taurine (10 capsules), O!Mega-3 TG (10 capsules), Coral Alfalfa (10 capsules), Zaferan (10 capsules), Coral Magnesium (10 capsules), GreenGreen (10 capsules), Coral Burdock Root (10 capsules), Coral-Mine (10 sachets).

In this phase, the digestive function returns to normal. The restoration of beneficial bacteria population continues, which optimizes digestion. To increase the number of beneficial bacteria and provide them with the necessary nutrition, the program includes products with a high content of dietary fiber. Enzymes contribute to the proper digestion and assimilation of nutrients. Vitamins and minerals are essential for the body. Amino acids help restore protein metabolism, while antioxidants protect tissues and promote accelerated regeneration of the digestive system.

Hydramax

Item: 803800

The set helps:

- enriches the body with beneficial minerals;
- provide antioxidant support;
- regulate the water-salt and pH balance.

Ingredients:

- Coral-Mine (30 sachets)
- Pentokan K⁺ (60 effervescent tablets)
- H-500 (60 capsules)

This pack supports optimal hydration of the whole body. The products in the pack help to normalize the water-salt balance as well as the acid-base balance in the body, as well as improve the quality of water and help the body increase working capacity and stamina.

The active components of the products included in the pack are involved in many physiological and biochemical processes in the body that are related to water. This pack helps in maintaining health and balance (homeostasis) in the body.

Water is an essential part of our bodies. It makes up a significant percentage of our body's composition and is one of the major building blocks that sustains life. Water serves a number of essential functions to keep us all going. The biochemical reactions that sustain life need a fluid in order to operate. As the body can't store water, we need fresh supplies every day to make up for losses from the lungs, skin, urine and feces. The amount we need depends on our body size, metabolism, the weather, the food we eat and our activity levels.

Staying well-hydrated is definitely a must. Fluid is essential! In order to increase vital energy and maintain the normal functioning of the body, an integrated approach is needed.

Coral-Mine is a natural product made from deep-sea corals (scleractinians) collected in the Sea of Japan near the islands of Okinawa and Tokunoshima, Japan. It also contains calcium, magnesium, potassium, iron, phosphorus, sulfur, silicon, chromium, manganese, zinc and other minerals. A sachet of beneficial minerals placed in water helps to restore the water-salt balance and enriches the water with essential nutrients. The minerals promote the growth of bone and connective tissue, which has a positive impact on overall health and provides a mild tonic effect.

Pentokan K⁺ promotes effective regulation of intracellular metabolism. Potassium is an essential nutrient used to maintain the electrolyte balance in the body. This mineral is essential for the body to produce energy for physical activity.

H-500 is a powerful antioxidant that increases endurance during any physical activity, sports or work. It increases the energy potential of the body by stimulating cellular energy production, while improving performance during physical and mental labor. It keeps healthy cells from oxidation and restores the body's natural pH balance.

I-Pack

Item: 80390009

The set helps:

- support the immune system;
- neutralize the effects of free radicals;
- increase the body's resistance to disease;
- speed up recovery.

Ingredients:

- Pure-C 500 mg (60 capsules)
- D-Spray 2000 (10 ml)
- Pau D'Arco with Selenium (90 capsules)
- Shark Liver Oil Plus (60 capsules)
- Coral-Mine (30 sachets)

I-Pack is designed to strengthen the body's defences and maintain the normal functioning of the immune system. The base of the pack is made up of vitamins and minerals that are fundamental to supporting immunity. The composition of the pack is enhanced with natural nutrients that increase resistance to various infections and help the body recover therefrom.

Pure-C 500 mg. This water-soluble vitamin is not synthesized and not accumulated in the body, so it should come from food regularly and in sufficient quantities. Vitamin C stimulates the synthesis of the protective protein interferon and is involved in the formation of the immune response. Acting as the powerful antioxidant, it binds free radicals that weaken the body's immune system.

It activates the synthesis of collagen accelerating the recovery and healing of tissue. The liposomal form increases the bioavailability of the vitamin and protects the gastrointestinal mucosa from the irritating effects of ascorbic acid.

D-Spray 2000 contains the natural vitamin. Vitamin D3 plays the important role in the assimilation of calcium and phosphorus, regulates the immune and cardiovascular systems. A sufficient amount of this vitamin

is necessary for timely activation of the immune cells. Vitamin D3 supports antibacterial and antiviral immunity. In addition, this "sunny" vitamin increases the resistance of the nervous system to various stress factors preserving the reserve of body defenses.

Pau D'Arco with Selenium contains valuable substances naphthoquinones (lapachol, beta-lapachol) which activate various types of the immune cells and interfere with the vital activity of pathogenic microorganisms. Antioxidants selenium and vitamin C synergistically complement formation of the optimal body's immune response.

Shark Liver Oil Plus is the source of squalene and alkylglycerides. Squalene strengthens both specific and non-specific (innate) immunity, improves oxygen supply to cells, promotes tissue healing and regeneration. Alkylglycerides increase the body's resistance to various diseases accelerating synthesis of the immune cells.

Coral-Mine is a mineral composition of relict corals, contains salts of useful macro- and microelements. Regular consumption of water with Coral-Mine provides constant supply of minerals necessary for many biochemical and physiological processes.

Mental Force

Item: 806100

The set helps:

- improve long-term and short-term memory;
- improve concentration;
- improve mood;
- normalize the sleep-wake cycle;
- improve mental performance.

Ingredients:

- Coral-Mine (30 sachets)
- Coral Carnitine (10 capsules)
- Coral Lecithin (30 capsules)
- Coral Magnesium (20 capsules)
- Coral Taurine (30 capsules)
- Memo-Prime (30 capsules)
- O!Mega-3 TG (30 capsules)
- GreenGreen (30 capsules)

Mental Force helps to improve short-term and long-term memory, increase concentration, improve mood, normalize sleep-wake cycles, and improve mental performance. It includes 8 products that have a highly beneficial effect on memory, on the ability to concentrate and on the central nervous system as a whole. Each product provides the necessary nutrients exactly when needed and works in synergy with other products. Mental Force is a 3-phase process, 10 days each. Each phase is designed to work together with specific dietary recommendations.

Phase 1

Coral-Mine (10 sachets), Coral Lecithin (10 capsules), Coral Magnesium (10 capsules), Coral Taurine (10 capsules), Memo-Prime (10 capsules), O!Mega-3 TG (10 capsules).

At this phase, the active components protect brain cells from the effects of oxidative stress, positively affect cerebral blood flow, and normalize metabolism in brain cells. The purpose of this phase is to reduce fatigue and irritability.

Phase 2

Coral-Mine (10 sachets), Coral Lecithin (10 capsules), Coral Magnesium (10 capsules), Coral Taurine (10 capsules), Memo-Prime (10 capsules), O!Mega-3 TG (10 capsules), GreenGreen (20 capsules).

The second phase is about additional nutrition and oxygenation of brain cells. Omega-3 fatty acids are polyunsaturated fats responsible for most of the brain and mental health benefits of fish oil. This phase purpose is to increase concentration, improve short-term and long-term memory.

Phase 3

Coral-Mine (10 sachets), Coral Carnitine (10 capsules), Coral Lecithin (10 capsules), Coral Taurine (10 capsules), Memo-Prime (10 capsules), O!Mega-3 TG (10 capsules), GreenGreen (10 capsules).

The third phase is designed to improve mental performance and to provide the brain with energy.

Drink at least 1.5 litres of water with Coral-Mine every day. Drinking water helps to normalize the water-salt balance and the acid-base balance in the body.

Nutripack

Item: 803402

The set helps:

- provide important nutrients necessary for the normal functioning of the cardiovascular, nervous, digestive, and immune systems;
- normalize the metabolic and regeneration processes in the body;
- provide dietary diversity.

Ingredients:

- Coral Alfalfa (120 capsules)
- Premium Spirulina (200 tablets)
- Coral Lecithin (120 capsules)
- O!Mega-3 TG (30 capsules)
- Super-Flora (30 capsules)
- Coral-Mine (30 sachets)

The **Nutripack** set is designed to enrich your daily diet with important natural nutrients.

The regular intake of many nutrients (antioxidants, phospholipids, polyunsaturated fatty acids, minerals, probiotics, and fiber) is necessary for proper human nutrition. The modern diet is poor in these nutrients due to the intensive processing technologies of food raw materials, people's dietary habits, and lifestyle. The Nutripack set contains the main groups of essential nutrients. Moreover, they are all of the natural origin, which is especially valuable under the conditions of natural food shortage.

Coral Alfalfa contains leaf juice and herb powder of the Alfalfa plant. Alfalfa is a rich source of essential minerals for the human body (calcium, iron, phosphorus, magnesium, sulfur, potassium, silicon) and contains rare minerals of plant origin (e.g. fluorine). It has a fair quantity of vitamins (C, E, K, and B complex), organic acids, and chlorophyll.

Premium Spirulina is a depository for biologically active substances, namely vegetable protein, chlorophyll, rare antioxidant – phycocyanin, C, E, B vitamins, beta-carotene, minerals, and polyunsaturated fatty acids. It is 100% natural and contains no excipients.

Coral Lecithin is a source of phospholipids that the body needs on a daily basis to restore the integrity of cell membranes damaged by oxidants. Lecithin also comprises choline and inositol that have a beneficial effect on the brain and nervous system.

O!Mega-3 TG is a source of essential polyunsaturated fatty acids (PUFAs). The Omega-3 PUFAs are incorporated in cell membranes, involved in hormone synthesis, and contribute to cholesterol level reduction. An adequate intake of Omega-3 PUFAs is of prime importance for the brain, heart, eyesight, and skin. The product is derived from the natural fat of marine fish.

Super-Flora is a balanced combination of probiotics (bifidobacteria and lactobacilli) and prebiotic inulin to normalize intestinal microflora. By increasing the number of beneficial bacteria in the gut, the digestive process is improved and immunity is strengthened.

Coral-Mine is a natural product that has relict coral mineral composition comprised of salts of beneficial macro- and micronutrients. When interacting with water, minerals from salts pass into water, positively affecting its physiological full value and organoleptic properties.

Parashield

Item: 803200

The **Parashield** set is designed to protect against endoparasites.

The sources of infection are everywhere around us, and maintaining good hygiene is not always enough to prevent them. It is often difficult to diagnose parasitic infection due to the lack of specific symptoms. While in the body, parasites not only deprive the body of nutrients, but also poison it with their metabolic by-products, disrupt many metabolic processes (including absorption and assimilation of nutrients from food, and intestinal function) and misbalance the internal environment of the body (for example, intestinal microflora). Administration of the product set containing herbal extracts with anthelmintic action, as well as minerals and probiotics, will help you comprehensively protect your body and maintain health.

ParaFight is a broad-spectrum antiparasitic agent. It is based on a combination of 12 herbal extracts: Black Walnut, Cloves, Chamomile, Gentian, Long Pepper, Yarrow, Althea, Garlic, Peppermint, Thyme, Sage and Oregano. The comprehensive action of the active ingredients of these extracts inhibits the parasites' vital activity at different stages of their life cycle, stimulates their elimination from the body, and helps to cope with the processes of decay and fermentation in the intestine.

The set contributes to:

- elimination of various endoparasites (pinworms, ascarids, flukes, giardia, toxocara, etc.) from the intestines;
- detoxification of the body;
- immune stimulation;
- restoration of the healthy intestinal microflora and increase in the number of own beneficial bacteria.

Ingredients:

- ParaFight (90 capsules)
- Coral Burdock Root (90 capsules)
- MSM (60 vegetable capsules)
- Super-Flora (90 vegetable capsules)
- Coral-Mine (30 sachets)

Coral Burdock Root consists of powdered burdock root and its extract, which increases the concentration of active ingredients. The active ingredients of the product accelerate the body's self-cleaning and suppress the growth of pathogenic bacteria in the gastrointestinal tract.

MSM is a synergistic product based on bioavailable organic sulfur (MSM), vitamin C, and biotin. The active ingredients of the product help to remove many toxins substances from the body, provide antioxidant protection, and improve the condition of the skin, hair and nails.

Super-Flora is a balanced combination of probiotics (bifidobacteria and lactobacilli) and prebiotic inulin to normalize intestinal microflora. By increasing the number of beneficial bacteria in the gut, the digestive process is improved and immunity is strengthened.

Coral-Mine is a natural product that has relict coral mineral composition of coral relicts, consisting of salts of beneficial macro- and micro-nutrients (calcium, magnesium, potassium, etc.). When interacting with water, minerals from salts pass into water, positively affecting its physiological full value and organoleptic properties.

Parashield Plus

Item: 803300

The set contributes to:

- intensive cleansing of different internal parasites (pinworms, ascarids, Opisthorchis, lamblia, toxocara, etc.)
- normalization of the digestive system
- restoring healthy intestinal microflora
- immunity strengthening.

Ingredients:

- ParaFight (90 capsules)
- Coral Black Walnut (90 vegetable capsules)
- Coral Burdock Root (90 capsules)
- Assimilator (90 vegetable capsules)
- Pau D'Arco with Selenium (90 capsules)
- MSM (60 vegetable capsules)
- Super-Flora (90 vegetable capsules)
- Coral-Mine (60 sachets)

Parashield Plus is the advanced version of Parashield pack for more intensive protection against internal parasites.

To enhance the effects, the pack includes 3 products: Coral Black Walnut, Pau D'Arco with Selenium, Assimilator. The duration of intake is increased and the unique 6-stage intake scheme is developed. The active components alternate to expand the range of effects, accelerate detoxification, eliminate parasites from the body, and restore the intestinal microflora and digestion.

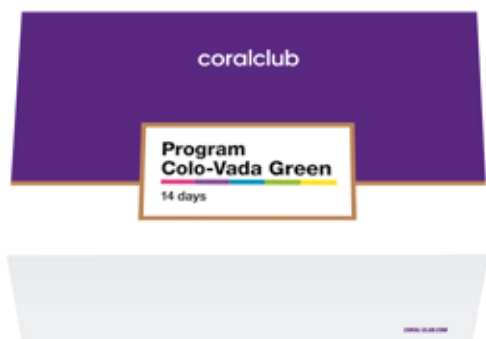

Coral Black Walnut is the source of juglone, essential oils and tannins. Such a complex of active components helps to fight helminths and contributes to the normalization of the gastrointestinal tract. When taken with ParaFight, the effect on parasites is increased and the work of the intestines is improved.

Pau D'Arco with Selenium contains valuable substances naphthoquinones (lapachol, beta-lapachol) which interfere with the vital activity of pathogenic microorganisms and activate the body's immune system. Selenium and vitamin C provide antioxidant protection and also have a positive effect on the immune system. They synergistically complement and enhance the effect of the entire complex. Taking Coral Black Walnut together prevents the proliferation of pathogenic bacteria and fungi and accelerates the recovery of tissues and organs damaged by parasites.

Assimilator is a complex of digestive enzymes that helps break down food and normalize digestion. It helps to neutralize and remove toxins from the body.

Program Colo-Vada Green

Item: 120600/91302/91303/91304/Light Mix/Colo-Vada Mix/«Super-Flora» blister (30 capsules)

The set helps:

- improve digestive, excretory, respiratory, cardiovascular, and lymphatic function.
- increase vitality and performance;
- improve skin condition.

Program Colo-Vada Green is an effective complex program that cleanses the body and restores a healthy internal environment without disturbing your daily routine and without causing discomfort. The program is a 14-day program, designed to cleanse and detox your body.

The 3-phase process is formulated to achieve maximum effect in ridding your body of harmful toxins and waste products, while helping you to restore digestive function and overall health.

Phase 1

PREPARATION – 7 days

For the first phase of the program, use 14 packets number 1. Each of these packets includes the following products: Ultimate (1 tablet), Vitamin C (1 tablet), Alfalfa (2 capsules), Cascara Sagrada (1 tablet), Combination 2 (2 capsules), Black Walnut Leaves (2 tablets) and Super-Flora (14 capsules).

At this particular stage, a body is preparing for a detox and toxins are being flushed to the large intestine. The supply of nutrients helps normalize bowel function.

Phase 2

CLEANSING – 4 days

For the second phase of the program use 8 packets

number 2, 8 packets of Colo-Vada Mix powder and 8 packets of Light Mix Powder. Each packet number 2 contains: Ultimate (1 tablet), Vitamin C (1 tablet), Alfalfa (2 capsules), Cascara Sagrada (1 tablet), Combination 2 (1 capsule), Black Walnut Leaves (1 tablet) and Super-Flora (8 capsules).

At this particular stage, Colo-Vada Mix and Light Mix powders swells to form a gelatinous matter that encapsulates large masses of stagnant bowel contents and easily removes them.

Phase 3

RESTORATION – 3 days

For the third stage of the program use 6 packets number 3 with the following ingredients: Ultimate (1 tablet), Vitamin C (1 tablet), Alfalfa (2 capsules), Cascara Sagrada (1 tablet), DigestAble (1 capsule) and Super-Flora (8 capsules).

The 3rd phase is about restoration of the gastrointestinal tract and gut microbial flora through a combination of natural probiotic cultures (bifidobacteria and lactobacilli) and digestive enzymes (amylase, protease, lipase, bromelain, etc.).

Program 2 Colo-Vada Plus

Item: 12001/91302/91303/91304/91305/«Super-Flora» blister (30 capsules)

The set helps:

- improve digestive, excretory, respiratory, cardiovascular, and lymphatic function.
- increase vitality and performance;
- improve skin condition.

Program 2 Colo-Vada Plus is an effective complex program that cleanses the body and restores a healthy internal environment without disturbing your daily routine and without causing discomfort. The program is a 14-day program, designed to cleanse and detox your body.

The 3-phase process is formulated to achieve maximum effect in ridding your body of harmful toxins and waste products, while helping you to restore digestive function and overall health.

Phase 1

PREPARATION – 7 days

For the first phase of the program, use 14 packets number 1. Each of these packets includes the following products: Ultimate (1 tablet), Vitamin C (1 tablet), Alfalfa (2 capsules), Cascara Sagrada (1 tablet), Combination 2 (2 capsules), Black Walnut Leaves (2 tablets) and Super-Flora (14 capsules).

At this particular stage, a body is preparing for a detox and toxins are being flushed to the large intestine. The supply of nutrients helps normalize bowel function.

Phase 2

CLEANSING – 4 days

For the second phase of the program use 8 packets

number 2 and 16 packets of Colo-Vada Mix powder. Each packet number 2 contains: Ultimate (1 tablet), Vitamin C (1 tablet), Alfalfa (2 capsules), Cascara Sagrada (1 tablet), Combination 2 (1 capsule), Black Walnut Leaves (1 tablet) and Super-Flora (8 capsules).

At this particular stage, Colo-Vada Mix powder swells to form a gelatinous matter that encapsulates large masses of stagnant bowel contents and easily removes them.

Phase 3

RESTORATION – 3 days

For the third stage of the program use 6 packets number 3 with the following ingredients: Ultimate (1 tablet), Vitamin C (1 tablet), Alfalfa (2 capsules), Cascara Sagrada (1 tablet), DigestAble (1 capsule) and Super-Flora (8 capsules).

The 3rd phase is about restoration of the gastrointestinal tract and gut microbial flora through a combination of natural probiotic cultures (bifidobacteria and lactobacilli) and digestive enzymes (amylase, protease, lipase, bromelain, etc.).

Recover

Item: 807100

The set helps:

- restore the mineral balance of the body;
- speed up the elimination of toxins;
- stabilize emotional balance and mood;
- facilitate falling asleep and improve the quality of sleep;
- restore intestinal microflora;
- strengthen weakened immunity.

Ingredients:

- Oceanmin (2 packs, 30 sticks)
- Coral Artichoke (90 capsules)
- Pentokan K⁺ (2 packs, 40 effervescent tablets)
- Selenium (100 veg caps)
- MSM (60 veg caps)
- Super-Flora (90 veg caps)
- Griffonia (60 capsules)

Acute respiratory viral infections and influenza account for about 90% of all infectious diseases throughout the year. The new coronavirus infection differs from previous ones in the frequency of severe cases, the duration of the disease, and the more severe consequences. Those who have experienced such respiratory illnesses have often complained of general weakness, fatigue, sleep problems, increased anxiety, digestive problems and hair loss. Specialists have even coined a new term - "post-covid syndrome," which refers to long-term symptoms that occur after recovery and last up to 12 weeks (and sometimes longer).

The **Recover** pack is designed to help the body recuperate after an infection and help you return to a full life as soon as possible.

Active ingredients:

Minerals (magnesium, potassium, selenium, sulfur, and calcium). During an infection, the body loses many minerals, the deficiency of which negatively affects the functioning of various organs and systems. The additional intake of electrolyte minerals (potassium and magnesium) from Oceanmin and Pentokan accelerates the restoration of the body's water-salt balance, on which the normal functioning of the cardiovascular, muscular, and nervous systems depends. Normalization of the water-salt balance will allow you to feel stronger and to cope with feelings of fatigue. Organic sulfur (MSM) and selenium improve the con-

dition of the skin, hair, and nails, as well as increase antioxidant protection and strengthen the immune system.

Vitamins (B vitamins and vitamin C). Vitamins B6 and B12 (included in Griffonia) act synergistically to support the health of the nervous system and cognitive function. Vitamin B7, or biotin, (included in MSM) is necessary for the synthesis of keratin - the main protein of hair and nails. It improves their appearance and condition, accelerates growth, and helps prevent hair loss. Vitamin C (included in MSM, Pentokan, and Selenium) strengthens the immune system and helps and helps to quickly deal with the effects of infection.

Probiotics and prebiotics. These increase the number of beneficial intestinal microflora, which improves the absorption of nutrients, reduces discomfort in the intestines, improves stool, and strengthens the immune system.

Herbal hepatoprotectors. During a respiratory infection or virus, the liver is put under a lot of stress both due to the disease and the treatment. Artichoke, milk thistle, dandelion root, and betaine extracts protect and repair liver cells and accelerate the elimination of toxins.

Plant-based 5-HTP. Griffonia extract increases the synthesis of endorphins, which can help reduce feelings of anxiety, depression, and improve mood and sleep.

Water Pack

Item: 803010/803070/803080

The set contributes to:

- to improve overall health;
- to regulate water-salt balance in the body.

Ingredients:

- Coral-Mine (30 sachets)
- Kor Delta bottle

Water Pack is a turnkey solution that helps you consume the right quality, quantity and convenience of water.

Water is one of the most essential requirements for the proper circulation of nutrients in the body. Keeping your body hydrated helps it function at its best.

Coral-Mine is a natural product from Japan made of deep-sea coral (scleractinias) collected in the Sea of Japan, near the islands of Okinawa and Tokunoshima.

Coral-Mine normalizes the functions of all bodily organs and systems by regulating mineral balance.

A sachet placed in water enriches it with beneficial minerals, restores water-salt balance, has a positive

effect on the kidneys and digestive system functions, and helps to regulate blood pressure. The ingredients promote the growth of bones and connective tissue, with a beneficial effect on general health and a mild tonic effect.

The **Kor Delta** is an innovative hydration vessel that helps to preserve water's beneficial properties. It is made from BPA and phthalate-free, health-safe materials.

The set includes a Z-card with useful information about water and its health benefits.

BEAUTY

PRIVILEGE

LOS ANGELES

Your skin
is your privilege

Privilege —

is a premium line of anti-aging products that provide perfect texture, elasticity, and youthfulness to your skin. The range is based on natural plant components created by the purest ecosystem, the Hawaiian Islands. A key ingredient in the Privilege beauty formula is Kona coffee, which has exceptional anti-aging properties.

Privilege Milk Cleanser

Item: 60010

Type/size: 100 ml

Ingredients:

Aloe Barbadosensis Leaf Juice*, Aqua (Water/Eau), Sodium C14-16 Olefin Sulfonate, Glycerin, Cocamidopropyl Betaine, Phenoxyethanol, Disodium Cocoamphodiacetate, Coffea Arabica (Coffee) Seed Oil, Glycol Distearate, PEG-150 Pentaerythrityl Tetrastearate, Sodium Chloride, Caprylyl Glycol, Caprylyl/Capryl Glucoside, Lauryl Glucoside, Sodium Glycolate, Ethylhexylglycerin, Hexylene Glycol, Sodium Sulfate, Coconut Acid, Sodium Diglycolate, Tetradecene, Tocopheryl Acetate, Hexadecene, Sodium Citrate, Sodium Bicarbonate, 3-O-Ethyl Ascorbic Acid, Soluble Collagen, Retinyl Palmitate, Tetrasodium EDTA, Coffea Robusta Seed Extract, Camellia Sinensis Leaf Extract, Tocopherol, Leuconostoc/Radish Root Ferment Filtrate, Methylchloroisothiazolinone, Sodium Hyaluronate, Methylisothiazolinone, Potassium Sorbate, Trisodium EDTA, Citric Acid, Caramel.

*Certified Organic

The "cleansing step" is a very important first step in every skincare routine. **Privilege Milk Cleanser** is the first step of your morning beauty routine, which gently cleanses, moisturizes, refreshes, and prepares the skin for makeup. In the evening, use Privilege Milk Cleanser to deep clean clogged pores and remove makeup, while leaving the skin clean, soft and supple.

Main Components

Coffee Extract and Oil Kona

As a source of caffeine, Kona Coffee promotes blood circulation, which leads to healthy energized skin. It leaves skin soft and supple without irritation.

Aloe Vera is an incredible plant, which has a beneficial effect on the skin. It is effective in wrinkle treatment, by improving collagen production and skin elasticity.

Vitamins A, C, and E are known for their antioxidant properties, which help to prevent damage to the skin.

Green tea extract naturally contains antioxidants, which also have a cell-protecting function. It helps keep the skin hydrated and looking healthier.

Privilege Facial Scrub

Item: 60020

Type/size: 50 ml

Ingredients:

Aloe Barbadensis Leaf Juice*, Propylene Glycol, Caprylic/Capric Triglyceride, Pentylene Glycol, Coffea Arabica (Coffee) Seed Powder, Juglans Regia (Walnut) Shell Powder, Carbomer, Cetearyl Alcohol, Aqua (Water/Eau), Phenoxyethanol, Caprylyl Glycol, Cetareth-20, Coffea Arabica (Coffee) Seed Oil, Sodium Hydroxide, Tocopheryl Acetate, Soluble Collagen, Retinyl Palmitate, Glycerin, Sorbic Acid, Oryza Sativa (Rice) Extract, Coffea Robusta Seed Extract, Chamomilla Recutita (Matricaria) Flower Extract*, Tocopherol, Leuconostoc/Radish Root Ferment Filtrate, Biosaccharide Gum-1, Leuconostoc Ferment Filtrate, Potassium Sorbate, Soybean Peroxidase, Superoxide Dismutase, Trisodium EDTA, Caramel.

*Certified Organic

Privilege Facial Scrub exfoliates the skin, removing dead skin cells and allowing the skin to regenerate for a fresh and glowing look. Formulated with finely ground Kona coffee beans and walnut shells. Massaging the skin with the scrub promotes blood circulation, which leads to healthy energized skin.

Main Components

Coffee Extract and Oil Kona

Kona Coffee, as a source of caffeine, promotes blood circulation, leading to healthy, energized skin. This leaves the skin feeling soft and supple, without any irritation.

Aloe vera is an amazing plant that has many benefits for the skin. It can help reduce wrinkles by increasing collagen production and improving skin elasticity.

Kona coffee beans and walnut shells gently exfoliate your skin the natural way by removing dead skin cells.

Vitamins A and E penetrate deeply in skin, reducing the appearance of fine lines and wrinkles.

Marine collagen is derived entirely from fish collagen. Rich in amino acids, it improves skin hydration and firmness.

Extract of chamomile flowers (organic)

Chamomile not only reduces inflammation, but also cleanses and moisturizes the skin while soothing irritation.

Superoxide dismutase and peroxidase are super-antioxidants, which have the ability to reduce free radical damage in the skin, to prevent wrinkles, fine lines, age spots, to help with healing.

Privilege Hydrating Toner

Item: 60030

Type/size: 100 ml

Ingredients:

Aloe Barbadensis Leaf Juice*, Glycerin, Hamamelis Virginiana (Witch Hazel) Extract, Aqua (Water/Eau), Heptyl Glucoside, 1,2-Hexanediol, Caprylyl Glycol, Alcohol, Potassium Sorbate, Coffea Arabica (Coffee) Seed Oil, Soluble Collagen, Coffea Robusta Seed Extract, Phenoxyethanol, Heptanol, Sodium Ascorbyl Phosphate, Sodium Hyaluronate, Tocopheryl Acetate, Retinyl Palmitate, Anthemis Nobilis Flower Extract, Ethylhexylglycerin, Leuconostoc/Radish Root Ferment Filtrate, Tocopherol, Trisodium EDTA, Caramel.

*Certified Organic

Privilege Hydrating Toner is used after Privilege Cleansing Milk to stimulate and rehydrate the skin. Due to its balanced combination of natural ingredients, Hydrating Toner is used to purify and hydrate the skin. It restores the pH-balance, improves overall skin tone, balance, and brightness.

Main Components

Coffee Extract and Oil Kona

As a source of caffeine, Kona Coffee promotes blood circulation, which leads to healthy energized skin. It leaves the skin soft and supple with no irritation.

Aloe Vera is an incredible plant, which has a beneficial effect on the skin. It is effective in wrinkle treatment, by improving collagen production and skin elasticity.

Witch hazel extract is a natural astringent that can help to reduce inflammation, and decrease oil and redness. Witch hazel is known to tighten skin and it works to seal in moisture.

Chamomile extract not only reduces inflammation, but also cleanses and moisturizes the skin while soothing irritation.

Vitamins A, C and E are known for its antioxidant properties, which helps to prevent damage to skin.

Privilege Intensive Eye Serum

Item: 60040

Type/size: 30 ml

Ingredients:

Aloe Barbadensis Leaf Juice organic, Aqua (Water/Eau), Soluble Collagen, Glycerin, Carbomer, Phenoxyethanol, 3-O-Ethyl Ascorbic Acid, Proline, Threonine, Caprylyl Glycol, Oryza Sativa (Rice) Extract, Coffea Robusta Seed Extract, Leuconostoc/Radish Root Ferment Filtrate, Sorbic Acid, Chamomilla Recutita (Matricaria) Flower Extract organic, Sodium Hydroxide, Ahnfeltiopsis Concinna Extract, Euterpe Oleracea Pulp Powder, Sodium Hyaluronate, Tocopheryl Acetate, Retinyl Palmitate, Leuconostoc Ferment Filtrate, Potassium Sorbate, Acetyl Hexapeptide-8, Ethylhexylglycerin, Hexylene Glycol, Trisodium EDTA, Tocopherol, Soybean Peroxidase, Superoxide Dismutase, Caramel.

Privilege Intensive Eye Serum is formulated to improve the appearance of lines, wrinkles, dark circles and puffiness around the eye area. A balance of Science and Nature work in concert to provide a luxurious high-performance product.

Main Components

Coffee Extract

Coffee, as a source of caffeine, promotes blood circulation, leading to healthy, energized skin. This leaves the skin feeling soft and supple, without any irritation.

Aloe Vera, marine collagen and hyaluronic acid play an important role in skin health with its unique ability to hold in moisture.

Argireline has properties that inhibit the reactions that cause the muscles of the face to twitch. Argireline helps to preserve the existing elastin and collagen in the skin of the face.

Threonine and Proline are essential amino acids that are important for regulating protein balance. These components play a role in the repair of visible skin damage..

Acai berry is high in antioxidants working to fight the cell-damaging free radicals, which damage and age the skin and helps to maintain young and radiant skin.

Chamomile extract not only reduces inflammation, but also cleanses and moisturizes the skin while soothing irritation.

Vitamins A, C and E are known for their antioxidant properties, helping to prevent skin damage.

Privilege Intensive Facial Serum

Item: 60050

Type/size: 50 ml

Ingredients:

Aloe Barbadensis Leaf Juice*, Glycerin, Aqua (Water/Eau), Soluble Collagen, Hypnea Musciformis Extract, Carbomer, Phenoxyethanol, 3-O-Ethyl Ascorbic Acid, Proline, Threonine, Sargassum Filipendula Extract, Caprylyl Glycol, Sorbitol, Oryza Sativa (Rice) Extract, Tocopheryl Acetate, Coffea Robusta Seed Extract, Gellidiela Acerosa Extract, Leuconostoc/Radish Root Ferment Filtrate, Retinyl Palmitate, Sodium Hydroxide, Sorbic Acid, Chamomilla Recutita (Matricaria) Flower Extract*, Ahnfeltiopsis Concinna Extract, Sodium Hyaluronate, Leuconostoc Ferment Filtrate, Potassium Sorbate, Ethylhexylglycerin, Tocopherol, Acetyl Hexapeptide-8, Hexylene Glycol, Trisodium EDTA, Soybean Peroxidase, Superoxide Dismutase.

*Certified Organic

This unique formula is designed to improve various signs of aging skin and to give it a more youthful appearance. It penetrates the entire face and throat area leaving a smooth silky after-feel.

Main Components

Coffee Extract

Coffee, as a source of caffeine, promotes blood circulation, leading to healthy, energized skin. This leaves the skin feeling soft and supple, without any irritation.

Aloe vera is an amazing plant that has many benefits for the skin. It can help reduce wrinkles by increasing collagen production and improving skin elasticity.

Seaweed offers superior hydration as well as anti-ageing and anti-inflammatory benefits.

Threonine and Proline are essential amino acids that are important for regulating protein balance. These components play a role in the repair of visible skin damage.

Argireline has properties that inhibit the reactions that cause the muscles of the face to twitch. Argireline helps to preserve the existing elastin and collagen in the skin of the face.

Marine collagen, squalane and hyaluronic acid play an important role in skin health with their unique ability to retain moisture.

Vitamins A, C and E are known for their antioxidant properties, helping to prevent skin damage.

Privilege Repairing Eye Cream

Item: 60060

Type/size: 30 ml

Ingredients:

Aloe Barbadosis Leaf Juice*, Prunus Amygdalus Dulcis (Sweet Almond) Oil, Glycerin, Simmondsia Chinensis (Jojoba) Seed Oil, Soluble Collagen, Stearic Acid, Dimethicone, Coffea Arabica (Coffee) Seed Oil, Sorbitan Stearate, Aqua (Water/Eau), Phenoxyethanol, 3-O-Ethyl Ascorbic Acid, Carbomer, Cetyl Alcohol, Triethanolamine, Caramel, Glyceryl Stearate, PEG-100 Stearate, Caprylyl Glycol, Ethylhexylglycerin, Allantoin, Hexylene Glycol, Squalane, Tocopheryl Acetate, Retinyl Palmitate, Leuconostoc/Radish Root Ferment Filtrate, Euterpe Oleracea Pulp Powder, Sodium Hyaluronate, Myristyl Alcohol, Stearyl Alcohol, Coffea Robusta Seed Extract, Tocopherol, Anthemis Nobilis Flower Extract, Laminaria Digitata Extract, Potassium Sorbate, Acetyl Hexapeptide-8, Trisodium EDTA.

*Certified Organic

Privilege Eye Cream is formulated to improve the appearance of lines, wrinkles, dark circles and puffiness around the eye area. A balance of Science and Nature work in concert to provide a luxurious high-performance product.

Main Components

Kona coffee oil and extract

Kona Coffee, as a source of caffeine, promotes blood circulation, leading to healthy, energized skin. This leaves the skin feeling soft and supple, without any irritation. It helps to fight the signs of ageing and prevents wrinkles and other age spots, by stimulating the growth of collagen and elastin.

Sweet Almond Oil is light in texture and easily penetrates deep into the skin, providing anti-ageing benefits. It is safe to use on sensitive skin.

Jojoba oil is rich in amino acids and is a safe and natural moisturizing oil with a long list of benefits.

Aloe Vera, Marine Collagen, Squalane and Hyaluronic Acid play an important role in skin health with their unique ability to retain moisture.

Allantoin is a non-irritating ingredient that soothes and protects the skin. With the ability to help heal the skin and stimulate the growth of new tissue, it's a great all-rounder for keeping skin looking its best.

Vitamins A, C and E are known for their antioxidant properties, helping to prevent skin damage.

Argireline has properties that inhibit the reactions that cause the muscles of the face to twitch. Argireline helps to preserve the existing elastin and collagen in the skin of the face.

Acai berry is high in antioxidants, which work to fight the cell-damaging free radicals that damage and age the skin, helping to keep skin young and radiant.

Privilege Anti-Aging Morning Cream

Item: 60070

Type/size: 50 ml

Ingredients:

Aloe Barbadensis Leaf Juice*, Caprylic/Capric Triglyceride, Glycerin, Simmondsia Chinensis (Jojoba) Seed Oil, Soluble Collagen, Stearic Acid, Dimethicone, Coffea Arabica (Coffee) Seed Oil, Sorbitan Stearate, Aqua (Water/Eau), Phenoxyethanol, Carbomer, Cetyl Alcohol, Triethanolamine, Caramel, Glyceryl Stearate, PEG-100 Stearate, Caprylyl Glycol, Ethylhexylglycerin, 3-O-Ethyl Ascorbic Acid, Allantoin, Hexylene Glycol, Squalane, Tocopheryl Acetate, Retinyl Palmitate, Leuconostoc/Radish Root Ferment Filtrate, Euterpe Oleracea Pulp Powder, Sodium Hyaluronate, Myristyl Alcohol, Stearyl Alcohol, Coffea Robusta Seed Extract, Tocopherol, Anthemis Nobilis Flower Extract, Laminaria Digitata Extract, Potassium Sorbate, Acetyl Hexapeptide-8, Trisodium EDTA.

*Certified Organic

A drop of moisture for every cell - **Privilege Morning Cream** quickly penetrates into the skin, locking in moisture throughout the day. You will love the way this cream smooths the entire face and neck area with a silky finish. Perfect as a base for makeup.

Main Components

Coffee Extract and Oil Kona

Coffee, as a source of caffeine, promotes blood circulation, leading to healthy, energized skin. This leaves the skin feeling soft and supple, without any irritation. It helps to fight the signs of ageing and prevents wrinkles and other age spots, by stimulating the growth of collagen and elastin.

Aloe vera is an amazing plant that has many benefits for the skin. It can help reduce wrinkles by increasing collagen production and improving skin elasticity.

Jojoba oil is rich in amino acids and is a safe and natural moisturizing oil with a long list of benefits.

Marine collagen, squalane and hyaluronic acid play an important role in skin health with their unique ability to retain moisture.

Vitamins A, C and E are known for their antioxidant properties, helping to prevent skin damage.

Acai berry has a high content of antioxidants that help fight the damaging effects of free radicals in cells, which can damage and age skin, and help maintain youthful and radiant skin.

Privilege Anti-Aging Night Cream

Item: 60080

Type/size: 50 ml

Ingredients:

Aloe Barbadensis Leaf Juice*, Caprylic/Capric Triglyceride, Glycerin, Simmondsia Chinensis (Jojoba) Seed Oil, Stearic Acid, Soluble Collagen, Aqua (Water/Eau), Dimethicone, Sorbitan Stearate, Phenoxyethanol, Carbomer, Cetyl Alcohol, Triethanolamine, Glyceryl Stearate, PEG-100 Stearate, Fragrance/Parfum, Panthenol, Squalane, Caprylyl Glycol, 3-O-Ethyl Ascorbic Acid, Ethylhexylglycerin, Hexylene Glycol, Allantoin, Cyanocobalamin, Coffea Robusta Seed Extract, Tocopheryl Acetate, Retinyl Palmitate, Leuconostoc/Radish Root Ferment Filtrate, Euterpe Oleracea Pulp Powder, Myristyl Alcohol, Stearyl Alcohol, Anthemis Nobilis Flower Extract, Laminaria Digitata Extract, Sodium Hyaluronate, Potassium Sorbate, Tocopherol, Acetyl Hexapeptide-8, Trisodium EDTA.

Wake up feeling more refreshed than ever before by applying this overnight cream before bed. This cream works while you sleep to leave your skin feeling soft and smooth.

Main Components

Coffee Extract

Coffee, as a source of caffeine, promotes blood circulation, leading to healthy, energized skin. This leaves the skin feeling soft and supple, without any irritation.

Aloe vera is an amazing plant that has many benefits for the skin. It can help reduce wrinkles by increasing collagen production and improving skin elasticity.

Jojoba oil is rich in amino acids and is a safe and natural moisturizing oil with many benefits.

Marine collagen, squalane and hyaluronic acid play an important role in skin health with its unique ability to hold in moisture.

Vitamins A, C and E are known for their antioxidant properties, which helps to prevent damage to the skin.

Panthenol and vitamin B12 help to regulate the production of pigment in the skin, helping to prevent dark spots and pigmentation.

Acai berry has a high content of antioxidants that help fight the damaging effects of free radicals in cells, which can damage and age skin, and help maintain youthful and radiant skin.

Coralbrite

Premium Toothpaste
with Coral Apatite®

Net Wt. 90 g (2.02 oz)

Japanese mint flavour
99.7% natural ingredients
Free from: fluoride, mineral
oil, triclosan, SLES, parabens,
TSE, chlorhexidine

coralclub

Coralbrite

Item: 5720

Type/size: tube 80 g

Coralbrite toothpaste with Coral Hydroxyapatite:

- thoroughly cleans teeth of plaque;
- reduces demineralization of tooth enamel;
- improves remineralization of tooth enamel;
- reduces tooth sensitivity;
- polishes and whitens tooth enamel;
- prevents the appearance of tooth decay;
- prevents unpleasant odors.

Ingredients:

water, calcium carbonate, glycerin, sorbitol, hydroxyapatite (Coral Apatite®), cellulose gum, Japanese mint oil, Sekken Soji soap base derived from coconut oil, phenoxyethanol, sodium citrate, carrageenan, allantoin, onion extract, pistachio mastic.

Coralbrite is a new product not only in oral hygiene products but also in hydroxyapatite toothpastes. This Japanese-made product is one of the world's first toothpaste with hydroxyapatite, based on coral, a natural source of minerals. 99.7% of its ingredients come from natural sources, such as plants, fruits, algae and even vegetables. The toothpaste has a refreshing aroma of Japanese mint and not only cleans teeth but also preserves and restores vital tooth enamel and prevents tooth decay.

Active ingredients:

Calcium hydroxyapatite is the main ingredient of your teeth and bones (tooth enamel is 75% hydroxyapatite). **Coral Apatite® hydroxyapatite**, which forms the basis of Coralbrite toothpaste, is made from natural fossil coral from Yonaguni Island in Japan. This coral apatite is a rare and valuable resource that provides not

only calcium and phosphorus but also over 70 other minerals. The rich mineral composition of coral was dissolved in seawater more than 10,000 years ago, and its porous structure makes it an effective sorbent, helping to remove plaque and brighten tooth enamel more efficiently.

Natural calcium not only supplies calcium ions, but also maintains an alkaline pH in the mouth (pH 10), which reduces demineralization and prolongs the regenerative effect of hydroxyapatite.

Onion extract and allantoin soothe irritation and inflammation. Combined with the unique pistachio mastic, these ingredients serve to promote healing. Japanese mint oil in combination with this herbal complex gives a wonderful refreshing taste and aroma.

Cool Relief Crem

Item: 91645

Type/size: 120 g

Ingredients:

Purified Water, Menthol, Camphor, Emu Oil, Emulsifying Wax NF, Glyceryl stearate, Methylsulfonylmethane(MSM), Oryza sativa (Rice) Bran Oil, Glucosamine Sulphate, Olibanum (Boswellia Serrata) Gum, Hippophae rhamnoides (Seabuckthorn) Extract, Eugenia Caryophyllus (Clove) Leaf Oil, Eucalyptus Globulus (Eucalyptus) Leaf Oil, Mentha Viridis (Spearmint) Leaf Oil, Mentha Arvensis (Cornmint) Oil, Phenoxyethanol, other ingredients.

Healthy recreation and active lifestyle are your priorities! You are energetic and always on the move! But at some point, this vital system starts to experience unexpected breakdowns.

Cool Relief will help you with muscle strains, injuries, sciatica, osteochondrosis, various types of myositis and joint problems. This cream warms the muscles, relieving pain and stiffness.

Specially designed for fast and effective recovery, it has a strong analgesic and anti-inflammatory effect, stimulating the metabolism and improving the mobility of the musculoskeletal system. Its unique lipid base (natural Emu Oil) penetrates deep into the skin, providing excellent biological access of active ingredients to the affected tissue.

The cream contains the following ingredients:

Camphor: improves blood circulation and has a warming and tonic effect, normalizes the vascular tone, relaxes muscles, and reduces pain.

Menthol: by irritating nerve endings, provides analgetic and cooling effect contributing to blood outflow through the external veins and calming the injury spot.

Emu Oil is known for its anti-inflammatory effect for muscle and joint pain, it reduces inflammatory tissue, swelling and stiffness of joints, and relieves muscle tension.

MSM is actively involved in the formation of collagen

and keratin, main structural proteins of connective tissue and cartilage, that support joint flexibility and mobility, reduces inflammation caused by oxidative stress, and promotes the regeneration of damaged cells and the growth of new cells of cartilage and tendons.

Glucosamine Sulfate is a major component of synovial fluid, which provides "lubrication" of the joints by reducing friction and wears of cartilage, and stimulates the production of chondroitin to strengthen osteochondral tissue. By restoring the enzymatic processes in the articular cartilage, it provides for its integrity and strength, protects it against damage and inflammatory reactions.

Boswellia (frankincense) resin extract has anti-inflammatory effects, helps to improve the health of joints, and improves blood circulation. Boswellia is called the "fighter against inflammation". Active components of Boswellia, boswellic acids, slow down inflammation in the connective tissue, reduce swelling of joints, and reinforce and promote restoration of damaged blood vessels.

Sea Buckthorn extract stimulates the metabolic processes in the skin, increases its vitality being a source of a unique complex of biologically active substances and one of the richest sources of vitamins A, C, and E.

Cool Relief Cream works gently and safely: first, it calms the sore spot by cooling it a little, then warms it up nicely. After that the pain will go away!

Emu Oil

Item: 5710

Type/size: 50 ml

Ingredients:

Dromiceius oil (99.7%), Rosmarinus Officinalis Leaf Oil, Tocopheryl acetate, Limonene, Linalool. Limonene & Linalool naturally present in Rosemary (Rosmarinus Officinalis) oil.

Aboriginal people were the first to discover the healing properties of emu oil. Legend has it that the Aborigines used emu oil for all sorts of ailments for several centuries. It was a universal product. It was used to treat everything from fresh wounds, burns, insect bites and joint pain to skin conditions.

Emu Oil is a concentrated product obtained by extraction and fractionation. It absorbs quickly and does not leave greasy marks.

The anti-inflammatory and moisturising properties of Emu Oil can be explained by its composition. It is made up of 70% unsaturated fatty acids, which are highly active. Emu oil is rich in alpha-linolenic acid, a substance known for its therapeutic effects on muscle and joint pain, and oleic acid, which has local anti-inflammatory effects. Prostaglandins of linolenic acid reduce swelling and stiffness of joints with limited mobility. They have an analgesic effect (particularly in case of surface injuries) and release muscle tension caused by increased physical activity.

Emu Oil is a natural and effective moisturiser with high biological activity. It has a wonderful ability to absorb quickly and penetrate into the deeper layers of the skin, due to its high oleic acid content. Perfect for dry skin, it is an all day moisturiser, making it a perfect product in the dry skin care line.

Emu Oil is also an effective product for problem skin. Typically, a major drawback of all fat containing cosmetic skin care products is their capacity to clog pores, leading to the formation of acne. Emu oil does not clog pores and, thus, it does not cause the formation of acne.

It reduces irritation and dermatitis in eczema. Eczema patients often suffer from intolerance to cosmetics. The vast majority of moisturizers enhance skin irritation. Emu Oil does not irritate the skin of eczema sufferers and helps them to recover.

Emu Oil helps to regenerate and heal the skin. It has a calming effect, reduces itching, and prevents the formation of keloid tissue, allowing tissue repair to be faster, more intense, and accompanied by less pain. It may be applied to wounds at the stage of early epithelialization, since Emu oil shows bacteriostatic properties by preventing the generation of different types of bacteria in the wound. It was noted that when using this product, post-surgical sutures and burn wounds are healed much faster.

It may be combined with other cosmetic products, does not contain allergens, has no smell, and is very economical to use.

Emu Oil with Tea Tree Oil

Item: 91605

Type/size: 15 ml

Ingredients:

Oryza sativa (Rice) Bran Oil, Olea Europea (Olive) Oil, Beeswax, Emu Oil, Melaleuca Alternifolia (Tea Tree) Leaf Oil, Prunus Armeniaca (Apricot) Kernel Oil, Triticum Vulgare (Wheat) Germ Oil, Prunus Amygdalus Dulcis (Sweet Almond) Oil, Calendula Officinalis Flower Extract, Tocopheryl Acetate.

A balm of Emu Oil with the addition of Tea Tree Oil, vitamin E, and other components of natural origin is called the healing product for a reason. Due to its high penetrating ability, Emu oil transports all components of the balsam to the deep layers of skin, increasing their useful properties.

Specially selected composition improves local blood circulation, relaxes muscles, and promotes the healing of wounds, skin regeneration, and the management of pain; it helps burns of various natures (thermal, chemical, and solar). Prolonged use of balsam helps to normalize the secretion of sebaceous glands, to improve the structure and appearance of skin. Tea Tree Oil and calendula are used in beauty therapy as anti-inflammatory, disinfectant and wound-healing components that have a positive effect on dermal irritation and inflammatory processes.

Tea Tree Oil is a healing Oil. Australian Aborigines have known about the properties of tea tree for a long time. Its leaves are used to heal wounds. Its oil has antibacterial, immunostimulatory, and antiviral effects. Its properties make it ideal for treating burns, cuts, insect bites, acne and herpes. It also mitigates fatigue, softens and nourishes the skin, improves elasticity of capillary walls, improves blood circulation, eliminates cutaneous edema, and surface varicose veins.

Beeswax, a component of the balm, is easily absorbed by the skin, leaving it smooth and soft. The wax is beneficial to the skin as it is similar in composition to a number of sebum components. It promotes the formation of waxy film on the skin, thereby preventing it from dehydration. Vitamin A and carotenoids have a positive impact on the regeneration of epithelial tissue.

Vitamin E, the "beauty vitamin", protects the skin from free radicals, prevents premature ageing and wrinkles, and provides oxygen and moisture to keep the skin fresh and elastic.

Oils from sprouted wheat grains and stone fruits (almond, apricot) are a source of unsaturated fatty acids, minerals, vitamins, and other nutrients. Together with the Emu Oil, they reduce irritation and inflammation, have excellent moisturising, hydrating and regenerating properties.

Sunny Glow Lip Balm

Item: 5721

Type/size: Stick, 4.6 g

Benefits:

- Moisturizes and softens: maintains the natural beauty and tenderness of the lips
- Soothes and repairs: prevents cracking and promotes healing of the lips
- Protects from UV radiation: reduces the risk of sunburn and premature skin aging

Ingredients:

C12-15 alkyl benzoate, castor oil, dibutyl adipate, UV filter diethylamino hydroxybenzoyl hexyl benzoate, beeswax, hydrogenated coconut oil, candelilla wax, carnauba wax, UV filter ethylhexyl triazone, UV filter bemotrizinol (bis-ethylhexyloxyphenol methoxyphenyl triazine), shea butter, sea buckthorn oil, tocopherol, bisabolol.

Sunny Glow Lip Balm is the perfect solution for daily care and protection of your lips. Enriched with valuable sea buckthorn and shea oils, this waterproof balm intensely nourishes and moisturizes, preventing peeling and dryness. Natural waxes create a protective layer that gives the lips softness and elasticity. The lip balm with a high sun protection factor SPF 30 provides protection against UV-A and UV-B radiation without leaving a white film.

Active components:

Shea butter and sea buckthorn oil work synergistically to nourish and regenerate the skin of the lips. Shea butter provides deep moisturization and strengthens the skin's protective barrier, while sea buckthorn oil, rich in antioxidants, promotes healing and protects against external factors. These oils maintain elasticity and prevent premature skin aging.

Beeswax, candelilla wax, and carnauba wax have high nutritional and protective properties. They form a protective layer on the lips that prevents moisture loss, providing long-lasting moisturization and softening of the lips.

Bisabolol, derived from chamomile, effectively soothes the skin and promotes healing of small cracks on the lips. This component also helps with irritation of the lip skin.

UV filter bemotrizinol is a broad-spectrum filter that protects the lips from the harmful effects of UV-A and UV-B rays. It helps prevent photoaging of the skin and minimizes the risk of sunburn.

UV filter ethylhexyl triazone provides reliable protection against UV-B rays, which are the main cause of sunburn and damage to the upper layer of the epidermis.

Silver Gel

Item: 91637

Type/size: 44 ml

Ingredients:

Water, Triethanolamine, Carbopol, Silver 24 ppm.

Silver Gel, based on colloidal silver, is an antibacterial, anti-inflammatory product. The gel base provides high biological access of silver to the affected tissue with high effectiveness.

Silver suppresses specific enzymes involved in the metabolism of many species of bacteria (about 650), viruses and fungi. By penetrating into an infected cell, silver blocks respiratory function of a bacterium and closes the entrance of nutrients. This leads to the death of diseased cells, but does not cause any harm to healthy ones.

The anti-inflammatory properties of silver become apparent when it comes into contact with the affected tissue. Getting into the wound, silver binds to tissue proteins and creates a protective layer that coats the nerve endings preventing irritation. Under the influence of silver, the wound is quickly cleared of necrotic masses, the development of pathological process stops, and the healing process accelerates.

Silver-Max Care

Item: 91678/91679

Type/size: 118/236 ml

Ingredients:

Water, silver 10 ppm.

Silver-Max Care is a water solution of colloidal silver ("silver water") for daily facial skin cleansing. The technology of manufacturing a colloidal solution achieves a complete suspension of the silver particles in water. When applied as a lotion the ions of silver in Silver-Max Care solution inhibit the proliferation of pathogenic bacteria on the skin's surface.

Cleansing the face with this solution in the morning and evening leaves the skin looking fresh and hydrated. Beauticians recommend silver water for washing problem skin, such as acne, breakouts and acne scars. Silver-Max Care has a rejuvenating effect, reduces irri-

tation and prevents dryness and flaking of facial skin; it improves skin tone and activates cell regeneration.

Silver water-based soaking therapy, masks, and lotions are especially beneficial for delicate, irritable and sensitive skin.

½ teaspoon of Silver-Max Care added to a variety of facial masks that are based on clay, vegetables, fruits, berries, cottage cheese, yeast and other natural ingredients will enhance their beneficial effects.

Tea Tree Oil

Item: 5701

Type/size: 30 ml

Ingredients:

Melaleuca alternifolia oil 100%.

Tea Tree Oil is obtained not from tea leaves, but from the leaves of myrtle trees and *Melaleuca* bushes. They grow in Malaysia, Australia, and Southeast Asia. The oil solution is very concentrated, thus it may be applied only externally. However, even with external application special precautions must be taken, especially for sensitive skin.

Science began studying the properties of Tea Tree oil in the early 20th century. Their studies found that its antiseptic activity was 100 times stronger than carbolic acid, but at the same time it was harmless to humans. Tea Tree Oil is currently used as a broad-spectrum antiseptic. According to the researchers, "this antiseptic product with antibacterial, antifungal and anti-inflammatory properties is able to fight almost any disease: from bald ringworm to nail fungus." The composition of Tea Tree Oil is a balanced combination of 50 active components with therapeutic benefits for the skin. Tea Tree Oil is effective for acute and chronic

dermatitis. It has a regenerative effect, reduces irritation, swelling, itching, redness, herpes, and acne. It is used as daily care for oily skin as well as for cases of dandruff, hair loss, and warts. Due to the high penetrating power of Tea Tree Oil it works on the skin as well as inside the skin all at the same time. Due to the healing properties of Tea Tree Oil it is beneficial for the treatment of various muscle and joint injuries, sprains and strains, cuts, bruises, and burns. It relieves the pain, disinfects the affected area and promotes the healing of wounds, especially abscessed ones. In addition, by suppressing the damage causing by various microorganisms, bacteria and fungus, Tea Tree Oil shows excellent antibacterial and antifungal benefits.

And, of course, a warm bath with a few drops of Tea Tree Oil has a fantastic relaxing effect, improving tone and immunity.

Advanced Collagen Biocellulose facial mask

Item: 610105

Type/size: Five 25 ml Sachets

Ingredients (INCI):

Aqua, Butylene Glycol, Pullulan, Erythritol, Glycerin, Betaine, Hydrolyzed Collagen (MAXICOLLAGEN), PVP, Dipropylene Glycol, 1,2-Hexanediol, Hydroxyacetophenone, Polyglyceryl-10 Laurate, Sorbitan Caprylate, Xanthan Gum, Ammonium Acryloyldimethyltaurate/VP Copolymer, Lecithin, Sodium Hyaluronate, Hydrogenated Ethylhexyl Olivat, Parfum, Polyglyceryl-6 Stearate, Simmondsia Chinensis Seed Oil, Limnanthes Alba (Meadowfoam) Seed Oil, Maris Aqua, Hydrogenated Olive Oil Unsaponifiables, Polyglyceryl-6 Behenate, Caprylyl Glycol S-Octopus Pentapeptide-1 Sp, Acetyl Hexapeptide-8.

Advanced Collagen Biocellulose Facial Mask: Designed to help reduce the appearance of wrinkles and enhance skin's natural elasticity, offering a rejuvenated look. The biocellulose base ensures it adheres perfectly to the skin, creating a "second skin" effect for maximum benefit and comfort.

Active components:

MAXICOLLAGEN: Featuring Collagen Tripeptides, HAPA-5 Peptides, and Argireline, this blend supports the skin's natural recovery processes, nourishing and enhancing its appearance. The collagen helps maintain skin elasticity and minimize visible signs of aging. The biocellulose base has a high moisture-retention capacity, boosting the mask's hydrating effects.

Hydro Boost Biocellulose facial mask

Item: 610205

Type/size: Five 25 ml Sachets

Ingredients (INCI):

Aqua, Butylene Glycol, Glycerin, Panthenol, Caulerpa Lentillifera Extract, Dipropylene Glycol, Halobacillus Lysate Filtrate, Hydroxyacetophenone, 1,2-Hexanediol, Xylitylglucoside, Anhydroxylitol, Allantoin, Ammonium Acryloyldimethyltaurate/VP Copolymer, Sorbitan Caprylate, Xanthan Gum, Xylitol, Lecithin, Polyglyceryl-10 Laurate, Sodium Hyaluronate, Sodium PCA, Betaine, Glucose, Sodium Polyglutamate, Ascophyllum Nodosum Extract, Parfum, Maris Aqua, Sodium Lactate, Pentylene Glycol, PCA, Sodium Hyaluronate Crosspolymer, Hyaluronic Acid, Serine, Alanine, Glycine, Glutamic Acid, Lysine Hydrochloride, Threonine, Arginine, Proline.

Hydro Boost Biocellulose Facial Mask: This mask offers excellent hydration with active ingredients that nourish and improve the appearance of skin firmness. Its biocellulose base ensures optimal adhesion, enhancing the delivery of active substances for effective results.

Active components:

3D Hyaluronic Acid (Sodium Hyaluronate Crosspolymer): Provides multi-level, long-lasting hydration by attracting and retaining moisture, helping to improve skin elasticity.

Marine Algae: Known for its antioxidant properties, it supports the skin's barrier functions and protects against visible signs of environmental stress.

Metabiotic Ectoine: Derived from Halobacillus bacteria, it nurtures the skin's natural balance and resilience, enhancing comfort. The biocellulose base boosts the delivery of these ingredients, making the Hydro Boost Mask an effective choice for hydration and comfort.

Skin Harmony Biocellulose facial mask

Item: 610305

Type/size: Five 25 ml Sachets

Ingredients (INCI):

Aqua, Butylene Glycol, Glycerin, Sargassum Glaucescens Extract, Trehalose, Alteromonas Ferment Extract, Hydroxyacetophenone, 1,2-Hexanediol, Diglycerin, Ammonium Acryloyldimethyltaurate/VP Copolymer, Polyglyceryl-10 Laurate, Sorbitan Caprylate, Xanthan Gum, Lecithin, Moringa Pterygosperma Seed Extract, Lactic Acid, Potassium Hydroxide, Arginine, Lactobacillus Ferment, Maris Aqua, Parfum, Limonene*, Linalool*, Spirulina Platensis Extract, Ceramide NP, Menthyl Lactate, Menthol, Cholesterol, Stearic Acid, Caprylic/Capric Triglyceride, Phytosphingosine, Oleic Acid, Hydrogenated Lecithin, Caprylyl Glycol, Caprylhydroxamic Acid

*constituents of parfum

Skin Harmony Biocellulose Facial Mask: This mask actively soothes and improves the skin's appearance with its powerful active ingredients. The biocellulose base ensures perfect adherence, optimizing the delivery of its components for enhanced surface hydration and comfort.

Active components:

Metabiotics and Ceramides: These ingredients support the skin barrier, offering protection against environmental damage and aiding in moisture retention.

Moringa Seed and Marine Algae Extracts: Provide notable antioxidant benefits, effectively cleansing by removing impurities while nourishing the skin and enhancing its texture and tone. The biocellulose base ensures comfort and a refreshing feel.

The Skin Harmony Mask: Helps alleviate signs of stress and enhances the skin's natural radiance and appearance.

Home remedies collection

Household chemicals for the home Alive. This new generation of cleaning and detergents is effective, versatile, environmentally friendly and economical to use.

Alive products are specially designed for people who do not want to endanger their health and the surrounding environment with the aggressive effects of usual household chemicals. Alive products do not contain hazardous toxic substances such as petroleum products, borates, phosphates, phosphonates, optical brighteners, artificial fragrances, or dyes. Alive contains only soft, environmentally friendly surfactants, minerals, and organic substances.

Alive laundry detergents are available as granular powders for washing whites and colored fabrics, as well as a detergent for bleaching and removing stubborn stains. Both products contain zeolites (natural minerals that have replaced phosphates), sodium percarbonate (active oxygen), and an enzyme complex (enzymes). Zeolites, unlike phosphates, interact well with surfactants, together with which they effectively clean laundry from dirt, and are easily rinsed out of fabrics after washing. Enzymes and sodium percarbonate dis-

solve protein (blood stains, baby food, dairy products, eggs) and other complex contaminants without disturbing the fabric structure or changing its color. Due to the granular form of release, Alive powders do not "dust", and do not contain any fragrances and dyes, so they can be recommended for people suffering from allergies, asthma, and hypersensitivity to chemicals.

The Alive dishwashing liquid contains mild surfactants and is colour- and fragrance-free. It effectively dissolves grease, and is easily washed off from the dishes. The product is specially designed for people suffering from allergies and hypersensitivity to chemical ingredients in household chemicals. Its formula is non-irritating, and does not dry out the skin of the hands.

Alive products are safe for sewage systems and self-contained septic systems in cottages and holiday homes as they contain no chemically aggressive components.

Alive products are concentrated, so they last for a long time, which significantly saves you money and time.

Alive D Allergy-free dishwashing liquid

Item: 81311

Type/size: 946 ml

Ingredients:

Water, anionic surfactants 15-25%, amphoteric surfactants 15-20%, glycerol 1-3%, propylene glycol 1-2%, sodium chloride 0-2%, preservative (BIT) 0.01-0.04%.

Alive D Hypoallergenic dishwashing liquid is specially developed for people with allergies, asthma, etc. It does not contain fragrances, colorants, phosphates, petroleum products, chlorine or other components that can irritate the skin and respiratory tract.

This product perfectly removes grease from your dishes.

Vital Water

The **Vital Water** series of devices is designed to restore the energy and information parameters and the molecular structure of water as well as its revitalising effect. This water can then be used anywhere; at home, while visiting friends, in another city or country, while relaxing or while working.

The devices change the water structure that has been distorted by negative effects of the environment (electromagnetic and acoustic waves, significant changes in air pressure and temperature) and give it extra energy.

All the devices regardless of their design have a metal container (cylindrical in shape) made from special stainless steel that holds benchmark structured water. This benchmark water is a mixture of water samples from several world-famous medicinal water sources located in the Austrian Alps and in the Eurasian plain. This benchmark water has a high energy-retaining capacity and an ordered molecular structure. The metal

cylinder is magnetised with a magnetic field with the same parameters as the magnetic field of the Earth and is in resonance with it. There is a weak electro-magnetic field surrounding the dipoles of the structured water, which is magnified by several orders of magnitude thanks to the resonance effect.

When tap water passes through the body of the device it gets softened up, changes its structure and gets filled up with energy as it passes through in micro whirlpools (Shaubberger whirlpools). When it comes out of the device it has the same properties as spring water and has much greater water retaining capacity than the original tap water. Drinking this water improves the condition of your skin and hair, when applied to surfaces it prevents the formation of scale and rust in water pipes, heaters, dish washers and washing machines, clothes and underwear, it also reduces the consumption of detergents and electricity.

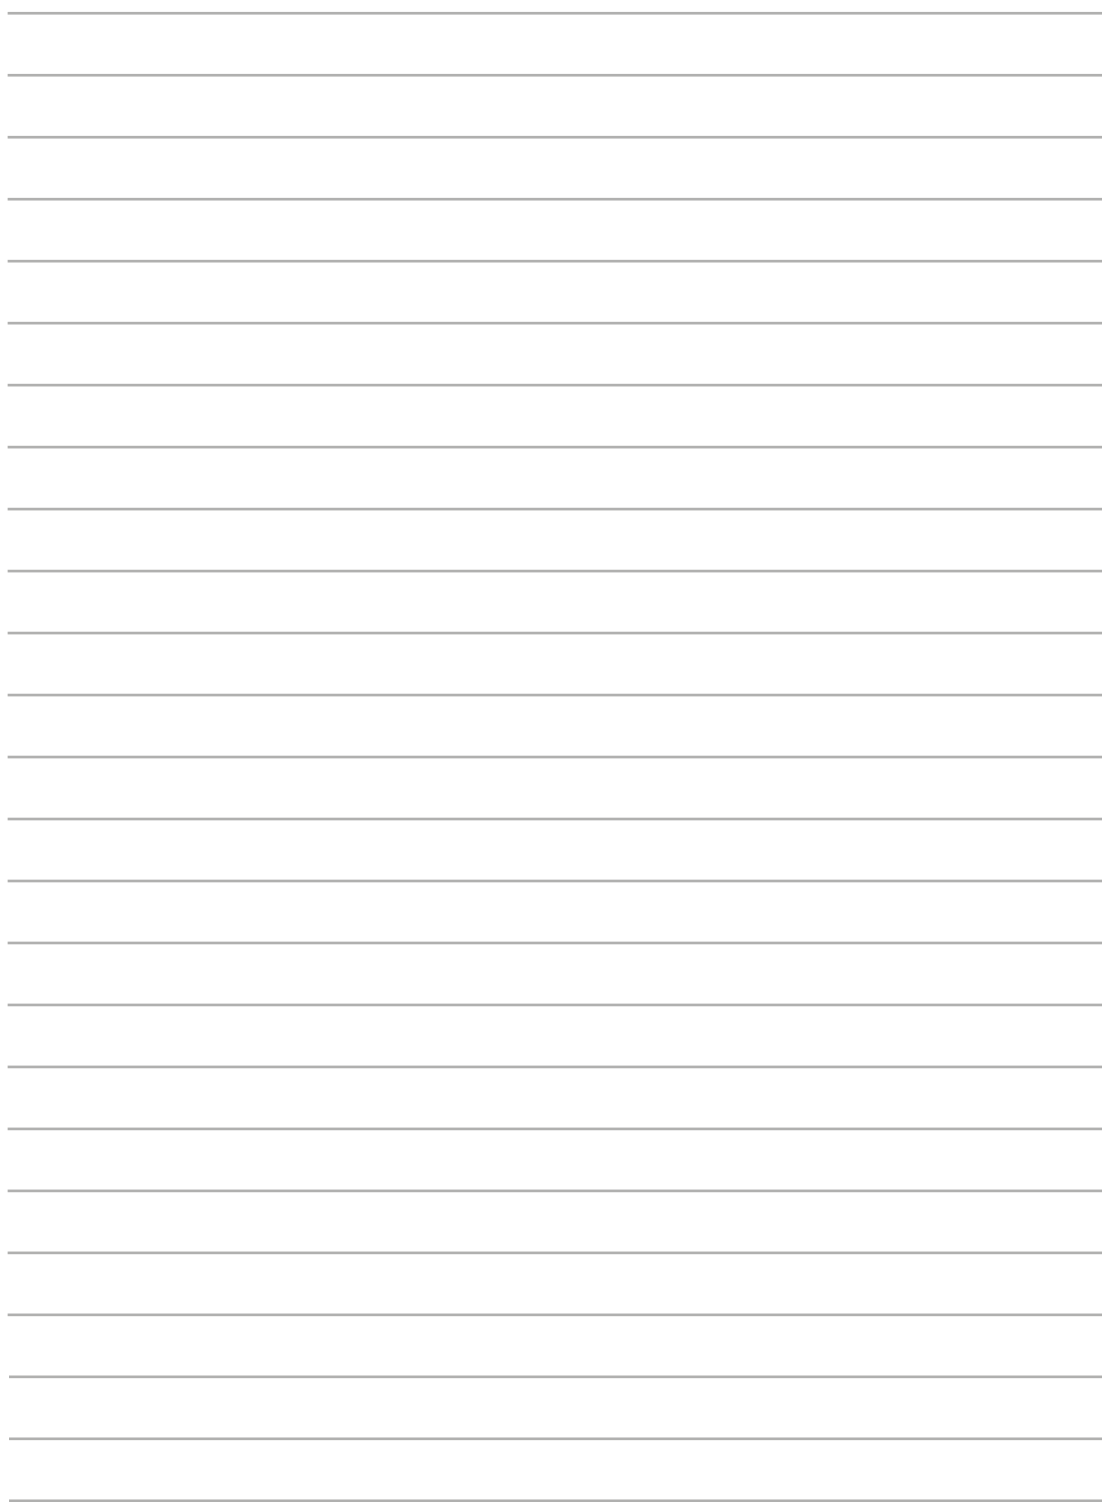

Vitastik

Item: 91749

The pencil-sized Vitastik is designed for the treatment of water and other liquids consumed by humans, including alcohol. It handles the volume up to 1.5-2 liters.

The device represents a sealed hollow steel cylinder magnetized in the magnetic field of the earth, with turbine located coaxially.
